RARE COIN AUCTIONS

OFFICIAL AUCTIONEER OF THE PCC'S MEMBERS ONLY SHOW

# RA 33

JUNE 27 | COSMO | LAS VEGAS

Welcome to Legend Rare Coin Auctions' 33rd Regency Auction! It is amazing to think that we have conducted 33 Regency Auctions already! Yet again our team did it! Since there was not much time between the May and June auction consignment deadlines, the goal was to have about 450 lots. Thanks to the hard work of our consignment specialists and many consignors placing their coins in our care for their presentation in this auction, we put together a sale that surpassed 500 lots, landing at 514 to be exact. The diversity of the coins in the offering presents a grand opportunity for any collector, at all stages in their collecting career.

The auction begins with the Hunter Collection, a 39-lot assortment of early silver issues, Draped Bust and Capped Bust half dimes, dimes, quarters, and half dollars, all graded by PCGS. We assure you that whether you are a novice collector, or an advanced specialist, you will find something of interest.

Type coins abound, beginning with an AU example of the popular Fugio copper, going into selections of early copper. Selections of the R.S.D. Collection anchor our offering of Proof Barber Dime and Proof Barber Quarters. Between the R.S.D. selections come a very extensive offering of Mercury dimes, with many coins ranking at or near the top of the Population Reports, as well as key date issues and beautifully toned examples.

Morgan and Peace dollars are always popular, and our sale is full of lustrous Gem and Superb Gem cartwheels. Key date Morgans include a handsome 79-CC, 89-CC, and 95-S—just to name a few. The Peace dollars are anchored by the Hickory Ridge Collection, the current #13 PCGS Registry Set.

Gold coins abound! From the tiny gold dollar to the huge \$50 slugs (we have two—a Humbert and a Pan-Pac), there is something for everyone! Particularly strong in popular grade better date \$10 and \$20 Libs, the sale also has some great early half eagles, and a nice offering of 1907 High Reliefs. Rounding out the sale are two very high end quality pattern coins!

We invite you to attend in person on June 27th at The Cosmopolitan Resort in Las Vegas—be sure to come early so you can view the coins in person. PCGS and Legend roll out the red carpet for all attendees, if you have attended a PCGS Members Show, you know what we mean; if not come out in June and see for yourself.

As always, happy hunting!

#### TERMS AND CONDITIONS

This is a public auction, conducted in accordance with these Terms and Conditions of Sale, by Legend Rare Coin Auctions (hereinafter referred to as "LRCA"). By bidding on any lot offered by LRCA, the bidder indicates acceptance of the following Terms and Conditions of Sale. Bidders are to comply with the Terms and Conditions of Sale, posted on LegendAuctions.com, at the time of the auction in which they are participating.

#### BUYER'S PREMIUM

A 17.5% buyer's premium will be added to all successful bids, and is payable by the winning bidder as part of the total purchase cost.

#### SALES TAX

All sales are subject to applicable state and local taxes. Any lots that are picked up and/or delivered in the state of The Regency Auction are subject to applicable state and local taxes.

#### PAYMENT

All merchandise must be paid for within TEN (10) days of the date of sale. We reserve the right to cancel any unpaid order after that time and to ban the bidder from future sales. Credit cards (Visa, MasterCard and Discover) are accepted for auction payments up to \$2,500.00 per invoice. Invoices and/or balances over \$2,500.00 must be paid via personal or certified check, money order, or wired funds. Personal checks, money orders and cashier's checks may be held for up to 10 business days in order to allow time for them to clear appropriate banking channels. Please email [info@legendauctions.com](mailto:info@legendauctions.com) for bank-wiring instructions and/or to provide numismatic references.

#### E-CHECK PAYMENTS

E-check payments now available. Please email form to [info@legendauctions.com](mailto:info@legendauctions.com)

#### INTERNATIONAL BUYERS

Foreign buyers, unknown to us, are required to deposit 25% of their anticipated expenditures before bidding. Please contact us in advance of bidding for bank wiring instructions.

#### EXTENDED PAYMENT TERMS

For all items \$15,000.00 and over, LRCA is now offering Extended Payment Terms. Please advise us at least 48 hours before bidding or purchasing the item in question. Pre-approval is required.

#### RETURN POLICY

All lots are sold "as is." Lots graded by PCCS, NGC or other third-party grading services, or any lot viewed by the buyer or anyone on buyer's behalf prior to the auction, may not be returned. This is not an approval sale. All sales of lots to the highest bidder are final. Bidders are strongly advised and encouraged to research any lots upon which they plan to bid, and to determine bids, based upon their own evaluation. Bidders assume all risks concerning and related to the grade, quality, appearance, condition, history and origin of any lot. Bidders acknowledge that coin grading is not an exact science, that it can be subjective and inconsistent and that it is possible that two parties might assess or grade the same coin differently. LRCA makes every effort to accurately describe all items offered in its sales. All items will be available for preview prior to the auction.

#### SHIPPING

Shipping costs will be billed separately and are non-refundable. Items will usually ship within 5-10 business days after payment has been received and/or funds have cleared. Coins will be shipped via Fed Ex or USPS or transported via armored carrier.

The shipping charge includes fees for our third-party insurance coverage, as well as any costs incurred through the USPS or Federal Express. Any shipments made via armored carrier (Brinks, Dunbar, etc.) will be calculated and assessed at the time of shipment.

#### INTERNATIONAL SHIPPING

It is not possible for LRCA to ship to some countries. Please email questions to [info@legendauctions.com](mailto:info@legendauctions.com). Payment for all international orders is required in US funds. Please contact [julie@legendauctions.com](mailto:julie@legendauctions.com) for bank wiring instructions.

Customs requirements for each country are the responsibility of the buyer. All packages shipped outside of the United States will include the required customs declaration and full value of the invoice.

#### BIDS VIA TELEPHONE

An absentee bidder may also participate live, during the auction, via telephone. Requests for phone bidding must be received at least three days prior to the auction date. Please fill out our phone bidding request form online or call 732-935-1168 to request a call from one of our representatives during the live auction. LRCA cannot guarantee phone lines, but will make every effort to accommodate those who wish to participate via this method.

#### RIGHTS & RESPONSIBILITIES

The auctioneer will determine the highest bidder. The auctioneer, alone, has the right to reopen the bidding for an item, if deemed necessary. LRCA and its representatives reserve the right to remove any attendees who impede the preview and/or the auction. Title to all merchandise shall pass to the winning bidder after receipt of good funds by LRCA. Bidders will be held responsible for their bids, including those bids placed incorrectly. PLEASE VERIFY BIDS BEFORE SUBMITTING THEM. In order to have a bid removed or corrected, bidder must contact LRCA prior to start of the auction. Bidder waives auctioneer's responsibility and holds LRCA harmless for failure to recognize, accept, receive or execute any lost or missing bids by internet, telephone, email, floor bid, fax, mail or other means. LRCA reserves the right to postpone or cancel an auction without notice. Lots may be withdrawn at LRCA's discretion, without prior notice. Lots may carry a reserve. A reserve is a price below which the auctioneer will not sell an item, or will re-purchase the item on behalf of the consignor or for LRCA. LRCA permits bids to be placed by the auctioneer, or an employee of the auctioneer, up to the pre-determined reserve set by the consignor. Legend Rare Coin Auctions' partner, Legend Numismatics, reserves the right to bid on items, for its own account and for the accounts of its clients.

#### DISCLAIMER AND WARRANTIES

No warranty of merchantability or fitness for a particular purpose is made or implied on any lot. No warranty, whether expressed or implied, is made with respect to any lot except for warranty of title, and in the case of title, auctioneer is selling only that right or title to the lot that the consignor may have as of the auction sale date. All lots are sold "as is" and with all faults. Purchaser hereby assumes all risks concerning and related to the grading, quality, description, condition, authenticity, and provenance of a lot.

- a. Coins and currency listed in this catalog graded by PCCGS, NGC, or any other third party grading service or examined by the buyer prior to the auction sale may not be returned for any reason whatsoever by any buyer, except for claims related to authenticity.
- b. For non-certified coins that have not been examined by the Buyer prior to the Auction Sale: if it is determined in a review by LRCA that there is a material error in the catalog description of a non-certified coin or the LRCA no later than seventy-two (72) hours of delivery of the lots in question, and such lots are returned and received by LRCA, in their original, sealed containers, no later than fourteen (14) calendar days after delivery, in the same condition the lot(s) were delivered to the Buyer, time being of the essence.
- c. If an item or items are returned pursuant to the terms herein, they must be housed in their original, sealed and unopened container.
- d. Late remittance or removal of any item from its original container, or altering a coin constitutes just cause for revocation of all return privileges.
- e. Grading or condition of rare coins may have a material effect on the value of the item(s) purchased, and the opinion of others (including independent grading services) may differ with the independent grading services opinion or interpretation of LRCA. LRCA shall not be bound by any prior, or subsequent opinion, determination or certification by any independent grading service.
- f. Questions regarding the minting of a coin as a "proof" or as a "business strike" relate to the method of manufacture and not to authenticity.
- g. All oral and written statements made by LRCA and its employees or agents (including affiliated and related companies) are statements of opinion only, and are not warranties or representations of any kind, unless stated as a specific written warranty, and no employee or agent of LRCA has authority to vary or alter these Terms and Conditions of Auction Sale. LRCA reserves the right to vary or alter the

Terms of Sale, either generally or with respect to specific persons or circumstances, in its sole discretion. Any variation or alteration shall be effective only if in writing and signed by an officer of LRCA authorized to do so.

h. LRCA is acting as an auctioneer. Title to the lots purchased passes directly from the Consignor to the Buyer. Accordingly, LRCA is not making, and disclaims, any warranty of title.

i. Bidder acknowledges that the numismatic market is speculative, unregulated and volatile, and that coin prices may rise or fall over time. LRCA does not guarantee or represent that any customer buying for investment purposes will be able to sell for a profit in the future.

j. Bidder acknowledges and agrees that neither LRCA, nor its employees, affiliates, agents, third-party providers or consignors warrant that auctions will be unimpaired, uninterrupted or error free and accordingly shall not be liable for such events.

#### WAIVER AND RELEASE

Bidder, for himself, his heirs, agents, successors and assignees, generally and specifically waives and releases, and forever discharges LRCA, and its respective affiliates, parents, officers, directors, shareholders, agents, subsidiaries, employees, managers and members and each of them, and their respective successors and assignees from any and all claims, rights, demands and causes of actions and suits, of whatever kind or nature, including but not limited to claims based upon Auctioneer's negligence, whether in law or equity, tort or otherwise, whether known or unknown, suspected or unsuspected (a "Claim"), which Bidder may assert with respect to and/or arising out of, or in connection with any challenge to the title to or authenticity of any goods purchased, the sale itself, any lot bid upon or consigned, and/or the auction, except where such Claim is otherwise expressly authorized in these Terms of Sale. It is the intention of Bidder that this waiver and release shall be effective as a bar to each and every Claim that may arise hereunder or be related to the Auction Sale.

#### DISPUTES

If a dispute arises concerning ownership of a lot or concerning proceeds of any sale, LRCA reserves the right to commence a statutory inter-pleader proceeding at the expense of the Consignor and Buyer and any other applicable party, and in such event shall be entitled to its reasonable attorneys' fees and costs. LRCA reserves the right to cancel or postpone the Auction Sale or any session thereof for any reason whatsoever. No Bidder shall have any claim as a result thereof, including for incidental or consequential damages. Neither LRCA nor any affiliated or related company shall be responsible for incidental or consequential damages arising out of any failure of the Terms of Sale, the auction or the conduct thereof and in no event shall such liability exceed the purchase price, premium, or fees paid. Rights granted to Bidders under the within Terms and Conditions of Auction Sale are personal and apply only to the Bidder who initially purchases the lot(s) from LRCA. The rights may not be assigned or transferred to any other person or entity, whether by sale of the lot(s), operation of law or otherwise. Any attempt to assign or transfer any such rights shall be absolutely void and unenforceable. No third party may rely on any benefit or right conferred by these Terms and Conditions of Auction Sale.

Any dispute arising out of or related to these Terms of Sale, the Auction Sale or any lot, with the sole exception of actions by Legend Rare Coin Auctions to collect amounts owed to it and other damages, shall be submitted to binding arbitration pursuant to the commercial arbitration rules of the American Arbitration Association, with any arbitration hearing to occur in Monmouth County, New Jersey. Absent an agreement of the parties, the arbitrator shall limit discovery to that which is necessary to enable the hearing to proceed efficiently. The arbitrator shall not have the power to award punitive or consequential damages, nor alter, amend modify any of the terms of this Agreement. The award by the arbitrator, if any, may be entered in any court having jurisdiction thereof. Each party shall pay one-half the costs of the arbitration. Bidder acknowledges and agrees that the competent courts of the State of New Jersey shall have exclusive in personam jurisdiction, subject to the requirement to arbitrate, over any dispute(s) arising hereunder, regardless of any party's current or future residence or domicile. Bidder further agrees that venue of the arbitration proceeding shall be in Monmouth County, New Jersey; and any court proceeding shall be in the Monmouth County Superior Court, in the State of New Jersey, and in each case waive any claim of Forum Non Conveniens. Bidder agrees that any arbitration or legal action with respect to this Auction Sale is barred unless commenced within one (1) year of the date of this Auction Sale.

Auction participants expressly waive any right to trial by jury.

## OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

## PRINCIPALS

Laura Sperber  
Partner

Laura was raised in Highland Park, NJ. During high school, the coin bug hit her hard. Her trip to the 1976 NYC ANA left a lasting mark and huge desire for her to own and handle the greatest rarities. While attending Monmouth University, Laura attended coin shows more than classes. After college, she started LSS RCI, a wholesale coin company. In 1986, she realized the need for a "better" coin retailer and teamed up in 1986 with George Huang to form Legend Numismatics.

In 1996 Bruce Morelan became a partner and since then Legend has exclusively built or assisted in assembling this generation's greatest collections. In 2012 Laura saw the need for a smaller, boutique auction firm, and created Legend-Morphy with Dan Morphy, whom she split with in 2014. Today, Laura is also a leading consumer advocate for coins. The passion has never subsided, and she keeps a beautiful Proof Walker on her desk to this day.

Bruce Morelan  
Partner

Bruce started collecting coins when he was only six years old and by the time he was in high school his dream was to be a coin dealer. But life intervened and instead, Bruce went into business. By chance, he became Legend Numismatics' financial backer in 1996. His great grandmother had given him three coins when he was young, one of which being a Trade Dollar, so he set out to build the finest Trade Dollar set. After a few years with ultra rarities, Bruce returned to his love of dollars and completed both a set of Gobrechts and a set of Seated Dollars.

After selling those sets, Bruce recently returned to dollars with a new Gobrecht set and a spectacular early dollar set capped by his dream coin, the Amon Carter 1794 Dollar. Not many collector's can say they have completed not only the finest 1794-1885 Dollar Sets and have over the years owned such coins as two 1913 Liberty Head Nickels, an 1894-S Dime, 1876-CC Twenty Cent piece, 1827 Original and Restrike Quarters, 1838-O Half Dollar, two 1885 Trade Dollars and four 1884 Trade Dollars!

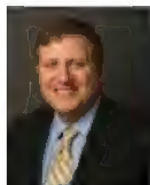

Julie Abrams  
President

Julie Abrams started in numismatics in 1986 when she joined up with Bernard Rome and launched Teletrade, the first computerized auction company. Teletrade developed a unique coin trading method, utilizing state-of-the-art digitized voice board technology to run live auctions before the advent of the internet. As President of Teletrade, Julie helped expand the company, increasing the frequency of auctions and expanding annual sales to \$24 million within a few years. In 1999, GMAI, a publicly traded company, purchased Teletrade and Ms. Abrams became Executive Vice President of Sales for the parent company. Her job responsibilities included continuing her role as CEO for Teletrade as well as marketing to buyers and consignors, with the goal of maintaining a balance between inventory and sales while growing the business.

In 2004 she joined Stacks-Bowers, an old world traditional auction house where she worked to expand their e-commerce presence, including the development of an online bidding platform for the firm. She also marketed Stacks' programs to secure consignments from dealers and institutions such as banks, museums and universities.

Julie is a member of the American Numismatic Association, the Central States Numismatic Association and Florida United Numismatists.

Legend Rare Coin Auctions is proud to begin Regency Auction 33 with this thoughtfully foraged collection of Draped and Capped Bust silver coinages. Assembled by a discerning specialist in pre-1840 silver series, this mélange of half dimes, dimes, quarters and half dollars provides a nice cross-section of denominations, dates, grades, pedigrees, and price points from 1796 to 1837. There are condition census coins, popular collector grades—truly something for anyone who collects Draped and Capped Bust coins. This holding is particularly strong in half dimes and half dollars; many of the former in Choice and Gem Mint State grades; while the halves are in AU grades, befitting a wide range of collectors. Every coin is graded by PCGS, and many are CAC approved. This impressive gathering begins with a CHOICE Mint State 1796 half dime with the popular error spelling LIKERTY instead of LIBERTY, pedigreed to the Simpson Collection. Other highlights are a pair of large sized Capped Bust quarters in MS65, one of which traces its provenance back to the Randall Collection and was purchased by the Garrett Family in the 1880s. Capped Bust half dollars range from AU to MS64—these trophies are certain to trigger the competitive spirit of any Numismatic gamesman.

On behalf of the consignor, LRCA wishes the best of luck to all bidders and congratulate the winners in advance for acquiring coins from this important offering.

# THE HUNTER COLLECTION

## LOT 1

**H10C 1796 LIBERTY. PCGS MS63 CAC**

Ex Simpson Collection

A memorable and gorgeous CHOICE Mint State example of this very popular Red Book variety. While on the whole, the variety rates as R-3, most known are lower circulated grades and many are impaired. MS63 and finer examples are VERY RARE and very rarely seen in auction!

From our December 2015 Regency Auction XV, where it was described as

"LM-1. Fantastic toning from decades in an album where the rims developed incredible neon green and blue shades, with the centers fading over to crimson and purple. Fiery luster beneath and the strike is very strong for this condition/rarity. Only a handful are known in Mint State and this choice example will stand tall amongst even the very finest. Rarely are these early silver coins found with such splendid toning! The surfaces are pleasing with little more than a few shallow lines and for identification there is a minor planchet void below the right wing of the eagle, just touching the talon on the cloud nearby. This is known as the LIBERTY variety because of the broken B punch used to engrave that word, which has the appearance of an errant K rather than the intended B."

"This coin is tied with at most five others as the fifth finest of the variety. Its color and surfaces make it stand tall and it would undoubtedly measure up well against even technically finer examples. This is one that no collector will ever want to part with, unless a significantly higher grade coin became available. Its color and allure will always be memorable."

PCGS 4, NGC 1, CAC 1. This was the most recent MS63 to sell in auction, realizing \$37,600 in December 2015. NO OTHER CAC-approved Mint State coin has ever sold in auction! That just goes to show how rare these are. Bound for an amazing type or date set and worthy of a very strong bid!

**PCGS# 4254 | ESTIMATE: \$33,000+**

**LOT 2**  
**H10C 1800 PCGS MS63 CAC**  
Ex: Simpson Collection.

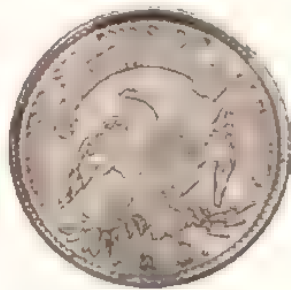

LM 3 One look and it's easy to see why we placed it in the original Simpson Collection. We strongly believe the coin should have been a +, but PCGS obviously said no (we make no promises)

Superior surfaces are a joy to behold. Even using the strongest glass, you will see not even a minute imperfection anywhere. A surprisingly strong luster blazes boldly from all over. Incredible album toning consisting of totally original gold/pale green/pale violet/royal blue/tangerine and maybe a few other pastel like colors covers both sides. We think the only issue that holds this coin back is the strike. Overall, the strike is strong—including the obverse stars. There is some weakness on the left side of the eagle and its shield, but we believe that is "as struck". The eye appeal is jaw dropping for sure!

PCGS 19, NGC 4, CAC 7. This coin is so incredible and HIGH END, we challenge it vs ANY other MS63. The last one to sell in auction brought \$18,800 in November 2018. We can see this coin attracting many serious bidders and selling for a lot of money. This is NOT your typical pretty MS63. Be prepared!

**PCGS# 4264 | ESTIMATE: \$17,500+**

# THE HUNTER COLLECTION

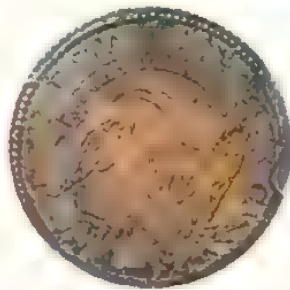

## LOT 3

### H10C 1829 PCGS MS64

LM-2. After a nearly two and a half decade break, half dimes were produced for the first time since 1805 in 1829. This is a fully brilliant and boldly satiny lustrous near-GEM example. Some semi-Prooflike flash comes out in a light when rotated at various angles. Sharply struck devices stand out against generally clean fields. The eye appeal is really pleasant.

PCGS 89, NGC 107. This coin sold in June 2017 for \$1,293 and the current Collectors Universe value is \$1,325. Very scarce finer, this is a popular first year of type date.

PCGS# 4276 | ESTIMATE: \$1,050+

## LOT 4

### H10C 1829 PCGS MS64 CAC

LM-3. Essentially a FULL GEM example of the first year of the type. The obverse is ultra flashy with a bold Prooflike flash, while the reverse has more of a frosty lustrous look. Both sides have an exceptional and original gold, rose, and blue pastel patina that really accents the smoothness of the surfaces and the sharpness of the strike. This is a lovely little jewel that is very high end for the assigned grade.

PCGS 89, NGC 107, CAC 21. This PQ, near-GEM is worthy of a premium bid, the eye appeal and this one will fit nicely into any type or date set of this short lived series.

PCGS# 4276 | ESTIMATE: \$1,400+

## LOT 5

### H10C 1830 PCGS MS64

LM-4.2. A pearlescent-silver tone has some deeper golden and dove-tan accents on the lustrous, satiny surfaces. Well struck from a later date state with multiple clash marks, a couple of die cracks and a die chip at the top loop of the second S in STATES. Free of any distracting marks, the eye appeal is very pleasing.

PCGS 94, NGC 97. The coin last sold in July 2014, realizing \$1,410. The current PCGS Price Guide value is listed at \$1,300. A pleasing, affordable, near-GEM half dime for the collector.

PCGS# 4277 | ESTIMATE: \$1,200+

## LOT 6

### H10C 1832 PCGS MS64 CAC

LM-12. Nice and frosty. Splashes of russet-gold and dove-silver grace both sides of this lovely little jewel. We note the typical striking weakness in the centers, but the eye appeal is quite nice, and the quality is technically all there for the grade.

PCGS 126, NGC 142, CAC 23. There are 10 APRs listed for PCGS/CAC coins, with the average being \$1,353 and the current PCGS Price Guide value is \$1,200. A really nice example for a type or date set for the collector on a more modest budget.

PCGS# 4279 | ESTIMATE: \$1,100+

# THE HUNTER COLLECTION

## LOT 7

### H10C 1832 PCGS MS66 CAC

LM 13, considered to be Rarity 3. What a sharply struck GEM! Every detail on the obverse is razor sharp in definition and there is just the slightest weakness on the central reverse. Bold, satiny underlying luster accents the devices and rich blue/pewter overtones. Even using a strong glass we are unable to find any trace of contact that has any affect on the eye appeal. HIGH END for sure!

PCGS 54, NGC 57, CAC 22. A different LM 13 was the last PCGS/CAC example to sell, realizing \$4,113 in December 2014 and the current PCGS Price Guide value is listed at \$4,500. VERY RARE any finer, with just about a dozen currently graded finer, including duplicate on. This is a great looking GEM worthy of a strong bid.

PCGS# 4279 | ESTIMATE: \$3,600+

## LOT 8

### H10C 1833 PCGS MS66

LM 4.1. What a visually impressive, ultra attractive PQ GEM Capped Bust half dime. Both sides of this beautiful little jewel are framed in a rich blue, violet, and rose patina that yields to a brilliant silver center. Shades of teal and gold mingle with the dominant toning, adding the outstanding visual allure. The surfaces border on a SUPERB grade. Certainly that is what the eye appeal is.

PCGS 20, NGC 20. Selling for \$4,113 in June 2014, this exceptional half dime is again worthy of a very strong bid. The current Collector's Universe value is listed at \$4,500 and this date is indeed quite rare any finer. A beautiful example for a type or date set.

PCGS# 4280 | ESTIMATE: \$3,600+

## LOT 9

### H10C 1834 3 OVER INVERTED 3. PCGS MS66 CAC

We love these when we can find them fully Proof like this piece. The quality is HIGH END!

Full deep mirrors beam boldly from all over. You do NOT have to imagine the mirrors exist. The mirrors have good clarity and are super clean (we used a strong glass to check this coin out). You can actually see some light contrast. There is a subtle layer of pale golden brown toning which is spread all over. The color does not hold back the intense flash of the mirrors in any way. Miss Liberty and the

details are fully struck and have a creamy white frost. The eye appeal is totally gonzo here!

PCGS 2, NGC 0, CAC 2. This piece last sold in August 2016 for \$5,640. No others have sold in auction since. With quality and eye appeal like this, we fully expect this coin to pop right past that number even in pre-bidding. The current Collector's Universe value is \$8,750. This coin will be a terrific addition to any GEM BUST Half Dime collection. Good Luck!

## LOT 10

### 10C 1798 LARGE 8. PCGS MS62 CAC

JR-4. What can be said about this high end and essentially CHOICE Uncirculated Draped Bust dime? Its CAC-endorsement, the only MS62 to receive such an honor, clearly speaks to the amazing, high end quality of this impressive early dime.

A vivacious luster glows with a satiny brilliance on both sides. Soft iridescent blue, dove, and olive-gold toning caresses the smooth, problem-free surfaces of the obverse, while the reverse is draped in a violet, rose, and teal blend of color that really pops in the light. Struck after the obverse die broke, with a long die crack that starts at the rim to the left of Y and crosses the field to the top of Liberty's nose. A few tiny ticks can be seen on either side, which are totally unobtrusive to the visual allure of this Premium Quality MS62--this is NOT an AU coin housed in an Mint State holder.

At the time this beauty was struck, the mint was a fledgling federal agency, and they tried to save costs in every way possible. Since the quarter eagle and the dime were essentially the same diameter, the reverses for both denominations sometimes shared dies. Research by John Dannreuther has revealed that 480 quarter eagles were struck using this reverse die, listed on Warrant 149, which was delivered in December 1799. After that, the reverse was used to strike the JR-4 1798 dimes and then 1800, R1 dimes.

PCGS 4, NGC 1, CAC 1. This is the Gardner duplicate coin, sold in October 2015 for \$28,200, and is the ONLY PCGS MS62 to ever sell in auction. Keep in mind that the main line Gardner coin, which was PCGS MS63 Gold CAC sold for \$70,500 in June 2014, and the Ed Price-Pogue coin sold for \$82,250 in May 2015 (PCGS MS64). This high end coin has a great look and great pedigree. It will look great in your set too! The opportunity to acquire Mint State early dimes are just as rare as the coins themselves. Do not let this opportunity pass you by!

## LOT 11

### 10C 1814 LARGE DATE, JR-2, PCGS MS62

A strictly Uncirculated example with distinct claims to the CHOICE category. Soft, satiny gray color with pale gold and olive accents. The central devices are sharply struck, and the stars on the right side are just a little flat in the centers. Probably dipped long ago, the surfaces have slowly retoned nicely. No serious marks or ticks can be found on either side. The eye appeal is decent. The 1814 is a lower mintage issue, only 421,500 were struck, and the mintages were intermittent, 1809, 1811, 1814, then none until 1820. Demand for the denomination in circulation resulted in very few surviving in Mint State. This is a scarcer R-3 variety.

PCGS 20, NGC 12. There has not been a PCGS graded MS62 ever sold in auction. This example will delight any Capped Bust dime collector and should see strong bidding from anyone needing a Mint State example of the JR-2 variety.

PCGS# 4488 | ESTIMATE: \$3,000+

## LOT 12

### 10C 1827 PCGS MS64 CAC

This is a very pleasing, totally original JR-12. As an R-1 variety, it is the PERFECT fit for type coin purposes. Both obverse and reverse have a blush of warm, earthen hues of olive, pewter, and russet tan. A satiny lustrous sheen enhances the delicate hues throughout. Sharp struck devices show strong definition; even most of the star centers are well separated, and the central devices are crisp. A delightful near-GEM that is a great coin for any early silver coinage collector.

PCGS 59, NGC 44, CAC 15. The last two auction appearances were for the same coin, realizing \$4,583 in its most recent appearance in our September 2018 Regency Auction. The current Collector's Universe value is listed at \$4,850. Anyone looking for a high end Capped Bust dime, not wishing to spend five figures, should take a good look at this handsome near-GEM and bid accordingly.

## LOT 13

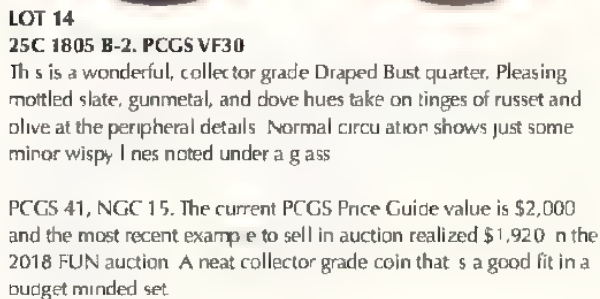

### 10C 1830/29 JR-5, FS-301, PCGS MS65

Clearly one of the FINEST graded examples of this overdate Capped Bust dime. While fairly common overall, it is extremely rare in MS65 or higher grades. Indeed, PCGS and NGC have graded at most seven examples in MS65 or finer grades. This GEM is totally original with wonderful old time, attractive toning. Coppery-gold and lilac-pewter blends with blue and yellow-gold. As the coin is rotated in a light, the brilliant, satiny underlying luster blooms from below the color, enlivening the variegated hues. The strike is bold throughout with just some minor softness as nearly always seen on the eagle's feathers. The surfaces are clean and free of any distractions of any kind or size that have any effect on the outstanding eye appeal. In 1830, the mint pressed into use an unused 1829 obverse die and repunched the last two digits with a 30. The underlying digits are faint, especially on later die state pieces like this one.

PCGS 1, NGC 2. Only one MS65 has ever sold in auction, this one, selling for \$19,388 in the 2016 ANA auction. Just 3 coins are listed as having been graded finer at PCGS, including 2 MS67's (and we believe the PCGS MS66 that sold in 2005 is one of them). In MS65, the PCGS Price Guide lists a value of \$25,000 and this coin presents a very rare opportunity for any advanced Capped Bust dime collector, one that should not be ignored! We can see this one taking off when bidding commences.

PCGS# 4519 | ESTIMATE: \$16,000+

## 25C 1805 B-2. PCGS VF30

PCGS 41, NGC 15. The current PCGS Price Guide value is \$2,000 and the most recent example to sell in auction realized \$1,920 in the 2018 FUN auction. A neat collector grade coin that is a good fit in a budget minded set.

## LOT 15

### 25C 1819 LARGE 9, PCGS MS65

Tied for FINEST KNOWN 1819 Large 9 with the Capp-Eliasberg-Pogue-Link B-1 at the MS65 level at PCGS. This impressive GEM has no less an impressive provenance, being the Randall-Garrett Gardner coin.

In its first recorded auction appearance in the March 1980 sale of the Garrett Collection, where it appears as lot 632, it was cataloged as:

"MS65. Extremely sharply struck. A truly fantastic early quarter. The obverse and reverse are toned a pleasing light gray and lilac color with hints of blue and green iridescence. We have never seen a finer example and doubt if one exists."

This nearly 40 year old description holds up today, though it does fail to mention the satiny underlying brilliance of the luster on the obverse. Struck from a later state of the B-2 dies, all the Die State B die cracks as described in Early Quarters of the United States Mint. The eye appeal is unbelievable and has a provenance that dates back into the 1800s!

PCGS 2, NGC 0. As an indication of how impressive the quality of this GEM really is, in 1980, this coin brought \$37,500 (at the height of the silver boom market). The Eliasberg-Pogue coin is the most recent example to sell in auction, realizing \$88,125 in May 2015. The current Collector's Universe value is listed at \$42,500 and with the Pogue coin now impounded in the Link Collection, this is the FINEST Large 9 that will be available for collectors for a long time to come. If you are working on an early quarter set, you need to see this historic offering. Good Luck!

## LOT 16

### 25C 1820 LARGE 0. PCGS MS65+ CAC

With both the Rea, et al and Tompkins Condition Censuses topping out at MS65, this MS65+ is one of the FINEST KNOWN B-2. Boasting a rich patina over a bold, satiny luster, this GEM Brilliant Uncirculated 1820 Capped Bust quarter has a unique and very familiar look, though its known pedigree only goes back to 2012.

Rich coppery gold and slate-gray toning fills the protected areas of the sharply struck up devices, while the fields are softly toned over brilliant silver. Intense scrutiny fails to reveal any contact of any kind, on either side. The classic, old time collection look is beautiful and indeed very familiar, inviting the numismatic researcher to attempt to trace this coin's pedigree further back.

PCGS 3, NGC 2, CAC 3. There are 2 in 65+, and this is the only one to sell in auction realizing \$54,050 in the May 2015 sale of the Gene Gardner Collection. There are four coins graded finer at PCGS, including the Lawrence R. Stack D. Brent Pogue MS66 that sold for nearly \$100,000 in May 2015. This highly attractive GEM is worthy of the FINEST of early quarter or type sets, and will see fierce bidding competition to bring it home! Expect bidding to exceed the current Collector's Universe value of \$55,000.

PCGS# 5329 | ESTIMATE: \$48,000+

## LOT 17

**25C 1837 PCGS MS65 CAC**

This is a marvelous GEM B-1, which ranks at or near the apex of both the Rea, et al and Tompkins Condition Censuses. Considered to be one of the scarcer of the six die marriages, considered to be R-4 in "Early Quarter Dollars" and R-3 in "Early United States Quarters."

Both sides are richly toned with wonderfully original shades of blue that range from pale sky blue to a robust royal cobalt, tinges of teal, golden orange, and emerald green dance in the light. The

bold, underlying luster glitters with a smooth radiant sheen that amplifies the wonderful toning. A few of the star centers are weakly struck, otherwise, the devices show a razor sharp definition that is quite impressive. This coin was struck from the earlier state of the cracked dies, with a thin crack from the lower obverse from star 2, that curves to the tip of the bust and connects stars 12 and 13. The reverse has a crack from D through STATE, beginning and ending in the dentils. The eye appeal is outstanding! A classic, high end GEM!

PCGS 13, NGC 13, CAC 6. The most recent example to sell in auction was an OGH PCGS MS65 CAC that brought \$30,550 in March 2016. This GEM is ex Eugene Gardner Collection October 2015 and is an old friend, as it was purchased from our sister firm in January 2010. Today, the PCGS Price Guide value is listed at \$29,500. The date is VERY RARE any finer, with fewer than 10 graded.

## LOT 18

### 50C 1803 LARGE 3. PCGS AU50 CAC

An impressively pedigreed and Condition Census level O-102a. Ample mint luster glows with a strong, satiny vibrance in the fields, accenting the sharply struck devices. Old collector envelope toning graces both sides, showing off a wonderful rose, gold, pale blue, and slate patina. A few scattered ticks are noted, as are some mint made roller lines (parallel lines created when the silver ingot was rolled out to produce planchets). These are all toned over and do not detract from the quality. The eye appeal is bold.

Ex. Westmoreland County Collection, 2008 FUN auction, lot 1349, earlier, ex David Queller Collection. Stack's, October 2002 lot 29, Lindesmith & LaRiviere Collections, Bowers & Merena, November 1999, lot 2038

PCGS 21, NGC 2, CAC 3. This coin sold for \$5,750 back in January 2008; NO CAC approved examples have ever sold in auction! The current PCGS Price Guide value is listed at \$4,500, but make no mistake, this is a very important opportunity for the Draped Bust dollar specialist and will see intense bidding from collectors; worthy of a strong bid!

PCGS# 6066 | ESTIMATE: \$4,500+

## LOT 19

### 50C 1805 O-112. PCGS AU53

Ex Summers Collection.

A very eye appealing, originally toned, and condition census level O-112. A soft underlying luster blooms under the slate and battleship gray coloration that blends with pale gold in the protected areas of the devices. Just some light friction is seen in the fields and highest points. A few tiny ticks from circulation are unobtrusive and have no effect on the outstanding eye appeal. The reverse die has an extensive crack at STATES, but it has not broken to the point of a cud.

PCGS 11, NGC 10. The last AU53 O-112 to sell was in July 2014 for \$4,113. More recently a different variety in AU53 sold for \$4,700 in the 2015 FUN auction. The current PCGS Price Guide value is listed at \$6,500. This date is RARE any finer, with AU55s currently valued close to \$10,000! A high end coin like this will delight any early half dollar collector.

## LOT 20

### 50C 1806/5 O-103. PCGS AU58 CAC

This is a handsome, original, high end AU that is boldly lustrous, under the dappled melange of olive, gold, sea-green, and rich tangerine shades that accent the strong, surviving brilliance. Typical of 1806 half dollars, there are areas that are crisp in strike, while others show softness. The eye appeal is wonderful all that separates this coin from a Mint State holder is the faintest touch of circulation, so minor it is only seen with a glass.

PCGS 10, NGC 6, CAC 6. This CHOICE AU58 sold in July 2014 for \$10,281 since that time, five years ago, just a single example sold the Gardner Collection coin, which was darker. The current Collectors Universe value is listed at \$10,500. Rare in Mint State, this high end example will see stiff bidding competition.

Extensive die cracks are seen on the reverse of this nearly Mint State example. Nearly full mint luster shimmers on both sides, accenting a soft golden hue. The central strikes are bold, with only a little peripheral weakness on the reverse. While some light friction and contact account for the assigned grade, this handsome example has a pleasing visual allure.

PCGS 101, NGC 55. The last PCGS AU58 sold for \$2,640 in April 2019 and the current PCGS Price Guide value is listed at \$2,850. A coin like this will attract strong bidding from anyone building a "58 Set" of Capped Bust halves.

**50C 1811 SMALL B. O-105. PCGS MS61**

Ex Link Collection, as noted on the holder.

A sultry, satiny lustrous silver sheen is accented by a warm golden-pewter hue caresses the well struck surfaces of this Mint State Capped Bust half. Struck from heavily clashed dies, the majority of what you see in the fields are clash marks (though we note a few light lines and a tick in the left obverse field for accuracy and a darker spot in the eagle's talon is also seen). What look like obverse ticks on the rim are actually the edge letters peaking over the edge, as the punchet was not fully centered in the casting machine when they were applied. The eye appeal is bold for sure.

PCGS 11, NGC 10. The most recent example sold for \$2,530 in August 2018 and the current Collector's Universe value is listed at \$3,700. What a great opportunity to buy an early date Capped Bust half dollar in Mint State for a very reasonable level. We can see strong demand for a collector coin like this!

**PCGS# 6097 | ESTIMATE: \$2,000+**

## LOT 22

**50C 1811 SMALL B. O-111. PCGS AU58**

Ex. Donald Frederick Collection, as noted on the holder. As "collectors of collectors" know, among Capped Bust halves, Don Frederick was one of the giants of his day. His famous collection was dispersed in 2010, and most coins are impounded in collections. This one is an early die state with no die cracks or clashes that are typically seen for the variety. A warm, underlying mint glow radiates on both sides. Essentially Uncirculated, there is the barest trace of friction on either side. Impressive dove and gold accents add to the bold look.

This coin also possesses an interesting edge lettering error, "E-49" which reads CENTS OR HALF A DOG LIFATRY, where COLLAR and FIFTY overlap. Ex Steve Ivy's April 1978 auction, lot 692.

PCGS 97, NGC 30. What a great provenance, and worthy of a strong bid, which should bring it over the current Collector's Universe value of \$2,700. A wonderful "GEM" AU for collectors of this very popular series, in a very popular grade.

There are some light contact marks, normal for a coin with this kind of wear, but they do not detract from the eye appeal.

PCGS 134, NGC 46. This coin sold in April 2010 for \$863 and the current Collector's Universe value is listed at \$1,100. For Capped Bust collectors, the Don Frederick pedigree is one of the more famous sold in recent years. Add this beauty to your date or variety set.

Sharply struck devices on the reverse stand out on this "a" model. Multiple die clashes are noted on the late obverse die state that also shows all the stars drawn out to the rim. The reverse is interesting as all the milling is complete with full dentils, of which usually only a trace is seen for this die variety. Mostly original silver dusted with gold or lilac iridescent hues show an arch of deeper color at the obverse periphery. The eye appeal is outstanding, with just a couple of old scratches hidden under the toning.

PCGS 94, NGC 58. Since AU58 is one of the most popular grades for collectors of this series, this coin should see spirited bidding. The current PCGS Price Guide value is listed at \$2,750. Whether you collect by type, date, or variety, this coin has a lot to offer.

Both obverse and reverse of this R-3 date marriage show just the faintest touch of friction that keeps it from a Mint State grade and placement in the condition census. Totally original, this coin was lovingly cared for in an old paper envelope. There are a few faint marks that we note, toned over long ago, which are visible with a glass and we note for accuracy. Sharply struck, the warm, glowing, underlying luster accents the rich slate/battleship/pewter toning, imparting a pleasing eye appeal.

PCGS 75, NGC 44, CAC 19. The most recent PCGS/CAC example realized \$2,585 in July 2016. Worthy of a bid in excess of the current PCGS Price Guide value of \$1,900. A good coin for any Bust Half Nut!

A very pleasing, totally original AU58 with a very handsome eye appeal. Light friction can be seen on both sides, which is a lot that keeps this satiny and warmly toned 1819 half from a Mint State grade. The later die state is easily identified by the network of peripheral die cracks on the reverse. All of this is made all the more visually alluring by a frosty underlying luster.

PCGS 75, NGC 44, CAC 19. The most recent PCGS/CAC example sold for \$2,585 in July 2017. Worthy of a very strong bid from the specialist, this variety is considered R-3, and this AU58 falls just below the condition census. Worthy of a great variety collection!

Brilliant silver-white luster gleams all over on this sharply struck, condition census level O-120a. The die marriage is easily identified by the row of die defect lines to the left of the date. The reverse must have cracked early on, as the earlier die state O-120 is RARE, while the later state with a die crack above UNITED STATES is more common (R-3). The central portions of the design are well struck with needle sharp definition while the star centers were not fully rendered by the screw press. A few minute ticks and lines can be seen with a glass, and are all that keep this brilliant, untoned coin from a GEM designation.

Demand for half dollars in 1827 must have been huge, as nearly 5.5 million were struck. The mint, still using manual production methods of a screw press and hand punching dies, needed 28 obverse and 34 reverse dies to complete their work, resulting in 49 different die combinations or marriages for the date. The O-136 offered here is a VERY SCARCE die variety, rated R-4, and the MS63 grade is solidly in the lower end of the Condition Census. Satiny lustrous surfaces show off an excellent glow. Mostly a frosty silver with a light golden overtone with pale iridescent accents give this lovely CHOICE Mint State Capped Bust half dollar a wonderful look.

PCGS 144, NGC 74. The last time a PCGS MS63 example of this die variety appeared in auction was in a June 2006 Mail Bid auction. That coin was from the DeOlden Collection and was the rarer "prime" die state.

What a Mint State Capped Bust half should look like. Lustrous, with a pleasing dusting of iridescent clear gold, and minimal marks. The strike is typical with some minor weakness in the central design elements and elsewhere, but the eye appeal is bold. The O-115a is a scarce, R-4 die state. Possibly from an old bank holding, this cataloger has heard old stories of Midwestern banks still holding large quantities of these in vaults as specie, before being sold in the 1950s.

**50C 1836 LETTERED EDGE. O-101A PCGS MS64**  
 Ex Link.

A condition census level example of the die marriage, struck during the final year of the lettered edge type. Towards the end of the year, the mint finally installed a steam press that would strike half dollars, allowing for a closed collar to impart reeding on the edge, eliminating a step in the minting process, and creating a new type. The half dollars of 1836 make a neat transitional pair.

Bold rolling cartwheel luster blooms with a robust brilliance on both obverse and reverse. Save for some minor weakness in the central portions of the design, the kneass modified portrait has bold, crisp definition throughout. The surfaces are a billowing silver with a bold satin sheen that offers just the slightest blush of clear gold. There are a few tiny ticks, all of which are accounted for in PCGS's assessment of the grade and none detract from the outstanding eye appeal.

PCGS 62, NGC 84. The current PCGS Price Guide value is \$3,900 and this is the one that sold in the 2014 Central States auction for \$3,819. Worthy of a very strong bid again, as it is quite pleasing, high end, and is from the greatest collection of Capped Bust halves ever.

**LOT 39**  
**50C 1837 GR-7. PCGS MS63**  
 Tied for the FINEST GR-7 graded by PCGS, this CHOICE Brilliant Uncirculated half dollar is a real delight to behold! The obverse is a swirling, blazing ball of luster, while a gentle coating of pale olive gold color slightly subdues the rolling bands of cartwheel luster on the reverse. This is a popular variety where the die sinker used an inverted G in place of the C in AMERICA. The surfaces are smooth and clean, free of all but a single minor contact mark or two worthy of mention, neither of which are inappropriate for the assigned MS63 grade, nor do they affect the excellent overall eye appeal.

PCGS 121, NGC 102. This is for the date, not the AMERICA variety. A non-attributed MS64 sold in June 2018 and realized \$7,800. We love the look of this one and it should delight any advanced collector of the short-lived Reeded Edge series, issued just for 4 years, 1836-1839.

##### FUGIO 1787 4 CINQ, 8-POINTED STARS. PCGS AU50

This is a very pleasing Newman 15-Y, W-6915, which is rated R-2. This variety is the only one that has an 8-pointed star on the reverse. Hard chocolate brown surfaces are solid, free of any issues that often plague the series such as corrosion and environmental damage. The devices are sharply struck and the surfaces have just a touch of wear and are nice and glossy. While common, this is a high grade example of the variety. In the PCGS CoinFacts census, it is tied for fourth finest graded. The Fugio coppers are a very popular series among the colonial and pre-federal coinages. Struck by James Jarvis, under contract with the Congress, the entire enterprise became a huge boondoggle, and set back a national coinage until the April 2, 1792 Act of Congress that established a mint and the federal coinage system.

PCGS 12, NGC 1. Only five examples have been graded finer at PCGS. The current PCGS Price Guide value is listed at \$3,950 and this coin has been off the market for over six years. This charming coin is smoother, more even, and from a later date than the most recent one sold. None of the finer pieces at PCGS grade above AU55. A great coin for any colonial specialist or someone looking for a very attractive example for type.

##### 1/2C 1797 1 ABOVE 1. PCGS AU55 BN CAC

One of the most identifiable early half cent varieties, with the errant 1 punched well above its proper location. Deep brown-mahogany surfaces show some ebony accents, although the glossy luster generates enough life to the fields and devices to keep them from looking dark. Sharply struck from a rusted state of the dies, there are raised areas where the dies pitted before striking.

PCGS 3, NGC 3, CAC 2. This coin was sold in our July 2018 Regency Auction for \$13,513, but the collector that bought it has changed directions. The current Collector's Universe value is \$11,000. While somewhat common in lower grade, this variety is VERY RARE in this or finer grades.

PCGS# 1042 | ESTIMATE: \$12,000+

#### LOT 42

##### 1/2C 1805 NO STEMS. PCGS MS63 BN CAC

Walter Breen said it best in his Encyclopedia of Half Cents, when he wrote: "A most frustrating date. Of its four die combinations, two are rare and extremely difficult to locate above Fine condition; the other two are common enough in low grades, but rare in full mint state." The B-1, C-1 die marriage is of the latter category, and is the only one that has the stemless reverse.

Nice hard copper surfaces, no evidence of any environmental damage or planchet roughness that often plagues early copper like this. The obverse is an even, warm chocolate brown color with a satin mint frost that comes to life in a light. The reverse has a steely, icy silver/gray/blue overtone on the richly lustrous surfaces. A stray tick or two are seen on both sides using a strong glass, but they do not impact the outstanding original eye appeal.

PCGS 8, NGC 3, CAC 1. No CAC-approved MS63 has ever sold in auction. This eye appealing CHOICE Mint State coin is very high end for the grade, more attractive than the two most recent non-CAC coins that have sold, and this one should bring a strong price. The current PCGS Price Guide value is listed at \$5,500. With such a low population, we know this coin will be the target of anyone working on a wonderful Mint State set.

##### 1/2C 1831 RESTRIKE. REV OF 1836. PCGS PR66 BN CAC

B-2, the "first restrike" which is considered Low Rarity-6, with perhaps 20-30 known in all grades. This REMARKABLE GEM is one of the FINEST known examples and it has an amazing look.

The 1831 half cent is a MAJOR rarity! Of the business strikes, perhaps 20-30 examples are known in all grades. Original Proofs also exist, about 20 known. Two series of restrikes were produced for collectors using the 1831 die, one matched with an 1836 reverse and one matched with an 1840 reverse. All of these are VERY RARE today, and avidly sought by collectors.

Rich beaming, chocolate brown mirrored fields are solid and hard. The fields have the epitome of early copper Proof flash, are icy sleek and essentially flawless. A soft teal-blue overtone with traces of original red copper cling to the protected areas, further enhancing the outstanding SUPERB eye appeal. Every detail is razor sharp in definition on both sides, the reverse has a broad, bisecting die break, characteristic of the first restrikes.

Approximately 30 were originally minted. PCGS 2, NGC 2, CAC 2.

The other coin is ex Missouri Cabinet, that was resold in the 2016 ANA auction for \$25,850, which realized \$28,750 in the original Missouri Cabinet sale. This coin has previously sold in the 2014 ANA auction for \$30,550. The current Collector's Universe value is listed at \$35,000. Note, we sold the Showers-DuPont-Missouri Collection coin PCGS PR65 BN CAC for \$28,200 in our September 2015 Regency Auction. This is an exceptionally RARE Proof half cent and worthy of the FINEST collection of early copper Proofs.

##### **11C 1797 REVERSE OF 1797, STEMS. PCGS MS65 BN CAC**

An exciting, original GEM from the famed Nichols Hoard. One of the finest certified examples, it is one of the top dozen graded at PCGS in the BN designation. It boggles our minds how this coin has survived so pristine over 221 years!

Glossy luster graces both sides of this GEM. The surfaces are smooth and free of any distractions in the fields. The surfaces show off a delicate iridescent sheen that can be seen when rotated in a light, giving the presently offered coin a great look. The colors and high end surfaces contrast nicely against the sharply struck design elements. Ms. Liberty's hair curls and drapery are fully defined on the obverse, and the wreath is boldly defined on the reverse. Much original red luster clings to the recesses of the dentils on both sides. The eye appeal is spectacular, as should be expected for a PCGS/CAC MS65

PCGS 10, NGC 1, CAC 4. This coin has been off the market for nearly a decade. The current PCGS price is \$31,500 and the most recent PCGS MS65 BN to sell in a major sale was NOT CAC, realizing \$28,800 in November 2017. With its bold eye appeal and high end condition, it will entice strong bidding from specialists. No doubt there will be lots of action on this GEM!

##### 11C 1820/19 PCGS MS64+ RB CAC

A lovely, original-bordered GEM example of this popular Matron Head cent. A bold, radiant cartwheeluster blooms all over in the fields. The surfaces are a reddish "clay-soil" hue with earthen tan-brown, and olive-golden patina on both sides. The strike shows some minor softness of the finest details in the hair lines and leaf details. Some "cabinet friction" can be seen on the cheek; that and the coloration suggest long-term storage in an old collector's envelope. The eye appeal is very pretty and the technical quality is all there.

PCGS 3, NGC 0, CAC 2. This is the only MS64+ RB graded, and there are just 2 MS65 RBs and a 66 RB graded finer. There has never been an MS64 RB sold in auction, a PCGS MS65 RB CAC sold for \$10,575 in June 2017 and the July 2015 Twin Leaf Collection auction had two MS64 BN CAC coins, one that sold for \$9,400 and the other for \$4,700. In MS64 RB the current Collectors Universe value is listed at \$6,000 and is unpriced any higher. A great coin for the EAC collector, or type collector. Worthy of a strong bid! Good Luck!

Ex. Naftzger Collection.

If you know us, then you know what our all-time favorite pedigree is Naftzger! Of course this coin lives up to the expectations of the name!

Overall, for an 1853 large cent this coin has exceptional surfaces. There is a small planchet issue hidden in the right obverse field. A strong luster beams from all over. The color is a slightly faded GEM original mint red. There is a slight touch of toning (no, this coin is NOT changing color). Miss Liberty and the

details are sharply struck—although there is some slight weakness in the stars. Overall, this is a great coin with a great eye appeal!

PCGS 73, NGC 40, CAC 9. A GEM Mint State red Large Cent PCGS CAC is nearly IMPOSSIBLE to find. Most of Naftzger's GEMs went into the back hole of collections, we almost never see them coming to market, unless there is a big collection.

The end of an era. From 1793 until 1857, the large sized cent was the mainstay of American commerce. The rising cost of copper led to the mint changing the size and composition of the denomination. In 1856, the first small cents were struck, and the last of the large sized cents fell from the dies in 1857.

A well struck and nicely preserved chocolate brown GEM example of the last large cent date. Traces of original red cling to the protected areas of the devices and the surfaces are free of any distracting ticks or spots. The eye appeal is very high end for a BN.

PCGS 13, NGC 12, CAC 13. The most recent example sold for \$2,640 in March 2019 and the current PCGS value is \$2,500. NONE are finer in the BN category, and the value jumps dramatically in RB.

#### 1C 1913-S PCCS MS66 RD

Legend Auctions is proud to offer one of the FINEST 13-S cents graded by either PCCS or NGC. Boldly lustrous RED surfaces blaze a fiery glow throughout the fields of this exceptional GEM. The devices are sharply struck and offer a crisp definition on both sides. The surfaces are generally free of any distracting marks, there is just a minor trace of contact that we note on the reverse. Rose, gold, and salmon accents are lightly toned over the brilliant red color giving this beautiful early Lincoln Condition Rarity a great look.

PCCS 4, NGC 0. The last one to sell realized \$24,000 in the 2019 FUN auction, and examples have sold for as much as \$63,250 in the past. The current PCCS Price Guide value is listed at \$28,500 and this one could surpass that level when the hammer finally falls. Lincoln cents are always a popular series, especially so in the highly competitive Set Registry, and if you are building a top ranking set, you cannot afford to overlook this one. Good Luck!

PCCS# 2467 | ESTIMATE: \$22,000+

#### LOT 70

##### 1C 1919-D PCGS MS66+ RD CAC

Simply magnificent, essentially fresh from the mint quality. Blazing mint luster is a brilliant, fire engine red color that really dazzles the eye.

The sharply struck devices stand out boldly against the satiny smooth surfaces that are totally free of anything but the most minute tick or toning dot seen with a strong glass.

Clearly this coin sat undisturbed in an original bank roll and was carefully preserved for posterity, making it one of the eight **FINEST** graded at either PCGS or NGC.

PCGS 19, NGC 0, CAC 3. There are six graded MS66+ RD at PCGS, and only a single non-CAC example has ever sold, realizing \$14,100 in the 2016 FUN auction. Today's Collector's Universe value is listed at \$13,000. Just two coins are graded finer, and keep in mind that one, a non-CAC 67 RD just sold in the 2019 FUN auction for \$31,200! This essentially **SUPERB GEM** has a bold look, stunning eye appeal, and excellent quality that will delight anyone building a really high end set.

PCGS# 2518 | ESTIMATE: \$10,000+

#### LOT 71

##### 1C 1922-D PCGS MS65 RD CAC

The only mint to produce cents in 1922 was Denver, to the tune of 7.16 million pieces. This date is scarce in Mint State, especially in fully RED color. The present GEM is flaming red with bold, blazing luster and a bold strike for the date. The eye appeal is excellent.

PCGS 105, NGC 24, CAC 8. It is hard to believe that no CAC approved MS65 RD has ever sold in auction and this coin with its well above average eye appeal should bring a very strong bid. **RARE** in 65+ and extremely so any finer than that, a 66 RD is a \$12,000+ coin with CAC approval!

#### LOT 72

##### 1C 1948-S PCGS MS67+ RD CAC

**TIED FOR FINEST GRADED** at either PCGS or NGC and clearly a contender for a top ranking Lincoln cent Registry Set!

This frosty **SUPERB GEM** has an amazing blazing and fiery RED luster that captivates the viewer. Well struck and flawless to the naked eye it would truly be hard to imagine a finer piece! (We do note a tiny spot hidden in a wheat ear on the reverse visible only under a strong glass).

PCGS 312, NGC 596, CAC 43. PCGS has graded 28 in MS67+ RD with **NONE** finer. While the current Collector's Universe value is listed at \$1050, but a coin of this quality really is worth more than that! This **SUPERB GEM** is worthy of the finest of sets!

**LOT 73**  
**1C 1955 DOUBLED DIE. PCCS**  
**MS64 RD CAC**

Rich, brick red surfaces are enlivened by a bold mint luster on both sides. The eye appeal is very high end. The famed doubled die feature is extremely bold and the details are crisply struck. Were it not for a few minor contact marks, this red beauty would be a GEM.

PCGS 164, NGC 41, CAC 32. The most recent example to sell in auction realized \$20,400 in December 2017. The current PCCS Price Guide lists a value of \$12,500.

RARE any finer--this is a very important coin for the Lincoln cent collector. Good Luck!

**PCGS# 2827 | ESTIMATE: \$11,000+**

**LOT 74**  
**1C 1958 PCCS MS67+ RD**

Tied for the FINEST graded at PCCS and a real stunner for the top tier Registry Set collector. Bold mint brilliance swirls all over highlighting the sharply struck devices and impressive fire engine red surfaces, which are suffused with orange and magenta accents that really pop when rotated in the light. The eye appeal is AMAZING, and we are not sure why CAC did not bean this one!

PCGS 2, NGC 0. Neither has ever sold in auction and Collector's Universe lists a value of \$7,000. We anticipate strong bidding from any collector vying for the #1 PCCS Set of Lincoln cents. Good luck!

**PCGS# 2848 | ESTIMATE: \$6,000+**

**LOT 75**  
**1C 1972 DOUBLED DIE OBERSE. PCCS MS67 RD CAC**

One of the most popular varieties of the series, the presently offered 72 Doubled Die ranks among the FINEST graded. Deeply lustrous, brilliant fiery red surfaces are set fully aglow on both sides. The surfaces are essentially flawless and the wonderful color sets this sharply struck SUPERB GEM apart from all others. The doubling is clearly visible to the naked eye and the eye appeal is spectacular.

PCGS 70, NGC 17, CAC 8. There are just three graded finer, 2 in 67+ RD and 1 in 68 RD. The last PCCS/CAC coin sold in April 2017 and realized \$3,760. Prior to that, only two have sold, one in the 2017 FUN auction for \$5,640 and the other in the 2013 FUN auction for \$10,575. The current Collector's Universe value in 67 RD is \$3,250, but jumps to \$12,000 in 67+ RD. Bound for a great set of Lincoln cents, this lovely coin is very high end worthy of a very strong bid.

**PCGS# 2950 | ESTIMATE: \$3,200+**

#### LOT 76

##### 1C 1983 DOUBLED DIE REVERSE. PCGS MS67 RD CAC

One of the more modern varieties that has made it into the mainstream of collection, the 83 DDO cent is rather rare in such a high grade. Brilliant RED luster beams from all over on both sides. All the lettering on the reverse is clearly doubled, visible with the naked eye. Bound for an amazing set of Lincoln cent varieties.

PCGS 63, NGC 118, CAC 17. Only three CAC-approved examples have sold in auction, one for \$1,440 and the other \$1,763 (both in 2017). This one sold for \$1,234 in our May 2018 Regency Auction. The current Collector's Universe value is listed at \$1,600. A scarce modern coin that is bested by only a dozen coins finer.

##### 1C 1913 PCGS PR66 RD CAC

A superb looking, Premium Quality GEM! Bold matte surfaces border on sheer perfection with an intense red, satiny luster. Both sides awash in original GEM MINT RED color. The reverse does have a light hint of some toning—it is not facing, it probably sat on a table for a very short time. Lincoln and every detail are pinpoint sharp in strike. The eye appeal is phenomenal!

PCGS 41, NGC 8, CAC 15. The most recent example to sell was in our March 2019 Regency Auction which realized \$3,290, but that one did not have the vibrance that this one does. Prior to that, the most recent example to sell in auction realized \$3,600 in the 2018 ANA auction. The current Collector's Universe value is listed at \$3,000, but this one should bring in excess of that amount! Good luck!

PCGS# 3317 | ESTIMATE: \$2,800+

#### LOT 78

##### 1C 1915 PCGS PR66+ BN CAC

This is a gorgeous Matte Proof 1915 cent. Stunning, original color graces both sides, especially the reverse that possesses crimson, violet, and gold patina. The warm satiny glow of the obverse is exceptional. The surfaces are wonderfully preserved, with the sandblast texture of the fields bold.

PCGS 30, NGC 12, CAC 19. There are only five coins graded PR66+ BN at PCGS and the only one to sell realized \$6,750 in a July 2017 internet only auction. The current PCGS Price Guide value is listed at \$5,000 and we think this one will bring close to that amount. The last PCGS PR67 BN CAC to sell brought over \$10,000 in 2014! This is a great coin for anyone working on a very high end set of this very popular series. Good luck!

PCGS# 3321 | ESTIMATE: \$4,000+

##### 1C 1916 PCGS PR66 RB CAC

Wow! That is what we said when this high end Matte Proof cent came into the office. Since then we have marveled at the quality!

Mostly satiny mint RED color glows all over, especially on the reverse. The fields and devices show a delicate dusting of teal/azure iridescent toning, while the surfaces have mellowed lightly, thus the RB designation assigned. The design elements are razor sharp in definition and the surfaces are devoid of anything other than a couple of hidden flecks. The eye appeal is stunning!

Only 600 were minted. PCGS 27, NGC 12, CAC 14. The most recent example realized \$6,600 in February 2019, but we sold one in September 2018 for \$8,813. The current PCGS Price Guide value is listed at \$9,000. RARE any finer, a 66+ RB sold in the 2014 for \$30,550! This PQ GEM is worthy of a great set of Matte Proof Lincolns and will see fierce bidding!

Fresh and fiery mint red mirrors beam all over on this icy smooth flawless GEM. Nicely preserved and offering a strong eye appeal, this coin is bested by just a single PR67+ RD.

PCGS 66, NGC 33. The last one to sell in auction brought \$840 in the 2018 ANA auction, and prior to that, one sold in the 2018 Central States auction for \$1,080, with a current Collectors Universe value of \$1,250. BOUND for a nice collection indeed!

##### 2C 1869 PCGS MS65+ RD CAC

This is an unquestionable GEM, RED Mint State example and is VERY high end in quality!

Remarkable fields and devices reveal nothing more than a few scattered tiny toning dots; there are no flecks or PVC and the surfaces are super clean and smooth. There is no reason to question this coin's total originality. A bold glowing luster beams from all over. The original GEM Mint Red color sparkles boldly. Every detail is sharply struck and has light frost. The eye appeal is pretty neat too!

PCGS 36, NGC 19, CAC 6. There are four graded MS65+ RD and PCGS has graded only 5 higher. Do not be fooled by the pops at all. In GEM Mint State Red, these are extremely rare. Even our sister company, Legend Numismatics has NEVER owned a GEM example. This is NOT the one we sold in December 2017 for \$5,523. You'd figure being so rare it would be worth more today, but the current PCGS Price Guide lists a value of only \$4,500. If you are building a GEM Red set, this clearly is one of the very few opportunities you will have to buy this date. Good luck!

#### LOT 81

##### 2C 1864 LARGE MOTTO. PCGS MS65 BN CAC

FS-1901. Reverse die clash with the obverse die of an Indian Head cent

A very cool variety. During this era there were a number of mismatched die clash varieties, the most famous are the Flying Eagle cents clashed with Seated Liberty half dollars. There are two schools of thought regarding these odd varieties: the first is that mint employees intentionally installed the wrong dies, clashed them, then corrected them, each subsequent example with the resulting clash marks. The other is that it was unintentional. Either way, the result is the same, collectors are left with these really neat curiosities to collect. The clash on this GEM is a faint outline of the Indian's profile to the right of the 2 on the reverse. The die shows distinct rust, making us think these were done intentionally. The jury is still out. The coin itself is an even milk chocolate brown with a good strike.

For the DATE: PCGS 109, NGC 251, CAC 53. PCGS has graded just 3 of this variety so far, and none finer in the BN category. None have sold in auction, but is worthy of a premium bid for the advanced Civil War era collector. Good luck!

#### OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

##### **2C 1872 PCGS MS66 RD**

The 1872 is the undisputed KEY to the series, with a mintage of 65,000. Not only that, but the survival rate is awful! Today, in Mint State Red grades, PCGS has graded fewer than two dozen examples in all grades. The presently offered MS66 RD is tied for FINEST GRADED at either service and it is not just high grade, but is so very visually impressive.

Full red surfaces have a shimmering mint frost that glows in the essentially flawless surfaces. The devices are well struck and stand out vividly. The red has slightly mellowed, offering original soft coloration on both sides. The eye appeal is amazing!

PCGS 4, NGC 0. The last non-CAC MS66 sold in April 2016 for \$52,875 and the current PCGS Price Guide is listed at \$57,500. There are NONE FINER, making this a MUST HAVE coin for the advanced collector of this obsolete denomination. What a great way to cap off your set!

Intriguing teal, blue, and violet toning over intense, reflective mirrors. They are flashy, vivid, and offer a bold reflection in the fields giving the forcefully struck devices something wonderful to contrast. The design elements are razor sharp and the eye appeal is amazing.

PCGS 10, NGC 5. The current PCGS Price Guide value is listed at \$1,900 and the most recent sold for \$1,200 in March 2019. Worth a premium bid for its high end eye appeal.

This is a truly beautiful and totally original example of the final year of this short-lived series and is the very scarce Proof only issue. Solid, hard mirrors beam from all over with a bold, flashy reflection. Richly toned, with mint red dominating bold overtones of violet and medium chocolate brown that really come to life in the light. The eye appeal is very high end.

Only 600 were struck according to estimates. PCGS 117, NGC 61, CAC 43. The most recent example to sell brought \$3,878 in our May 2018 Regency Auction and the current PCGS value is listed at \$4,250. A coin like this is worthy of a premium bid.

An exceptional first year of type example! The surfaces on this fresh, exciting GEM are essentially pristine and have a smooth, satiny texture. A full, radiant luster shows off original, creamy white surfaces framed by a touch of the palest gold and pearly iridescence. The details are well struck, though you can see a few cash marks when viewed through a strong glass. The eye appeal is fantastic!

PCGS 24, NGC 11. The current PCGS Price Guide value is listed at \$5,000 and the most recent non-CAC coin sold back in the 2017 FUN auction for \$6,463. Worthy of a strong bid, this is one of the FINEST graded at either service and is perfect for a high grade set.

##### 3CS 1851-O PCGS MS66 CAC

Representing the ONLY branch mint trim, the 1851-O had a mintage of 720,000 and lucky for collectors, there are a number of Mint State examples that survive; however, in the lofty grade of MS66, there are very few that exist, and just four are graded MS66+ as the FINEST at PCGS.

This frosty lustrous GEM has an impressive originality to both sides with a pearly-silver, lavender, and gold that deepens to the upper obverse rims. Some minor striking weakness, typical of the date is noted, as is a small mark on the lower reverse. The eye appeal is very pleasing and original.

PCGS 31, NGC 13, CAC 21. This one sold for \$5,040 in February 2019, and prior to that, they were selling in the \$5,875-\$6,169 range. The current PCGS Price Guide value is listed at \$5,500. Note just four 66+ are graded finer, and carry an \$11,000 price tag. Worthy of a high ranking set and will sell for a strong price. Demand for this coin comes from 3CS collectors and specialists of New Orleans coinage, as this is the ONLY such date in the series.

##### 3CS 1858 PCGS MS67 CAC

What an incredible SUPERB GEM 1858 treasure! Tied for second finest graded at PCGS, everything about this coin screams quality, eye appeal, and originality.

The surfaces are pretty much perfect. Even using a strong glass will yield no problems. A moderate luster can be seen. Both sides are evenly covered by a deeper mix of evergreen/purple/golden brown/russet original colors. Every detail is fully struck. The eye appeal is very pleasing!

PCGS 11, NGC 14, CAC 5. There has not been a PCGS/CAC example sold since October 2014 when the Gardner coin sold for \$21,738. The current PCGS value is \$21,250. We cannot stress how very important an opportunity this is for the advanced collector of this series. Worthy of a premium bid!

##### 3CS 1860 PCGS MS65+ CAC

Having built the all-time FINEST EVER MS 3CS set, our sister company knows what coins come nice and what do not. They said good luck finding a better 1860 with color! PCGS showed no mercy on this ULTRA high-end GEM!

Virtually immaculate surfaces are smooth and sexy. There are two tiny Mint grease dots that probably are what is keeping this GEM from an MS66 designation. Unusual for an 1860, this coin has a strong and glowing luster. Both sides enjoy a gorgeous and totally original color mix of rose/aqua green/gold colors that swirl endlessly. Every detail is fully struck and stands out. The eye appeal of this GEM is jaw-dropping!

PCGS 30, NGC 19, CAC 11. PCGS has graded only 1 in MS65+. We can tell you, until last year, this coin had been away for a very long time. Finding original beautifully toned MS 3CS pieces is near impossible! How can you pass up a great coin like this at today's prices?

3CS 1868 PGG5 MS66 CAC

Well hello there! What do we have here? This is an amazing example of a "stopper" date in the series

Ridiculously clean and smooth surfaces do not disappoint, even if you are looking with a powerful glass. The mint luster and surface definitions are helped by proof like mirrors (no imagination needed). We think the only thing holding the coin from grading MS67 is a bit of deeper irregular toning on the obverse. Both sides are toned. The

obverse has a totally natural mix of deeper olive/gold/purple blue colors that are all over. The reverse has a dramatic mix of reddish gold/violet/blue/green original flaming colors. Every detail is sharply struck. The eye appeal is fabulous!

PCGS 5, NGC 2, CAC 6. The last PCGS CAC 1868 MS66 to sell brought \$30,550 back in June 2017. The current Collectors Universe Value is about where it should be: \$40,000. If you are building a top GEM set, this is the coin you want! Opportunity knocks loud here!

##### 3CS 1855 PCGS PR64 CAC

Any Proof coin struck prior to 1858 is a low mintage issue and the 1855 three-cent silver saw a mintage of approximately 50 pieces, with perhaps 35 surviving in all grades.

The presently offered example is totally original with rich lilac, teal, dove, and lavender toning that blankets the smooth, problem-free, mirrored fields. The reflection is moderately flashy through the rich toning, enhancing this near-GEM's bold visual allure. The devices are sharply struck up in the central

portions of both sides. Typical to the date, there is some striking weakness near the bottom of the numbers and in some of the stars on the reverse. We note a few areas of darker toning, and a tiny line or two that account for the assigned grade, but the eye appeal and technical quality stand out and are endorsed by the green CAC bean.

Only 50 are estimated to have been struck: PCGS 3, NGC 9, CAC 2. The last one to sell realized \$8,225 in October 2014—that was the similar-looking Clapp-Eliasberg-Gardner coin. Today the PCGS Price Guide lists a value of \$8,500 and this attractive coin should see a final price realized in that range. There has not been a PCGS PR65 sold since 2011, clearly these are very infrequently seen in auction, and this one fits the budget of most collectors who endeavor to build a set of Proof trimes.

##### 3CS 1861 PCGS PR64 CAM CAC

Totally original! Struck during the first year of the Civil War, this date is always popular among collectors, and this is a wonderful looking near GEM. Bold mirrors glisten from below a dusting of green-gold and pewter-hued patina, which is deeper at the right peripheries. Sharply struck and frosty devices stand out with enough contrast to earn the CAM designation and CAC approval.

PCGS 16, NGC 4, CAC 11. There is a wide range of APRs, the most recent selling for \$3,360 in April 2019, but prior to that, they were selling in the \$1,200-\$2,300 range; the current PCGS value takes all this into account and is listed at \$2,400. VERY RARE any finer, this coin is worthy of any neat collection of Civil War dated coinage. Good Luck!

**3CS 1862 PCGS PR64 CAC**

This tiny coin has a huge collector allure! First the quality and eye appeal are excellent. Then add to the fact that it is a lower mintage (550 struck) Civil War date Proof and obsolete denomination. Finally take into consideration the affordable price point, and this coin has off the charts collector appeal.

Deeply reflective, watery mirrors gleam from under a dusting of iridescent toning that brings out the details on both sides. There are a couple of scattered ticks, that under scrutiny with a strong glass come into view, but they are tiny and do not detract from the eye appeal.

PCGS 77, NGC 50, CAC 15. The last one to be realized \$1,020 in April 2019 and the current Collectors Universe value is \$1,050. We think PCGS/CAC coins like this are a no brainer.

**3CS 1864 PCGS PR66 CAC**

This is a totally original and visually alluring GEM. A rich, dappled, earth-toned iridescent toning graces both sides of this highly reflective mirrored beauty. The mirrors are watery, smooth and are essentially flawless. Dappled blue, olive, tan, and russet toning graces both sides, the mirrors really beam from under the colorful toning. The eye appeal is really neat.

Only 470 Proofs were struck of this Civil War date. PCGS 18, NGC 14, CAC 14. The last two sold in the 2015 ANA auction for \$2,820 and \$2,585. The current PCGS Price Guide value is listed at \$2,850. Very RARE any finer, a PCGS/CAC PR67 is a five figure coin. **3CS 1864 PCGS PR67 CAC**

Among the FINEST survivors of a paltry mintage of only 470. Coin collecting took a bit of a back burner during the Civil War and a ready low Proof mintages fell and few SUPERB GEMS of this date have survived the 150+ years since the end of the war.

Over the years, our sister firm, Legend Numismatics, has helped build the top 3 PCGS Registry Sets of Proof 3-cent silvers, including the #1 lifetime set, the Legend Collection. With that expertise, we can say this is unlike the vast majority of what you see for this date.

Rich cobalt and teal tonings are accented by tinges of apricot orange, which is evenly distributed across the watery reflective fields. Sharply struck, this exceptional coin has a lot to offer. Very high end eye appeal and technical quality.

PCGS 9, NGC 6, CAC 6. The last one sold two years ago for \$13,513. Just two PR67+s are graded finer. These are very infrequently seen in auction so this is an opportunity not to be missed by anyone collecting SUPERB Proof primes. Good Luck!

 Exquisite! Truly a remarkable SUPERB GEM Proof 1867 trime! Legend knows this series better than anyone, having built the #1 and #2 all time greatest sets. We were seriously excited to find this great piece!

Really strong, bold, deep mirrors beam vividly from all over and they exhibit a wonderful cleanliness, clarity, and of course, reflection. Mother Nature put on a show here. She bathed both sides in a stunning natural mix of evergreen/violet/pearl green colors all over. A peacock would be jealous! Every detail is razor sharp in strike and has thick frost. The eye appeal is super drool worthy!

**3CS 1867 PCGS PR67+ CAC**  
 An Incredible SUPERB GEM! To our eyes, this coin easily ranks as one of the FINEST 1867's that survives. Wow!

Deep and glittering mirrors beam from all over. There are zero impairments of any size, anywhere.

Even if you use a strong glass you will marvel at how clean the surfaces are. The mirrors also offer great clarity and reflectivity. A rich and original patina is enlivened by the brilliant mirrors. Every detail is frosted and has a razor sharp strike.

The eye appeal is bold to say the very least.

Only 625 were minted. PCGS 6, NGC 9, CAC 6. There are two graded in 67+. The current Collectors Universe Value is \$17,500. If you are building a world class set of Proof 3CS pieces, this coin represents a rare opportunity.

##### 3CS 1868 PCGS PR66 CAM CAC

This is a very beautiful GEM Cameo Proof three cent silver. If you are looking for an example to fill a Proof type set, this is an ideal choice.

Bold flashy mirrors seductively draw in your gaze with a deep, brilliant, watery reflection. Slate-blue and peach-rose iridescent toning graces both sides, accenting the sharply struck and fully frosted devices which stand out against the reflective fields. A stray line or two is all that we can find with a glass. The surfaces are totally original and the eye appeal is excellent.

Only 600 Proofs were struck. PCGS 11, NGC 5, CAC 13. The last PCGS PR66 CAM CAC sold in our December 2016 Regency Auction for \$3,643 and the current PCGS Price Guide value is listed at \$4,500. Only 6 are graded finer in the Cameo designation, and the only PR67 CAM to sell in auction brought \$13,513 in October 2014. This is a great opportunity for the type or specialist collector. Good Luck!

An exceptionally gorgeous GEM! Imbued with beautiful bullseye toning with rose-gold at the center, then rich teal and blue, finally with russet and crimson around the rim. The fields are gloriously reflective, while the devices and lettering are all frosty with contrast. The combination of the bold strike, exceptional toning and high quality make these Three-Cent Silver pieces highly collectible!

PCGS 22, NGC 26, CAC 21. The current PCGS Price Guide value is listed at \$2,000 and this impressive coin sold in our December 2015 Regency Auction for \$2,115. More recently the Garrett-Blue Moon coin, which was NOT CAC sold for \$2,233. Just four coins are graded finer, making this a great coin for a specialized collection of times.

What a gorgeously toned GEM example! We love the look of this beautiful coin! Richly toned with dappled splashes of blue, gold, aqua, rose, magenta, red, orange, and amber colors that really pop when the light hits the highly reflective mirrored fields. This is a very visually impressive coin that will suit the type or date collector alike.

Only 960 Proofs were struck. PCGS 34, NGC 34, CAC 8. The most recent PCGS/CAC example to sell in auction realized \$1,645 in the 2017 ANA auction, but more recently we sold an NGC coin without CAC for \$1,980 in our June 2018 Premier Session. This impressive coin appears to be fresh to the market and should sell for more than the \$1,550 currently listed in PCGS Price Guide. This coin deserves a place in a collection of PQ Proof 3 cent silvers.

Our sister company, Legend Numismatics, is very jealous of this monster!

Exquisite deep mirrors beam boldly from all over. The reflection is nearly blinding. The mirrors are clean and have remarkable clarity. Both sides enjoy a bath from Mother Nature of original emerald green/royal blue/violet/gold colors. When you twirl the coin all you see are the colors blazing. There clearly is some contrast. Every detail is as pinpoint sharp as you would expect. The eye appeal is phenomenal!

PCGS 3, NGC 4, CAC 2. The only PCGS coin to sell was a CAC piece which brought \$25,300 back in 2012! That was forever ago. The current Collectors Universe Value is \$30,000. Clearly, this is a world class piece. We do not expect it to sell cheap at all! If our sister company was building a top set, they said they would absolutely include this monster!

From our January 2018 sale of the Ipswich Collection, where we described it as:

"Sweet success! This is a SUPERB GEM in every respect!

Outstanding mirrors beam boldly from all over. The mirrors have exceptional clarity, cleanliness, and are highly reflective. Pretty and totally original moderate shades of blue/golden brown/green/champagne swirl all over. Every detail is sharp as a freshly made knife. The eye appeal is excellent!"

ONLY 600 were minted of this Proof ONLY date! PCGS 19, NGC 26, CAC 20. This little, totally original jewel brought \$3,055. Prior to that, the last one of these to sell in auction brought \$3,000 in December 2017. That was kind of on the cheapish side. The current Collectors Universe value is \$4,500. ##### 3CS 1873 PCGS PR63 CAM CAC

After 22 years, the mint ended production of the 3 cent silver in 1873, and the final year was a Proof only date.

Deeply flashy and reflective mirrored fields show a quicksilver like look. A touch of light toning accents the chrome-like mirrors and frosted, well struck devices. There's a great cameo contrast, especially so for such a modest grade. Quite possibly from a hoard of this date that came out in several Stack's sales in the 1990s.

Only 600 were struck. PCGS 17, NGC 2, CAC 5. No CAC-approved PR63 CAM has ever sold in auction, and the non-CAC examples have sold in a very narrow range of APRs from \$1,500 to \$1,725 and the current PCGS Price Guide value is listed at \$1,925. This is a nice example for a budget minded set.

##### 3CN 1878 PCGS PR67 CAM CAC

A wicked cool example of this PROOF ONLY date. Truly this coin is a real SUPERB GEM that possesses a strong gleaming reflection in the fields. A glint of pale gold adds to the high end eye appeal. The frosty devices are fully struck and do contrast nicely with the surrounding fields. The surfaces are smooth and totally free of any distracting marks.

PCGS 35, NGC 31, CAC 41. This truly is a series that has been beaten down in the market! It really is a neat series that is completable in PR66 and 67 CAM grades and with patience, great coins can be found with little premium over average APRs. What an absolutely GORGEOUS, high end SUPERB GEM! Highly reflective, beaming mirrors have a flawless, icy sheen and exceptional depth of clarity. The design elements are fully struck and have a thick frost. The contrast and eye appeal are very high end and SUPERB!

PCGS 61, NGC 23, CAC 44. There are a dozen graded PR67+ CAM, and these have sold in the \$2,300-\$3,400 range, with a current PCGS Price Guide value at \$3,750. Just a single PR68 CAM is graded finer, selling for \$9,694 in our December 2017 Regency Auction. This coin is worthy of a very high end collection. Good Luck!

**3CN 1883 PCGS PR67+ DCAM CAC**

Legend Rare Coin Auctions is proud to have been consigned this coin, the FINEST Proof 1883 3CN that exists! This coin is more than deserving of its lofty designation.

As you would expect, the mirrors are ultra deep and beam like a blast of electricity from all over. The mirrors are absolute in terms of clarity, cleanliness, and flash. When you twirl this coin you are nearly blinded.

The contrast is intense. Miss Liberty and the details are thickly frosted and are fully struck. The eye appeal is totally jaw dropping!

PCGS 2, NGC 0, CAC 2. This is the only 67+ DCAM. There are NO auction records for anything over PR66. This coin was sold in our September 2018 Regency Auction for \$17,625 and there is a Collectors Universe Value of \$20,000. The only other APRs for 1883 in any DCAM grade is from 2003 for a 66 DCAM and 2010 for a 67 DCAM. This is an extremely rare coin to find in DCAM despite the high mintage of 6,609. ### LOT 113

#### 5C 1880 PCGS MS65 CAC

The KEY date to the Shield nickel series and this GEM is one of the FINEST extant examples from an original mintage of only 16,000.

The presently offered GEM has a pleasing semi-Proof like luster that radiates around exceptionally well struck devices. You can tell from across the room that this highly lustrous coin has a great look. It is accentuated by a light dusting of gentle gold tone. Even under a powerful loupe, you will be unable to find a single flaw worthy of mention. Overall, the eye appeal is stupendous!

Aside from being a RARE date to find in any Mint State grade, it is confusing for many numismatists to determine circulation strikes from Proofs, as they were both struck from the same set of dies. Circulation strikes are identifiable by the die chip on the reverse under the second T in STATES and a little projection that comes off the dentils between NT in CENTS.

PCGS 7, NGC 4, CAC 2. There are two MS66 finer at PCGS, and that is it! Both MS66s have been offered in auction a few times over the last several years but due to high reserves, neither has sold. This is the only CAC approved MS65 to sell in auction, selling most recently in September 2018 for \$58,500. The MS65 PCGS Price Guide value is \$70,000, and we think this coin could again break that level! Keep in mind this coin does have a price history at \$91,063 back in our September 2015 Regency Auction.

**PCGS# 3810 | ESTIMATE: \$55,000+**

**LOT 114**

**5C 1868 PCGS PR66 CAM CAC**

Truly a spectacular GEM Proof Shield nickel! The Cameo contrast is exceptional, and the obverse is oh so close to DCAM.

The mirrors are deep, bold, and offer the most exceptional clarity. There's zero haze, or any other kind of toning to be seen anywhere. The devices are razor sharp and fully frosted, creating a stunning contrast. The surfaces are clean and free of any distracting post mintage marks or lines. The eye appeal is outstanding!

PCGS 17, NGC 15, CAC 22. The last one to sell in auction brought \$2,640 in October 2018 and prior to that, one sold for \$4,560 in the 2018 ANA auction. The current PCGS Price Guide value is listed at \$3,750 and there are only 3 coins graded PR66+ CAM finer in the designation. The only DCAM graded is a PR66 DCAM that we sold in January 2018 for \$8,225. This is a true prize for anyone working on a very high ranking set of Proof Shield nickels or GEM Proof type.

**PCGS# 83822 | ESTIMATE: \$2,500+**

**LOT 115**

**5C 1874 PCGS PR67 CAC**

Virtual perfection! This SUPERB GEM is among the FINEST graded of the date. Flashy nickel-silver fields have a wonderful, high end reflection on both sides. Sharply struck devices are frosty and have a subtle contrast against the fields. The reverse is dusted with a lovely pastel iridescent tone that enhances the eye appeal. Aside from a microscopic planchet fleck or two, the surfaces are smooth and problem free.

Only 700 were struck. PCGS 12, NGC 4, CAC 7. There has not been a PCGS/CAC coin sold in auction since our December 2016 Regency Auction where one sold for \$2,585. Since then a non-CAC coin sold for \$3,055 in the 2017 FUN auction and another sold for \$2,760 in November 2017. The current PCGS Price Guide lists a value of \$3,500. Just two PR67+s are graded finer in the designation and neither are CAC approved making this worthy of a great set.

**LOT 116**

**5C 1880 NGC PR68 CAM**

The FINEST NGC graded 1880 CAMEO Proof nickel is also one of the most beautiful SUPERB GEM examples that this cataloger has ever had the pleasure to catalog. This coin has a simply STUNNING visual allure.

Icy, bold, deeply reflective mirrors are the epitome of smoothness and clarity. Both obverse and reverse have wonderful iridescent toning at the periphery, working towards the centers. Adding to the dramatic visual is a razor sharp strike with

fully frosted devices that have a beautiful contrast against the intense mirrors. Needless to say, the eye appeal is absolutely amazing!

PCGS 1, NGC 1. Neither coin has ever sold in auction, though the current Collectors Universe value is listed at \$12,500. This coin will bring a very strong bid from anyone seeking a truly special coin for a type set or want to have the FINEST example for their Registry Set. Good luck!

This piece is not supposed to exist. It's incredibly hard to find these even in MS65! We fully agree this is a very HIGH END piece.

Both sides have satiny surfaces that offer hints of semi-prooflike mirrors. The luster is surprisingly strong and booms from all over. There is an ultra light hint of gold-but this coin looks untuned for the most part. There are no problems visible. If you use a strong glass, you will see nothing to make you love this coin less. Miss Liberty and the details are exceptionally struck (note there is slight weakness in the stars at 11+12:00). The eye appeal is tremendous!

PCGS 14 NGC 3, CAC 10. PCCS has graded 2 in MS66+ with 3 higher. We have always disagreed with the pops. We have only ever seen ONE other MS66 and we hardly even see MS65's that are real GEM's. The last PCCS CAC MS66+ to sell in auction brought \$33,600 in January 2018. We can not stress enough how great the rarity of this date is in TRUE GEM. A PCCS MS67 NON CAC sold for \$64,625 in 2018. This may be the opportunity of a lifetime for the Liberty Nickel specialist!

##### 5C 1886 PCGS MS67

Whoa! This coin will stop you in your tracks! We have NEVER seen an 1886 nickel in such a high grade. The 86 is one of the KEYS to the series, always sought regardless of condition. A SUPERB coin like this is essentially incomprehensible! Tied with just a single coin for FINEST graded at either service, Legend Rare Coin Auctions is proud to present it in its full glory.

A blinding cartwheel luster glows white-hot on both sides. A delicate pastel rainbow iridescent tone can be seen near the peripheries blending to an icy silver-nickel-blue and clear gold in the centers. Sharply struck on both sides from a pair of shattered dies, spidery die cracks can be seen throughout the legends adding character to this beauty's stunning visual allure. Using a strong loupe we can only see a few minor mint-made planchet flakes, but there really is nothing to detract from the SUPERB eye appeal.

PCGS 3, NGC 1. PCGS has a price of \$74,000 on CoinFacts. Really, though a price guide value is useless when the top Registry Set collectors battle it out to add this monster to their sets. Be prepared to see a record price for an 1886 nickel!

##### 5C 1909 PCGS MS66+ CAC

This icy-lustrous SUPERB GEM nickel is tied for second finest graded and bested by just a single MS67 finer. The devices are razor sharp and frosty, standing out against the exceptionally high end fields. There is a remnant of a partial fingerprint on the reverse that blends with the lovely, light, delicate pastel iridescent tone. A tiny tick or two, invisible to the naked eye are noted for the sake of accuracy, but clearly they do not affect the amazing eye appeal.

PCGS 33, NGC 10, CAC 13. There are seven examples on the PCGS Population Report in MS66+ and the most recent PCGS/CAC example to sell in auction realized \$2,880 in the 2018 FUN auction and the current PCGS Price Guide value is listed at \$3,250. Just a single MS67 is graded finer, is not CAC approved, and has never sold in auction, but PCGS estimates a value of \$12,500, making this a VERY respectable coin for a very high ranking PCGS Registry Set. Good luck!

A very pretty, SUPERB GEM Cameo Proof. Offering frosted central devices and reflective fields that combine for incredible eye appeal. Rich nickel color with champagne highlights and some tiny toning dots (seen with the aid of a glass). The relatively low mintage business strike of this date is scarce and contributes to demand for the proof as a date.

PCGS 15, NGC 13. Listed in the PCGS Price Guide at \$3,750. The most recent sold for \$2,640 in our Final Premier Session. The market really has battered these unfairly. With just two PR67+ CAMs graded finer, this coin is among the very FINEST known and certain to generate competitive bidding from the Registry Set collectors.

This is a visually impressive, very high end SUPERB GEM. Amazing, brilliant mirrored fields beam from across the room. The surfaces are completely free of any hairlines or other distractions. A light gold and icy blue hue reflects over the completely watery surfaces. The eye appeal is great! The 1885 is a rare date in business strikes, many collectors in the past have included Proofs in their sets, as GEM Mint State coins are very rare.

PCGS 25, NGC 17, CAC 21. There is a wide range of prices realized for PCGS/CAC PR67s sold in auction, and the current PCGS Price Guide value is listed at \$2,250. Just five are graded finer, this coin represents a great value for the collector.

PCGS 24, NGC 22, CAC 11. There are four in PR66+ CAM at PCGS and the current PCGS Price Guide value is listed at \$2,250. No CAC-approved 66+ CAM has ever sold in auction, and the most recent PCGS PR66 CAM CAC sold for \$3,960 in November 2017. Keep in mind that a PR67 CAM is a five figure item today. Fantastic deep beaming mirrors contrast brilliantly against the thickly frosted devices. The devices are sharply struck and they stand out. There is a dusting of total original patina over the highly mirrored fields. The only reason this borderline GEM is not CAC are a few tiny marks that you need a glass to see. The eye appeal is impressive for a coin graded "only" 64.

PCGS 2, NGC 0. Prior to this one selling, the last one sold in the FUN 2007 auction for \$1,265. The current PCGS Price Guide value is listed at \$1,250. Only three are graded finer, including the PR66 DCAM that we sold for \$12,925 in December 2015. This coin belongs in a special set of Liberty nickel Proofs and will see fierce bidding.

This is a beautifully toned, totally original GEM Proof Liberty nickel.

Deep beaming mirrors glimmer in the light, accenting the wonderful toning that graces both sides. The frosty, well-struck devices stand out in bold contrast to the fields, creating a lovely cameo contrast. A few specks on the reverse are all that keeps this coin, we think, from getting a CAC bean, but they generally blend into the rest of the toning pattern and do not detract. The eye appeal is excellent.

PCGS 24, NGC 10. The current PCGS Price Guide value is listed at \$3,250 and these are quite scarce. Bid accordingly, as only four coins are graded finer, none of which have been sold in five years.

There are a couple of minor toning spots, but otherwise the surfaces are flawless. Graded ages ago, this coin is wonderful!

PCGS 45, NGC 28, CAC 25. The current Collectors Universe value is listed at \$1,150 and a fresh, SUPERB GEM like this should bring a strong price. It is amazing how inexpensive Proof types like this has become. Now is a great time to begin a set of Premium Quality pieces like this one.

Bold and flashy, the highly reflective nickel-silver fields beam with impressive depth. The sharply struck up devices have a thick frost on both sides. A delicate dusting of iridescent tone can be seen on both sides.

A high end coin that has a lot of character for sure. First the dies are not proper coin alignment, the reverse is rotated 180 degrees relative to the obverse (which has been seen on several examples of this date). There is also a very long lint mark that is unobtrusive and mint made at the date.

PCGS 34, NGC 23, CAC 37 The most recent example sold for \$3,290 in March 2017, which was the Garrett Blue Moon coin. Prior to that, these were selling in the \$764 to \$940 range and the current Collector's Universe value is listed at \$950. WOW! Talk about being a reflective headlight! The mirrors on this SUPERB GEM are so deep and intensely reflective it is insane! Really high end quality and unlike any other 1903 Proof nickel we have ever had the pleasure of selling. Seriously deep-really ULTRA deep mirrors seem endless. They are crystal clear, super clean, and have nearly blinding intense reflect on! The mirrors look like a freshly made sheet of glass when the coin is twirled. Miss Liberty and the details are needle sharp in strike and have thick creamy white frost.

PCGS 22, NGC 11, CAC 23 This is the ONLY NGC 67+ CAM with or without the \* designation. This BOLD, SUPERB GEM is worthy of all the bells and whistles! We sold a PCGS/CAC PR67+ CAM for \$5,640 in our September 2018 Regency Auction and the current Collector's Universe value is listed at \$5,000. ##### 5C 1911 PCGS PR67+ CAC

Everything is stunning! One of the FINEST and most beautiful SUPERB GEM Proof 1911 nickels we have ever seen! We LOVE the look; Mother Nature really worked her color magic on this one! The intensely mirrored fields are smooth, free of any lines or marks. Both sides are a blessing from Mother Nature with pastel rose, teal, and icy blue toning that evenly dusts the essentially FLAWLESS surfaces. Wow simply does not convey what a moose this coin really is!

PCGS 15, NGC 15, CAC 7. There are 2 in PR67+ and just a single, solitary PR68 finer at PCGS. None of these have sold in auction, but an NGC PR68, which last sold nearly a decade ago, brought nearly \$5,000. This PR67+ should bring well in excess of the current Price Guide value of \$2,400--that level just seems too cheap to us! Bound for one of the FINEST Proof Liberty nickel sets.

We love these! While not very rare, even in MS67, they can come really nice and very high end coins a ways delight. The lustrous nickel silver surfaces are gently covered by an icy-blue and rich orange/apricot golden tone. Razor sharp striking definition completes this outstanding and eye appealing beauty.

PCGS 671, NGC 311, CAC 280. The most recent example sold in our May 2019 Regency Auction, which realized \$1,175. This coin's eye appeal is even stronger than that one, and this one should bring a similar, or stronger price.

Sublime! A truly gorgeous SUPERB GEM Buffalo nickel!

This coin screams eye appeal and quality. A strong, radiant mint luster blooms all over.

The sharply struck devices have full, crisp definition on both sides, every detail is deeply rendered from a precision blow from the dies. Both sides have a seductive pastel blue and gold iridescent toning that is completely eye arresting.

PCGS 34, NGC 7, CAC 16. Just 7 coins, all MS67+, are graded finer at PCGS. The most recent PCGS/CAC coin to sell was back in the 2015 ANA auction, where one sold for \$9,400. We love the look of this one, and it would not be a shock if this beautifully toned SUPERB GEM realized more than the \$10,281 that the Angel Dee's coin realized in our December 2016 Regency Auction. Anticipate strong bidding for this one!

**5C 1918/7-D PCCS AU58**

A GEM AU overdate Buffalo nickel. One of the very rarest dates in the series, the 8/7 was not discovered for some one dozen years after they were struck, offered for the first time in Paul Lange's March 1930 auction. Rare in all grades, especially so in Mint State, the presently offered example is very high end and would fit nicely in a great set.

Tan-gold patina is evenly dusted across both sides, showing off delicate olive, lilac, and pewter hues. Both sides show just the barest trace of perceptible wear in the form of the slightest touch of high point friction. Well struck and displaying a soft, satiny lustrous sheen below the original toning, this coin has a great eye appeal. We think CAC was way too tight when this coin went in, we see no reason why it should not have stickered!

PCGS 41, NGC 24. There has not been a non-CAC PCGS graded example sold in auction since August 2012, a coin that realized \$25,850. The most recent coin sold in our July 2018 Regency for \$28,200. The current PCGS Price Guide value is listed at \$31,500. Rare in Mint State, this is a great coin for any collector. Good Luck!

##### 5C 1918/7-D PCGS MS64+ CAC

The Buffalo nickel series is one of the most popularly collected series in U.S. Coins. From 1913 to 1938, this type saw World War I, the Roaring 20s, and the Great Depression, and remained in circulation throughout World War II and beyond. Among the many many dates and mintmarks are many conditionally rare issues, as well as important varieties that are listed in the Guide Book of U.S. Coins (Red Book), and are treated as a regular date in the series. The overdate 1918/7-D is one of those. A single overdated die was prepared and shipped to the Denver mint, and a relatively small number of the 8.3 million nickels produced were of this variety. The discovery of this rare overdate was not made until 1931, by then many were extensively circulated, and thus the issue is rare in all grades, and especially so in near GEM Mint State and finer, the harder it is to find. With just a handful graded finer, this marvelous example will delight any serious collector.

The first thing that catches your eye is the very pretty iridescent toning that caresses both sides. A radiant, pearly, nickel-silver luster blooms in the light, enlightening the rose and pastel blue tones. Sharply struck up, the overdate is clearly visible to the naked eye. The surfaces are of exceptional quality, and were it not for a single carbon fleck on the Indian's neck, this coin would qualify as a full GEM. While we mention this minor "flaw" it serves as a helpful "pedigree marker" that will forever identify this beautiful coin. A Buffalo nickel to be treasured and appreciated for its stunning overall visual allure, we cannot stress enough its outstanding qualities.

PCGS 24, NGC 13, CAC 4. While PCGS has 3 coins listed on the Population Report in MS64+, only one has ever sold in auction, and it is this one! Its first appearance in June 2011, was without CAC approval and it realized a robust \$161,000. More recently it sold for a "cheap" \$99,000. The current PCGS Price Guide value is listed at \$125,000. Keeping in mind that the last MS65 to sell in auction was in August 2013, where one sold for \$258,000. This marvelous, borderline GEM is worth including in the FINEST of Buffalo nickel collections and will see very strong bidding when it does cross the block. LRCA wishes the winning bidder a hearty congratulations in advance for adding this amazing coin to their collection, and thus elevating it to a higher level! Good luck!

**5C 1919 PCGS MS67**

This is a beautifully toned SUPERB GEM 1919 Buffalo nickel. Everything about it screams beauty. Both sides show rings of rainbow toning over highly lustrous surfaces. Sharply struck devices show full definition to the details, enhancing an extremely bold visual allure. We only mention a few tiny ticks for sake of full disclosure, none of which affect the eye appeal of this amazing looking Buffalo nickel.

PCGS 23, NGC 9. Sixteen examples have sold in auction going back to

2003, with an average APR of \$9,755, the most recent example selling for \$5,520 in the 2018 ANA auction. The current Collectors Universe value is listed at \$7,000. Just three are graded finer at PCGS, all MS67+, the most recent being the Angel Dee's coin that realized \$17,038 in our Regency Auction XIX. Take a look at this beauty, and bid accordingly!

Boldly lustrous surfaces have a bold, incandescent glow that is very high end. Stunning rainbow bands cling to the peripheries, which accents the pale blue/green tone near the center. Sharply struck devices stand out against the flawless surfaces. The eye appeal is truly remarkable. By far the prettiest example of this date we have ever encountered!

PCGS 22, NGC 9. The current PCGS Price Guide value is listed at \$7,500 and the most recent one we sold was the Angel Dee's coin which brought \$7,050 in our October 2017 Regency Auction (that coin cannot compare to the marvelous toned surfaces of this SUPERB GEM!). #### OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

##### 5C 1937-D 3 LEGGED. PCGS MS65

A frosty, lustrous GEM example of this famed 20th century Buffalo nickel variety. A classic of American numismatics, even non-collectors have heard of this coin.

A soft dusting of pastel iridescent toning, offering green, gold, orange, and rose hues, are enlivened by the bold underlying luster that glows wonderfully in the fields. The devices are nicely rendered by a generally good strike. The die rust and die clashes are seen on both sides, otherwise, the surfaces are generally clean, free of any serious marks. The eye appeal is quite pleasing.

The story of these 3 Legged Buffalo nickels has been told over and over, but it is what makes this a classic issue. A pair of dies clashed, coming together without a blank planchet between them. The clashed dies left traces of design elements from the opposite side on the other. A mint employee noted the clashes, pulled the dies from service, and overzealously polished the reverse with an emery board, accidentally removing one of the buffalo's front legs. These have been popular since their discovery shortly after being put into circulation, thus the somewhat large number of AU and better examples.

PCGS 55, NGC 56. The current PCGS Price Guide values listed at \$26,500. We like the eye appeal of this lovely toned GEM better than that of the one we sold in January 2019 Regency Auction 30 for \$20,563. EXTREMELY RARE any finer. Always a popular coin that is always in demand.

First off, this coin is a SUPERB GEM! We have looked it over and over with a powerful glass and have no clue what precluded CAC from awarding it a green bean. Know that we would not be offering this beauty if the quality was not all there.

Satiny matte surfaces glow brilliantly on both sides. Delicate pastel toning is gently dusted toward the peripheries on the obverse and reverse. The matte texture really compliments the Type 1 design elements and this beauty has a great look.

PCGS 56, NGC 35. The last non-CAC coin to sell was in the 2018 ANA auction, realizing \$6,900 and the current PCGS Price Guide value is listed at \$7,000. Only 20 coins are graded finer. This marvelous SUPERB GEM will bring a premium bid from advanced collectors seeking a superior quality Proof!

The eye appeal is spectacular in every way.

PCGS 2, NGC 0. The other coin sold for \$23,500 in February 2014, and the current PCGS Price Guide value is listed at \$30,000. Clearly, none are graded finer. This is truly a special coin and worthy of the FINEST of Jefferson nickel sets that may bring a record price. Be prepared.

**MS65 FS**

When was the last time you saw a SUPERB GEM Proof Buffalo in a first generation PCCGS "rattler" holder?

This coin is ultra fresh to the market and a beautifully toned Buffalo nickel. Flashy mirrors reflect from below a layer of rich iridescent toning. Shades of gold, pale blue, soft green, and lilac blend with a silver/white iridescent toning. The preservation is marvelous and the eye appeal is really nice. Totally original and eye appealing; this coin is bested by just four coins at PCCGS.

PCCGS 43, NGC 53. Going back to 2003, there have been 25 non-CAC PCCGS coins sold in auction, with an average of \$9,593 and the current PCCGS Price Guide value is listed at \$6,250. The most recent non-CAC example we sold in auction brought \$5,053 in September 2018 and we sold another in July 2018 for \$5,170. This one will bring a strong price based on its eye appeal and quality.

**LOT 162**  
**5C 1946 PCCGS MS66+FS**

Tied for second FINEST graded, with just a single example graded finer, this is a real prize for the advanced Jefferson nickel specialist! Beautifully toned on both sides with pastel pinks, blues, and golds. Sharply struck and smooth with no visible marks worthy of mention.

PCCGS 7, NGC 0. No MS66+ FS has ever sold in auction, but there is one on the market being offered at \$5,700. The current PCCGS Price Guide value is listed at \$4,500. If you are building one of the world's greatest sets of Mint State Jefferson nickels, this coin belongs in your collection, and we suspect it will take a very strong bid to take it home.

**PCCGS# 84028 | ESTIMATE: \$4,200+**

**LOT 163**  
**5C 1947-S PCCGS MS67 FS**

Tied for FINEST graded 1947-S nickel, this is a must have for any Registry Set collector. Despite a good mintage of 24,720,000 the majority of these went right into circulation, where many still remain. Add to this a notoriously weak strike, a SUPERB GEM like this is a real prize for the advanced collector.

Highly lustrous surfaces have a rich, nickel-gray coloration with gold and sky-blue accents at the rims. The eye appeal is unmarred by any serious marks, indeed all you see with a magnifying glass are die lines that are mint made.

PCCGS 5, NGC 0. None have sold since the 2016 FUN auction, when one brought \$14,100. The current PCCGS Price Guide value is listed at \$17,500. With NONE finer, this SUPERB GEM 47-S nickel is worthy of the very FINEST of Jefferson nickel Registry Sets.

**LOT 164**

**5C 1955 PCGS MS66 FS**

A flashy, highly lustrous GEM. Sharply struck with full step definition. The surfaces are nearly chrome-like and the eye appeal is amazing.

PCGS 11, NGC 0. The most recent example sold for \$2,820 in February 2017 and the current PCGS Price Guide value is listed at \$3,500. Just a single MS67FS has been graded finer at PCGS, and that coin has never appeared in auction, making this one of the FINEST available to advanced Registry Set collectors.

**LOT 165**

**5C 1955-D PCGS MS65 FS**

Jefferson nickels from the 1950s and 1960s are remarkably RARE in GEM with full step striking definition--and the presently offered 55-D is no different. Graded among the finest at PCGS, there are 10 in 65 and only three finer. Not only are they rare, they are rarely offered. The present GEM offers bold luster, and clean and totally original surfaces. Here is another conditionally very rare Jefferson nickel that will delight any advanced collector.

PCGS 10, NGC 0. The most recent PCGS example sold in a December 2015 for \$3,055. Prior to that, one sold in September 2015 for \$4,465. The current PCGS Price Guide lists a value of \$4,750. PCGS has graded just three finer, and this one is an excellent choice for a very high ranking PCGS Registry Set. Good Luck!

**LOT 166**

**5C 1957 PCGS MS66+ FS**

A very sharply struck and nicely preserved SUPERB GEM that is one of the FINEST graded. Boldly lustrous, chrome-like nickel silver luster radiates brilliantly all over. The eye appeal is exceptional in every way.

PCGS 2, NGC 0. The current PCGS Price Guide value is listed at \$5,000 and just 2 are graded finer, and NO MS66+ FS or 67 FS has ever sold in auction. Bound for one of the very FINEST, high ranking PCGS Registry Sets of Jefferson nickels.

**PCGS# 84061 | ESTIMATE: \$2,200+**

**LOT 167**

**5C 1939 REVERSE OF 1938. PCGS PR68 CAC**

Among the FINEST graded examples of this early Jefferson nickel proof. Highly reflective mirrors beam like liquid mercury on both sides and have taken on a gentle, icy blue glow in the centers that yields to a golden peach at the rim, that really comes to life in a light. The eye appeal is SUPERB and very high end.

PCGS 16, NGC 9, CAC 11. We have had the pleasure of selling two other examples in the last two years, one selling in July 2017 for \$4,348 and the other in July 2018 for \$5,523. The current Collectors Universe value is listed at \$6,750. There are NONE finer, so this one is bound to find its home in a very high ranking PCGS Registry Set. Who knows when the next one will appear!

##### H10C 1797 16 STARS. PCGS MS65+ CAC

An exquisite GEM LM-2! There are not enough adjectives to properly convey the SUPERB qualities of this GEM 1797 half dime. To think a coin like this could survive in such PRISTINE condition boggles the mind!

Obverse dies were prepared with 13, 15, and 16 stars. Sharply struck on both sides, this pleasing GEM has a strong luster that comes out with a brilliant vibrance that glows in the light and underlies a sumptuous, original patination. Golds, blues, and greens blend over pearly-silver surfaces. The design elements are very sharp overall with only some minor and typical weakness in the central devices of the eagle. Struck from clashed dies, parts of the reverse wreath can be seen in the field in front of Liberty's portrait. The eye appeal is exceptional and the quality is stunning!

PCGS 2, NGC 0, CAC 1. This is the single MS65+ at PCGS and there are only two coins finer at PCGS. We cannot find an auction record for this coin, and the last time a PCGS MS65 sold was back in January 2005, where one sold for \$82,800. More recently the Lawrence Stack-D. Brent Pogue MS66 sold for \$123,375 in November 2016. In MS65+, PCGS lists a value of \$112,500 in their current Price Guide. This GEM has a wonderful look and freshness to the market that should elicit fierce bidding from specialists. Worthy of a world class cabinet of early type coins!

PCGS# 4259 | ESTIMATE: \$110,000+

**LOT 169**

**H10C 1803 SMALL 8. PCGS VF30**

LM-1. This is a very tough Rarity-6 variety, in a popular collector grade.

Approximately 25-30 are known, making this by far the rarest of the three varieties for the date, and is the only one for the Small 8. The details are bold and approach XF sharpness in areas, but like many examples of this date, the surfaces are a little rough. Medium gray surfaces have a "circ-cam" look and despite the roughness in the fields, the eye appeal is decent for an example in this collector grade.

PCGS 3, NGC 0. The most recent example to sell in auction was back in the 2011 ANA auction for \$9,488 and the current PCGS Price Guide value is listed at \$9,000. Extremely RARE; any finer this is an important opportunity for the half dime collector who seeks an "affordable" example.

**PCGS# 4270 | ESTIMATE: \$7,000+**

**LOT 170**

**H10C 1834 PCGS MS66**

A SUPERB jewel! Boasting a classic GEM appearance, this beautiful coin is crisply struck and has a vivacious underlying satiny mint frost. The central surfaces are silvery with a delicate dusting of clear gold and the golden toning gets deeper toward the peripheries. The surfaces are free of any distracting marks or lines, and truthfully, we cannot see anything that should preclude CAC approval. The eye appeal is exceptional.

PCGS 22, NGC 29. The current Collectors Universe value is listed at \$5,750 and the most recent example sold in November 2017 for \$6,300. Keep in mind that anything finer is going to cost \$15,000-\$20,000 and this one has a great look that makes it highly desirable among collectors. A great coin for a type or date set.

**PCGS# 4281 | ESTIMATE: \$4,500+**

**LOT 171**

**H10C 1835 LARGE DATE, LARGE 5C. PCGS MS66 CAC**

LM-3. A gorgeous Late Die State example with really cool, heavy die breaks and die clashes on both sides. Despite the die flaws, the devices are crisply rendered with full definition to both sides. Rich and original toning, varied shades of orange-gold, lilac, and apricot champagne hues grace both obverse and reverse of this PQ, borderline SUPERB GEM. The bold, satiny luster gleams below the color, accenting essentially FLAWLESS surfaces.

PCGS 26, NGC 27, CAC 10. This is the most recent example to sell in auction, realizing \$4,800 in April 2018. Prior to that, one sold in February 2017 for \$6,463 and one in May 2015 for \$8,865. The current PCGS Price Guide value is listed at \$7,000 and only two examples have been graded finer at PCGS, making this a prime example for a type or variety collector. This coin belongs in a great cabinet, opportunities like this are very few and far between, don't let the opportunity pass you by.

**PCGS# 4282 | ESTIMATE: \$4,800+**

**LOT 172****H10C 1846 PCGS XF45 CAC**

A KEY date, only 27,000 were struck, and the present CHOICE XF is very high end for the grade and is a popular collector oriented grade. Just some moderate wear is noted, but this coin was saved from circulation before it could get any serious contact marks or heavy wear. Pleasant, original toning graces both obverse and reverse, adding to the outstanding eye appeal.

PCGS 5, NGC 6, CAC 3 There has never been a CAC-approved example in XF45 sold in auction and the last PCGS-graded example sold in 2009! The current PCGS Price Guide value is \$4,500 and this coin will likely sell for more. That the Simpson Collection only had a 53 speaks volumes to how RARE this date is in high grade.

**PCGS# 4336 | ESTIMATE: \$4,200+**

**LOT 173****H10C 1862 PCGS MS67 CAC**

This SUPERB GEM is fully Prooflike with a bold, flashy, reflective luster in the fields that surround the frosty, sharply struck devices. Deep polish lines are seen on both sides, which created the flashy, mirror-like reflection. Wonderfully toned, this wholesome Civil War date issue makes for a great type coin for collectors.

PCGS 43, NGC 25, CAC 42 The two most recent sold in August 2018, one realizing \$1,650 in an internet auction and the other \$1,920 in the ANA auction. The current PCGS Price Guide value is listed at \$1,950. We love the look of this one and we would recommend it to anyone building a type or date set.

**LOT 174**

**10C 1798/7 16 STARS REVERSE. PCGS MS64**

JR-1. This is truly a very CHOICE Mint State Bust dime. This coin has a few traits that make it especially interesting. First it is the first of two die marriages that features this overdate obverse, this one, paired with the 16 Star reverse is the only die engraved by John Gardner, and not Robert Scot, and it was also employed to strike 1797 BD-1 quarter eagles.

The present coin has a vibrant, brilliant luster that is boldly retained under light pewter-silver in the centers with a delicate rose over-ay and deeper slate-blue at the peripheries. Rather crisply struck from clashed, lapped, and damaged dies, you can see all forms of interesting die characteristics throughout the obverse, including a line that starts at star 3, is interrupted by the bust, and then picks up again at Liberty's nose, before terminating at star 9. This is listed in the JR reference as being from an early strike, this feature later wears away and is not seen on most specimens. The eye appeal is wonderful for any early dime, and especially so for a 1798.

PCGS 9, NGC 3. The most recent example to sell was from a later date state, and had distracting, spotty toning that pales when compared to this coin. In looking at previous auction records, we cannot find this coin having previously sold in auction. The current PCGS Price Guide value lists a value of \$35,000. We are pleased to present this probable Condition Census piece and we know it will see strong collector interest when it crosses the block. Good Luck!

**PCGS# 4468 | ESTIMATE: \$35,000+**

**LOT 175**  
**10C 1835 PCGS MS64 CAC**

What a fantastic looking, totally original Bust dime. Boasting a classic old time look with a thick pewter, dove, battleship, slate and powder blue patina with rose overtones, this coin has a timeless visual allure that cannot be beat. The surfaces are satiny and smooth, free of any distractions and the devices, fully formed from a forceful blow from the dies. The eye appeal is exceptional in every way. Capped Bust dimes are rarely encountered with a wonderful, even and totally original patination. What a great type coin!

PCGS 73, NGC 79, CAC 21. The most recent example to sell was NOT CAC and was NOT as original as this beauty and sold for \$3,360. The current PCGS value is listed at \$3,250 and like all bust coinage, the population is quite low in GEM grades. A great coin for a type or date set.

**PCGS# 4527 | ESTIMATE: \$2,500+**

**LOT 176**  
**10C 1835 NGC MS63 PL**

If this was not the first JR-5 to be struck, it is certainly one of them! Both sides are fully Prooflike, the dies freshly polished with polishing lines seen in the fields on both sides. Indeed only 2 PL examples have ever been graded as such at NGC, this one and a 64. Sharply struck, with every detail boldly impressed on both sides. The devices have a frosty finish, which contrast against the fields. A very early die state, with no clashing or cracks of any kind. Brilliant silver surfaces are untored and look as fresh and flashy as the day it was struck. The eye appeal is amazing!

PCGS 50, NGC 76 Prooflike Population PCGS 0, NGC 1. With a coin of this essentially unique classification and lack of auction records to go along with it, it's very hard to figure an estimate. We think it should be worth somewhere between MS63 and MS64 valuation, but who knows? It could run away. Truly a special dime for the advanced collector!

PCGS 21, NGC 18. Only 4 coins are graded finer at PCGS. The current PCGS Price Guide value in MS66 is \$3,000 and this coin sold for \$2,350 in our December 2017 Regency Auction. A GEM example and VERY RARE any finer.

**10C 1880 PCGS MS66 CAC**

High end quality with a distinctive look. Satiny obverse fields have a bold frost throughout. A touch of pale silver/pearl indescence graces both sides. The reverse is a similar color but with a semi-Prooflike flash to the luster that really highlights the well struck devices. A low mintage issue of only 36,000.

PCGS 26, NGC 32, CAC 11. The most recent example was the AJ Vanderbilt coin that had a GOLD CAC bean, which realized \$4,230 in March 2018 (that coin had been off the market since Stack's September 1968 auction). Prior to that there had not been one sold since June 2014, which realized \$1,528. Collector's Universe lists a value of \$1,600. Rare finer, this semi-key issue will delight the set collector.

**PCGS# 4688 | ESTIMATE: \$1,500+**

**LOT 179****10C 1886-S PCGS MS67+ CAC**

This coin is love at first and every glance. It is a real borderline MS68!

The sensat onal surfaces are exceedingly clean and have a satiny smooth texture. Even when using a strong glass you will find nothing to disappoint you. There are some light die polishing lines mentioned for accuracy.† We are blown away by this coin's intense full booming luster. We rarely see this date like this. Both sides enjoy subtle squirts of pale golden brown color the coin is still 75% silvery colored. Every thing

about this co n screams total original ty. Miss Liberty and the details are lightly frosted and are sharply struck. The eye appeal is sensational!

PCGS 5, NGC 2, CAC 3. PCGS has graded only this coin in MS67+ They did grade 2 higher (neither is beamed). This co n has never been so d via auction. For an FY sake: the last MS68 (NO CAC) was for \$23,000, way back in 2006! This coin will make n incredible addition to ANY GEM Mint State Dime set. Among the FINEST graded SUPERB GEM 1889 Proof dimes known. Intense mirrors beam from below a rich layer of teal-blue and gold patina on the obverse and mostly untoned, blazing silver mirrors and just an arch of color along the right periphery. The reverse is fully CAMEO and there is moderate contrast between the obverse devices and the mirrored fields.

Only 711 Proofs were struck. PCGS 7, NGC 7, CAC 2. Just two are graded finer in the non-Cameo designation, both of which are PR67+. The current PCGS Price Guide value is \$2,500. These are TOO CHEAP! We do not understand how one of the FINEST examples of a low mintage Proof coin that is now 120 years old can be so cheap. The market unfairly beat these up. What a beautiful SUPERB CAMEO Proof Barber dime! We are in awe of everything about this GEM! Boldly mirrored fields are vivid in the r deep, watery reflection with strong clarity and cleanliness. The devices are boldly struck up and have a thick, creamy frost that stands out in stark contrast to the mirrored fields. Both sides are framed by a halo of rainbow toning. The surfaces are essentially perfect, free of any serious lines, marks, or discolorations that distract the eye. Indeed, this SUPERB coin is a real delight to behold!

Only 912 Proofs were struck. PCGS 16, NGC 11, CAC 11. The current PCGS Price Guide value is listed at \$3,500. While the most recent example sold for only \$3,290 in the 2017 ANA auction, prior to that, one sold in August 2013 for \$7,050. There is no question this coin is a 67/9! It indeed ranks as one of the finest 1901 Proofs.

Perfect mirrors beam boldly from all over. The mirrors are so strong they have strong clarity. A moderate and totally original mix of olive/reddish gold/blue/pale forest green/russet/magenta are swirling all over the obverse. The reverse is more of a olive/blue/russet mix. Miss Liberty and the details are fully struck. The eye appeal is SUPERB!

Only 813 Proofs were minted. PCGS 4, NGC 15, CAC 8. PCGS has graded only 2 in 67+. There are no auction records for this coin or any PR67+. The current Collectors Universe Value is only \$4,750. Beyond any doubt or question, this has got to be the FINEST KNOWN CAMEO Proof 1906 dime that exists! The mirrors flash and beam with a bold clarity and reflection that contrasts vividly against the highly frosted reliefs. Both sides have a bluish of beautiful iridescent toning that gently graces the surfaces. While a strong glass might reveal a tiny line or tick, none distract from the outstanding eye appeal.

Only 675 were struck. PCGS 4, NGC 3, CAC 8. Clearly there is duplication here. PCGS has graded 2 in PR67+ CAM at PCGS; neither have ever sold in auction. The most recent PR67 CAM CAC sold in February 2011 for \$12,075. NO PR67 CAMs have sold since then! Needless to say the current PCGS Price Guide value of \$7,250 has got to be way too low.  FROM THE R.S.D. COLLECTION.

A beautifully toned SUPERB GEM CAMEO Barber dime Proof. This coin has long been in the #1 Proof Barber dime sets on the PCGS Registry, starting with Law, Simpson, Laxdive, and RSD.

The rich, multihued patination is brought to life when the light reflects off the ultra-reflective, watery mirrors. The strike is very sharp and the devices are frosted, contrasting with the beaming mirrored fields. The surfaces are totally without flaw and the mirrors really bring the blue, gold, and olive tone to life on the obverse and the reverse is virtually untinted.

Only 700 proofs were minted. PCGS 4, NGC 3, CAC 8. As a hint to the scarcity of this issue in such lofty grade, the last PCGS coin sold in December 2005, realizing \$6,325, which was placed in the Law Collection. There are NONE graded finer than PR67+ CAM which replaced this SUPERB GEM in the RSD set. An important opportunity for any Proof Barber dime collector!

FROM THE R.S.D. COLLECTION.

What a glorious SUPERB GEM this coin is. We fully agree it is VERY HIGH END and is closer to a PR68 than a 67! Deep and super flashy mirrors glow vividly from all over. The mirrors have tremendous clarity and cleanliness. When you twirl the coin, it looks like a glowing mirror. Both sides enjoy gorgeous original colors. The obverse has bands of blue/green/gold/lilac and sparkle. The reverse obviously sat in felt and has a slightly deep pale navy/olive/gold coloration. There is obverse contrast. Miss Liberty and the details are frosted and are fully struck.

Only 622 were minted. PCGS 4, NGC 12, CAC 11 (obviously there have been resubmissions). PCGS has graded only 4 in PR67+ The last one to sell in auction brought \$5,875 in March 2017. We have built multiple GEM PR Barber Sets in high grade. This date is a "silent" stopper in the higher grades. This piece will make a fantastic addition to any great SUPERB GEM collection! It is also our opinion these have been greatly overlooked in the last few years. Opportunity knocks loud now!

WOW! This MONSTER GEM is tied for FINEST graded in all designations and it is not hard to understand why! Exceptional mirrors are bold, deep, and have the epitome of clarity to the reflection. The fields look like they are freshly polished ice. The devices are well struck and both sides are lightly coated with a teal/gold, and rose patina.

Only 450 Proofs were struck. PCGS 12, NGC 14, CAC 16. There are just 3 in 67+ with NONE FINER. The only example to ever sell in auction was the one in our May 2018 Regency Auction from the

Premier Barber Collection, which realized \$7,931. The current Collector's Universe price is listed at \$7,500 and this one will realize very close to that when the hammer falls. If you are working on a top tier set of Proof Barber dimes, you owe it your self to bid on this SUPERB GEM!

#### 10C 1916-D MERCURY. PCGS MS64 FB CAC

A beautifully toned and totally original example of this important KEY date issue. This is the prettiest example this cataloger can remember ever handling, and that includes several GEMS. This coin was allowed to sit in an old Wayne Raymond or Library of Congress album, for ages, likely received at the time of issue, and was able to acquire the vivid cobalt, amber, orange, and teal hues that grace the peripheries on both sides. Brilliant, silver luster glows vibrantly on both sides and the strike is sharp throughout. A tiny tick or two is all that limits this coin to the assigned MS64 grade, but the eye appears it is totally unique and something truly special to behold.

The 16-D is one of the famed keys of the 20th century. With only 264,000 were struck, most of which disappeared into circulation at the time of issue, remaining in commercial channels for a long time. These usually come in either Fair-2 to VG-8, or in lower grade Mint State coins. It is truly scarce in MS64 grade and RARE any finer! Regardless of the grade, there is always demand from collectors for a 16-D.

PCGS 109, NGC 62, CAC 14. We sold one for \$21,150 in our September 2018 Regency Auction and prior to that, one sold for \$22,800 in the 2018 FLN auction. The current PCGS Price Guide value is listed at \$25,000 and this date is truly RARE in GEM grades. With its intense toning and and SUPERB visual allure, we are certain this coin will exceed all expectations when it crosses the block. Bound for a wonderful collection of Mercury dimes--this is the type of coin that will set your set apart.

From our sale of the Grand Prix Collection, where we described this PQ GEM 1921 dime as:

Ex Bassano Collection, as noted on the insert. This coin is so high-end, even the world's pickiest collector will love it! We make no promises, but this coin does have potential for a +.

Only a single microscopic tick on the obverse keeps this magnificent piece from being a full MS67FB. The surfaces also have a satiny smooth texture. The luster is intense and lights up the coin. Both sides enjoy an even and booming layer of moderate original gold color. This is NOT a dull or drab coin. You do not need a glass to see the tul-split bands or the struck-up head of Miss Liberty. The eye appeal is just jaw dropping!"

PCGS 49, NGC 18, CAC 17. The current PCGS Price Guide value is listed at \$8,500. This coin sold for the first time since 2000 in our March 2019 Regency Auction for \$9,694. What an amazing GEM 21-D dime! Bold satiny mint frost shines on both obverse and reverse. The winged head of Liberty and the fasces on the reverse are all very sharply struck (of particular importance are the bands on the reverse, which are fully separated and rounded). A touch of subtle pastel iridescent toning can be found on both sides adding to the SUPERB eye appeal. Even under strong magnification we are unable to find a single mark worthy of mention.

PCGS 70, NGC 38, CAC 13. We sold one in October 2017 for \$10,281 and this coin sold in the 2019 FUN auction for \$5,040. We think this one is nicer than the other, and should bring more today than it did in January. The current PCGS Price Guide value is listed at \$7,500 and that value doubles a half point higher in MS66 FB. We love the look of this coin and it should bring a serious bid from the advanced Mercury dime collector. It will be at home in a great set.

Legend Rare Coin Auctions is honored to offer this 1931 S dime, the **SOLE FINEST** graded of this conditionally rare issue.

Truly **SUPERB** in every way! Bold, brilliant beam ing luster radiates strongly on both sides. The fields have a rich, flashy sheen that glows with a stunning vibrance. Sharply struck devices have a wonderfu , glossy texture to them that gleams with a seductive brilliance that contrasts against the delicately dusted gold iridescent toning. This is an amazing survivor of the date. Every detail is very well struck and fully formed, with crisp, full definition.

Like many issues struck from 1929 to 1934, the Great Depression resulted in few high grade examples for collectors today. Indeed as the nation sank deeper into the Depression, the need for coinage fell dramatically, the mintage of dimes fell to 1.8 million and because a dime did mean something to so many people suffering from the ravages of the economic situation, precious few were saved at the time of issue. That an example in such a lofty state of preservation still survives is just by chance!

PCGS 10, NGC 2 CAC 5 This is the **ONLY** MS67+ graded and **NONE** are graded finer. PCGS has not assigned a value in this lofty grade, but in non-"+" MS67 FB, the Collector's Universe value is listed at \$22,500. **10C 1939-D PCGS MS68 FB CAC**

The 1939-D is a date that comes really high end and really pretty. Very lustrous surfaces are aglow with luster that brings out dappled splashes of copper on the obverse and an even pastel apricot, rose, and lilac iridescence on the reverse. Well struck and very eye appealing.

PCGS 77, NGC 32, CAC 70. The most recent PCGS/CAC example sold in our August 2018 Premier Session for \$1,485; prior to that, the last one sold in October 2016. Worthy of a bid in excess of the current \$950 Collector's Universe value.

##### 10C 1939-S PCGS MS67+ FB CAC

This is a high end, condition census level coin with just one coin graded higher. This SUPERB coin is really among the FINEST KNOWN.

A rich, frosty luster has a brilliant satiny sheen that brings out the natural pale pastel iridescent hue on both sides. Nicely struck on both sides, the central band is fully split and the surfaces are essentially perfect. The quality is high end, truly worthy of the CAC bean and lofty grade.

PCGS 58, NGC 12, CAC 21. There are only six 67+ FB graded by PCGS and only a single MS68 FB graded finer. There have been five that have sold in auction, ranging from \$2,880 to \$3,995, and the current Collector's Universe value is \$4,500. KEEP IN MIND: the sole MS68 FB sold last in October 2000—there are kids going to college who were not even born yet when it was last sold. Truly worthy of a premium bid from the specialist collector.

##### 10C 1940-S PCGS MS68+ CAC

Glorious, SUPERB, and richly toned! Beautiful multicolored hues bathe both the obverse and reverse, a result of long term storage in a paper envelope or old album where it was able to sit unmolested for years. Stunning mint frost dances from below the toning. The strike is strong with nearly full band details on the reverse and the center band is just shy of being fully rounded and earning the FB designation.

PCGS 8, NGC 6, CAC 2. This is the only example to ever sell in auction, realizing \$5,523 in March 2019 and \$3,525 in our February 2016 Regency Auction. If this is your specialty, be sure to bid liberally.

Virtual perfection! A simply AMAZING, SUPERB GEM. Boldly lustrous, this coin offers a stunning, mint fresh eye appeal. The luster is strong, acting as a back light to the razor sharp devices. They really do stand out against the pristine fields. A beautiful example worthy of any high end set. You MUST realize how hard it is for MS68 FB dimes to get CAC approval!

PCGS 31, NGC 6, CAC 8. The most recent example to sell in auction was the Hallett Collection coin that sold for \$5,758 in our September 2018 Regency Auction. Prior to that, one sold for \$4,935 in April 2017. A real prize for the advanced collector working on a top ranking set.

**10C 1942/1-D PCGS MS65 FB CAC**

This is a beautiful example of this important World War II die variety. Bold, satiny, mint brilliance gleams on the glistening silver surfaces. The surfaces are generally smooth, free of all but the most insignificant traces of contact that you need a strong glass to observe. The devices are fully formed, crisply struck, and the overdate feature is bold, visible to the naked eye.

The Denver mint 42/1 is scarcer overall than its Philadelphia counterpart, and the under digit is not as bold as either. That is likely the reason why the Philadelphia mint overdate was discovered in 1943, while the 42/1-D was not discovered until the early 1960s! This is why most survivors are known in circulated grades. There are a small number of Mint State coins that are close to, or of GEM quality, but these are few and far between. This is a great example of this date.

PCGS 18, NGC 9, CAC 11. The last one to sell in auction was the Halett Collection coin which realized \$28,200 in our September 2018 Regency Auction. Prior to that, another sold for \$28,200 in the 2017 ANA auction. The current PCGS Price Guide value is listed at \$31,500. PCGS 311, NGC 201, CAC 72. PCGS has graded 38 in MS67+ FB.

The most recent example to sell in auction realized \$1,080 in the 2019 FUN auction. The current PCGS value is listed at \$1,250. A MS68 FB will cost close to the five-figures, making this MS67+ FB a great value for the collector.

**10C 1943 PCGS MS68 FB**

One of the absolute FINEST 1943 Mercury dimes that survives; indeed, just a single MS68+ FB is graded finer. Bold, satiny luster blooms on both sides. The reverse likely sat up against the end of a bank roll or old collector folder, as it is richly toned with a coppery-olive toning. Hints of iridescence are also dusted over the obverse accenting the smooth surfaces and sharply struck devices. The eye appeal is wonderful.

PCGS 9, NGC 3. The most recent example to sell in auction brought \$10,200 in the 2019 FUN auction and the current PCGS

Price Guide value is listed at \$10,500. UNIQUE finer, this SUPERB GEM will find itself at home in any top ranking Registry Set of Mercury dimes, and presents a VERY RARE opportunity for you to upgrade your set. Good luck!

This REMARKABLE SUPERB GEM is an old friend, a coin we had the pleasure of selling in December 2017, where it was described as:

"If this was a large canvas with these colors and patterns, with Jackson Pollack's signature, rather than on both sides of a SUPERB GEM 43-D dime, it would be hanging on a wall at M.O.M.A. Instead, you have the opportunity to add this colorfully toned Mercury dime to your collection!"

Both sides display a vivid multicolored pattern of green, gold, violet, magenta, and orange gold hues. The colors come to life when the bold luster catches the light. Well struck and boasting a great eye appeal, this gem is great for any toned set."

PCGS 44, NGC 26, CAC 18. This marvelous coin sold for \$2,703 in our sale and prior to that, two similar toned examples sold in 2014 realizing \$2,820 and \$3,055. This beauty belongs in a SUPERB set of toned type coins--anticipate strong bidding.

Delicate, pearly-silver iridescence gives this uber-GEM a great look. Sharply impressed by a forceful blow from the dies the devices are fully rendered and stand out. The surfaces are clean and free of any serious marks, regardless of how small or insignificant, and none affect the outstanding eye appeal.

PCGS 287, NGC 205, CAC 85. There are 26 in MS67+ FB at PCGS and 24 coins are graded finer at PCGS, all MS68 FB. The last three PCGS MS67+ FB CAC to sell in auction brought between \$630 and \$1,320 all in 2018. The current PCGS Price Guide value is listed at \$950, and it jumps to \$4,950 in 68. PCGS 10, NGC 4, CAC 2. The last PCGS/CAC example sold in auction back in August 2011, realizing \$1,725 and the current Collector's Universe value has not been updated, listed at \$1,750. Just 10 coins are graded finer—remember just how RARE these are! Rare and undervalued!

A real GEM example of this popular Civil War date Seated Liberty quarter. Bold, satiny luster blooms all over the smooth, generally problem free surfaces. The devices are well struck and frosty. The lightest dusting of clear gold is noted and intense magnification reveals a tiny tick or two, hidden in the design elements. Exceptional in terms of eye appeal. Amazing that this coin survived the ravages of the War Between the States.

PCGS 11, NGC 11. The last non-CAC coin to sell in auction realized \$4,200 over four years ago and the current PCGS Price Guide value is listed at \$5,500. Just 11 coins are graded finer at PCGS, none finer than a single MS67+. This high grade 1861 quarter is bound for a great Seated Liberty or Civil War set.

**25C 1875-S PCGS MS65+ CAC**

Conditionally RARE, this GEM is the second FINEST graded at PCGS, clearly a condition census piece. Boasting vivid mint brilliance that possesses a satiny/frosty glow that accents a sharp strike. The obverse has a pale, iridescent toning, while the reverse has a marble-like pattern of icy-silver blue, coppery amber-gold, and rich slate-pewter. The eye appeal is very high end and totally original.

PCGS 11, NGC 9, CAC 3. This is the ONLY MS65+ and just 3 graded finer. There are NO CAC approved MS66s so if you demand CAC approval, this is the FINEST graded. We sold a PCGS MS65 CAC (no +) for \$2,703 in our May 2018 Regency Auction and a PCGS MS66 sold for \$5,875 in February 2017. The current PCGS value in 65+ is \$4,000. In the art world, there are Rembrandts, Picassos's, and Cezannes. In the coin world one can say THIS coin ranks among the greatest original toned displays Mother Nature has ever done. The quality of the coin is remarkable too.

Remarkably clean and satiny smooth surfaces are all over. There is a touch of light irregular toning in the right field-not any scuffs. The reverse there seems to be an adjustment mark on the shield. There is one microscopic tick on the head (you need a glass to see it). A soft but fully glowing

luster beams from all over. All of the toning is 100% natural. It probably took Mother Nature years to create the iridescent color swirls on the obverse. Gorgeous rings of blue/green/violet/gold open into puffy original white surfaces. The reverse is puffy original white with a hint of gold. Miss Liberty and every detail is frosty and is fully struck. The eye appeal is so strong, your eyeballs will pop out and roll around!

PCGS 4, NGC 8, CAC 2. No PCGS CAC piece has ever been sold via auction for this date and grade. There is a Collectors Universe of \$17,500. We can't imagine this coin not by passing that number the day bidding opens.

This is a dealer's long held personal coin. We can tell you he struggled hard to let it go. You'll know whose coin it is if you attend the auction and see someone in the back with tears and tissues when it goes off. No joking around, this coin means that much to him. One look and you too will forever put this coin in a special place in your heart. Good luck. We expect strong bidding here. This is a 1 in a million type of SUPERB GEM toned piece!

Wow was PCGS showing no mercy the day this GEM came through the grading room! While we cannot guarantee that it will upgrade, if all examples were graded like this one, the series would be much stronger right now. Exceptional quality fields show off smooth, deeply reflective, shimmering watery mirrors. Both sides are bathed in a wonderful dappled iridescent patina; shades of olive, russet, slate, and gold really pop when a light hits the flashy mirrors. Adding to the outstanding look are the razor sharp devices that are fully frosted and stand out with full cameo contrast.

Only 500 Proofs were struck from this important Civil War year. PCGS 18, NGC 10, CAC 9. This is the only 64+ CAM graded at the service. The last regular PCGS PR64 CAM CAC brought \$3,055 in our December 2017 Regency Auction, and the last PCGS PR65 CAM CAC sold back in April 2011. Based on those numbers, the current Collectors Universe value of \$2,750 seems too cheap to us.

Deeply reflective mirrors beam all over in the fields. icy smooth and flashy, they offer a strong reflection with bold clarity. Both sides are framed by a bold colorful toning and the central portions of the design which are a brilliant silver. The devices are thickly frosted and show excellent striking definition. The surfaces show more mint made details than anything that happened after the coin was struck.

1,000 Proofs were struck. PCGS 1, NGC 0, CAC 4 (clearly the CAC population figures are off, we believe this coin counts at least two times). This appears to be the coin that sold in February 2012 for \$2,128. The auction database shows a result from our Regency Auction VI, but that was for a 64+ DCAM (sold for \$3,290 in February 2014). Since these so infrequently appear in auction the current PCGS value of \$2,100 seems cheap.

##### 25C 1868 PCGS PR64 CAM CAC

This is a very classic looking, border line GEM cameo Proof Seated quarter. Totally original with a toning pattern suggesting its place in an old collection. Deeply reflective mirrored surfaces gleam with a bold flash in the fields, which contrasts against the thickly frosted devices. Cobalt and orange-rose-gold tone graces the surfaces on both sides. There are a few tiny hairlines visible only with a glass in the fields, which is why this coin is "only" a 64; in the days before grading, this coin would have likely been called a GEM.

Only 600 Proofs were struck. PCGS 14, NGC 7, CAC 3. NO CAC-approved example has ever sold in auction. The current PCGS Price Guide value is listed at \$1,500. This seems way too cheap for a high end looking coin like this! This near-GEM is going to sell for a strong price due to its exceptional eye appeal.

Wow! What a stunning, SUPERB Cameo Proof Seated Liberty quarter. Totally untoned, the mirrors are ultra deep, offer the utmost clarity, and are extremely reflective. The fully struck design elements have a thick, white frost that really stands in contrast to the sleek, smooth mirrored fields. The surfaces are as bright and brilliant as the day it came from the dies. The eye appeal is AMAZING and this is one of the finer known 1882 Proof quarters graded in the CAM designation.

PCGS 22, NGC 10, CAC 14. There are 6 in PR66+ CAM. The most recent example to sell in auction realized \$3,525 in March 2015—that's a long time ago. The current PCGS Price Guide value is listed at \$3,750. Seems cheap to us—especially since none have sold in over four years. Just four have received higher grades in the CAM designation, and the only one of those to sell in the last six years is the PR68 CAM that sold in October 2016 for \$19,388. This coin is high end and should bring a serious bid!

This is a simply stunning GEM Proof Seated Liberty quarter that has a classic, old time look. Highly reflective mirrors have a blistering brilliance, deep clarity that beams from below a swirling blend of classic blue, aqua, and gold that yield to brilliant centers. We think this beauty sat undisturbed for years in an old album. Both sides, but especially the obverse, borders on cameo contrast between the devices and the fields.

Only 875 Proofs were struck, PCGS 42, NGC 49, CAC 3. No PCGS/CAC coin has ever sold in auction. It has been years since we have handled a PR65 that had such a killer look. This GEM will sell way above a typical PR65. You just do not see killer toners like this anymore and is worthy of a very strong bid from the collector of Proof Seated Liberty quarters, as these RARELY come this nice!

One of the big three Barber quarter dates, the 96-S saw a mintage of just over 188,000, most of which went straight into circulation. Evenly worn on both sides, with deep toning in the fields and lighter reliefs. A few old lines are noted for accuracy, but the eye appeal is better than decent. A KEY date rarity that eludes many collectors.

PCGS 15, NGC 3. Don't let the population fool you, only 1 PCGS VF20 has ever sold in auction, back in 2005! The current PCGS value is listed at \$3,000 and we think this coin will bring that or more today.

A lovely, high grade 1902-O quarter, a remarkable condition rarity in the series. Among the highest graded from an original mintage of 4,748,000, this totally original toned GEM is tied in grade with the Clapp-Eliasberg, FS-Thomas and Pittman-Friend-Duckor coins, putting it in special company in the condition census.

Brilliant satiny luster blooms all over, bringing out the coppery-gold and dappled cobalt that is seen on the obverse; the reverse is mostly untuned with a pearly/silver hue. A strong glass and extremely

careful inspection reveals a few tiny lines that are masked by the extremely attractive color. We are not entirely sure what CAC was seeing when they did not ban this PQ GEM.

PCGS 9, NGC 1. The most recent MS66 example of this date was the Gene Gardner coin, graded by NGC, and sold for \$7,050 in October 2015. This is NOT that coin. There are just five coins graded finer, most in MS66+. In MS66 the current Collectors Universe value is listed at \$8,500. The Eliasberg example is CAC approved and most recently sold in May 2010 for \$14,950. We will find out when the hammer falls on this high end beauty what the current value is. Good luck!

Ex Duckor-R S D. Collections, as noted on the insert

A marvelous SUPERB GEM from one of the more famous sets of Barber quarters ever assembled. It is not a shock as to why it has now been in two GREAT collections - it is THAT high end!

The toning on both sides is a marvel to behold! Clearly this coin sat for ages wrapped in tissue and then placed into an old collector envelope. You can see the tiny folds from the tissue impressed in the toning

as subtle breaks in the color. Coppery-orange-rose color blends with a slate-blue, icy lilac, and rosy-pewter. The hues are vividly brought to life by a strong satin-like mint frost that glows from below the color. Even using a strong glass, we are unable to locate a single flaw or any area of striking weakness. You cannot beat the eye appeal!

PCGS 5, NGC 2, CAC 8. Clearly there is duplication in the CAC populations. The most recent example to sell in auction realized \$9,988 in our Regency Auction 25, which was the former Gene Gardner coin. A single MS67+ is graded finer. The current Collectors Universe value is listed at \$10,000 and in 67+ the CJ value is listed at \$15,000. We can understand if this SUPERB coin brought a RECORD price!

Richly and deeply toned, this is a wonderful GEM example of this conditionally rare date. This one has a wonderful layer of deep multicolored patina that shows off subtle shades as it's rotated in a light. Well struck and very pleasing, this one is a real delight to behold with totally original eye appeal.

PCGS 14, NGC 13, CAC 7. This is the ONLY MS65+ graded, and there are only 11 finer, with a single MS68 being the finest. The current PCGS price is \$4,250 and we suspect that bidding on this GEM will exceed that level! A real prize for those demanding eye appeal and originality.

Ice like deep and powerful mirrors beam from all over. The mirrors have slight frost but are clear and clean. When you twirl the coin it looks like a freshly formed sheet of ice. Both the flash and contrast are powerful. Miss Liberty and the details are needle sharp in strike and of course, enjoy thick frost. The eye appeal is sensational!

ONLY 792 were minted. PCGS 7, NGC 8, CAC 9. The last PCGS CAC PR68 Cameo to sell in auction had toning. It sold for \$12,925 in August 2017. PCGS 7, NGC 15, CAC 17. PCGS has graded 6 in PR67+ Cameo. The last one to sell brought \$7,763 in November 2011! That was 8 LONG years ago! This is not a coin that makes appearances at shows or auction with any frequency. If you are building a black and white set, this for sure will be a tremendous addition. If you just want a coin you can stare at-this is it!

 FROM THE R.S.D. COLLECTION.

Richly toned with a warm pastel iridescent patina on both sides, the subtleties of the coloration come out as the rich watery reflective mirrors catch the light. The mirrors are generally smooth and free of all but the tiniest hairline or two, without those, this coin would likely be an 8! Thickly frosted devices stand out against the mirrors, especially on the reverse which is like a headlight! Amazing and very highly eye appealing!

Only 762 Proofs were struck. PCGS 15, NGC 25, CAC 16. PCGS has graded PR67+ CAM. The only CAC approved example in this grade was graded by NGC and sold eight years ago in the 2011 ANA auction. The current Collectors Universe value is listed at \$6,150 VERY RARE any finer and this coin is marvelous for type or date purposes and we can see it bringing a substantial bid. A world class coin for a world class set!

 FROM THE R.S.D. COLLECTION

A virtually untoned and high end PQ GEM that is truly marvelous to behold. Sharply struck frosted devices that provide a nice contrast to the glittering, deeply mirrored, and ultra reflective fields. A gentle dusting of pale gold attests to the originality, making this an outstanding example of Charles Barber's popular design.

Only 846 Proofs were struck. PCGS 10, NGC 11, CAC 4. Listed in the PCGS Price Guide at \$3,750 and NONE have ever sold in auction. Bound for another great collection of Proof Barber quarters and will delight the next owner for sure!

**LOT 256**  
**25C 1901 PCGS PR66+ CAM CAC**

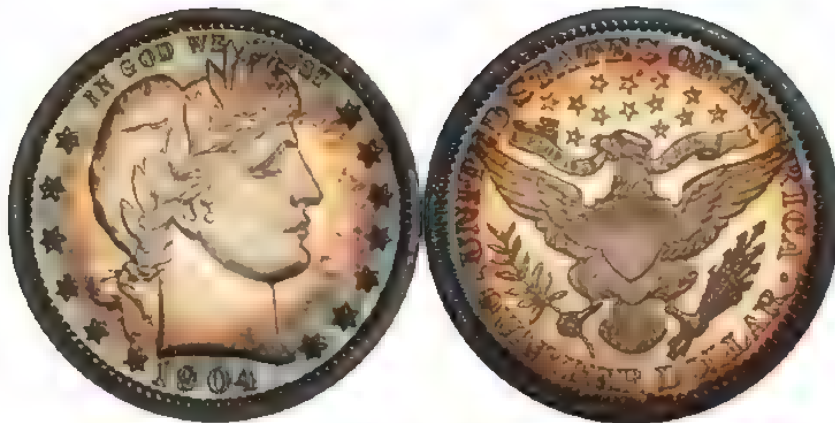

A borderline SUPERB GEM example that boasts an amazing blast white, untuned gleam.

A booming reflectivity in the fields is deep and offers a bold clarity. The frosted devices are fully struck and crisp providing a vivid white contrast to the reflective depths of the mirrored fields. Were it not for a tiny line in the obverse field, this coin would have likely graded PR67 CAM. The eye appeal is exceptional!

Only 813 Proofs were struck. PCGS 26, NGC 9, CAC 9. There are just 2 in PR66+ CAM, neither of which have ever sold in auction. The comps are: A PCGS PR66 CAM CAC that sold in our March 2019 Regency Auction and a PCGS PR67 CAM sold in our May 2018 Regency Auction for \$5,640. The current Collectors Universe value is listed at \$3,450 and a GEM of this quality and eye appeal should sell for more. We have said for years that these seem too cheap—we still believe now is the time to build a gem set of Barber proofs.

WOW, WOW, WOW! There are never enough WOW's you can use to describe this amazing SUPERB GEM. For sure it is a borderline Deep Cameo too!

Electric borderline ULTRA deep mirrors smack you in the face and beam almost blindingly from all over. The mirrors are the ultimate in clarity and cleanliness. When you twirl the coin you are simply mesmerized by the intense flash. The contrast makes this coin look like it was carved out a fresh block of arctic ice. Miss Liberty and the details are needle sharp in strike and have thick creamy white frost. The eye appeal is totally insane!

Only 575 were ever minted. PCGS 2, NGC 3, CAC 7 (obviously there was a regrade or two). It is important to note the other PCGS piece last sold in 2012 with no CAC bean for \$12,925.  FROM THE R.S.D. COLLECTION.

This is truly an AMAZING SUPERB GEM Proof 1909 quarter that is tied for FINEST graded at PCGS with just one other. The flashy, flawless mirrored fields and thickly frosted white devices stand out with a nearly DCAM contrast. Stunningly smooth fields are the epitome of deep, clear reflection that beam from all over. The untoned surfaces are SUPERB, technically, aesthetically, and high quality, looking as fresh today as it did 110 years ago when it came off the press.

Only 650 Proofs were struck. PCGS 7, NGC 11, CAC 9. PCGS has graded just 2 in 67+ CAM and NONE FINEER. Neither example has ever sold in auction, but a non-CAC PR67 CAM sold for \$11,700 in the 2018 FUN auction. We think the current Collectors Universe value of \$6,150 is way too low! We expect this coin to sell for more than that for sure.

 Simply beautiful and bordering on DCAM contrast! The eye appeal of this stunning SUPERB GEM is absolutely high end!

Bold black and white contrast, with highly reflective deep beaming mirrored fields against thickly frosted reliefs. Untoned, this coin looks today as it did the moment it left the coining dies!

Only 543 Proofs were struck. PCGS 11, NGC 10, CAC 12. The most recent example to sell was the monster toned Young-Dakota coin we sold in March 2019 for \$12,338; that same coin sold for \$8,519 in February 2015. This gorgeous coin should bring a strong bid from the Barber quarter specialist. Good luck!

A simply gorgeous PQ GEM example of this Proof quarter, one of only 380 struck. Deeply reflective silver surfaces beam with bold watery mirrors. The devices show a rich, thick frost, especially on Liberty's neck and cheek. Pale blue and gold patina caresses the rims, most notably on the reverse. The eye appeal is quite nice and very high end for the assigned grade.

Only 380 were struck. PCGS 11, NGC 11, CAC 16. PCGS has graded 6 in PR66+ CAM and clearly that number must include duplication in an attempt to get a 6/7 grade. The most recent was an untoned example we sold in March 2019 for \$7,638. These are rarely ever seen in auction and this one should be very hotly pursued by Proof Barber collectors. Ex Denali Collection, as noted on the PCGS insert

This is a simply STUNNING SUPERB GEM example of this final Proof Barber date. Among the absolute FINEST graded examples at PCGS, this PR67+ has all the attributes that advanced collectors demand from their coins.

Ultra flashy mirrors beam from all over with a watery reflective sheen that dazzles the eye. A lovely layer of totally original toning has a very unique pattern that is a delight to behold. Multihued, iridescent paste tones are brought out when viewed in a light. Sharply struck devices and icy smooth mirrors are flawless and pristine. The eye appeal is amazing.

The mintage of 450 is one of the lowest in the series. PCGS 17, NGC 13, CAC 14. While PCGS lists 6 in PR67+, we believe there is a lot of duplication there, as only one has ever sold in auction. That coin, the Cheyenne Collection, coin sold for \$9,694 in our December 2016 Regency Auction. The current PCGS Price Guide value is \$11,500 and only 2 are graded finer, neither of which have ever been offered publicly. This is a real prize for any top tier set of Proof Barber quarters.

##### 25C 1924-S PCGS MS66 CAC

What a lovely Premium GEM! This coin is well struck for this date that often comes very weak; Liberty's head shows the outline of the 2 leaves and most of the outline of her hairline. The shield likewise is very bold, with complete definition on all but three of the prongs. A seductively lustrous coin has a vibrant brilliance that really catches your eyes as it traces over the bold devices. Light, dappled multicolored, old envelope-like toning dances on the surfaces as the luster beams in the light.

PCGS 36, NGC 19, CAC 14. Going back to October 2011, PCGS/CAC examples have brought between \$4,000 and \$5,400 and the current PCGS Price Guide values listed at \$4,250. Keep in mind that with a slightly stronger Head, this would be a \$25,000+ coin! With its great eye appeal, we think this one will bring a very strong price when the gavel finally falls!

##### 25C 1927 PCGS MS66+ FH CAC

A borderline SUPERB GEM 1927 quarter that is fully struck, exceptionally lustrous, and stunningly well preserved. Looking essentially as fresh today as it did 92 years ago when it left the mint. Very attractive for the date. While not a rare date in an absolute sense, it is exceptionally RARE in such a lofty grade.

PCGS 78, NGC 35, CAC 16. PCGS has graded 9 in MS66+ FH and just 7 finer. Eye appeal-wise, this one is heads above the one we sold for \$2,820 back in October 2017. This one should bring a very strong bid, keeping in mind the five figure price tag a 6/7 FH would carry. Good luck!

#### LOT 265

##### 25C 1930-S PCGS MS67+ FH CAC

Among the very FINEST graded for this final Standing Liberty date. Sharply struck throughout, with just a touch of softness on the shield, you do not have to imagine the fullness of the head details. Boldly lustrous with a satiny finish. The silvery surfaces are icy smooth with a delicate glint of pale, pastel toning that really adds a lot to the exceptional eye appeal. To see this coin is to fall in love. Great for a type or date set.

PCGS 35, NGC 31, CAC 26. There are six graded 6/7+ FH at PCGS and just a single MS68 FH finer. Last year two examples sold in auction, one in December for \$10,000 and one in June for \$22,500. The current PCGS Price Guide value is listed at \$15,000 and this is a premium quality example worthy of any top tier Registry Set of Standing Liberty quarters.

**LOT 266**

**25C 1932 PCGS MS67**

Tied for FINEST graded 1932 quarter. Truly a SUPERB example of the first year of the long lived Washington quarter series. Initially struck as a circulating commemorative for the bicentennial of Washington's birth, the design was so popular that after a one year break in 1933, the design was adopted for use, changing only in 1975/76 for the bicentennial, until the end of the series in 1998.

The lustrous coin offered here is very high end, boasting a great look. The surfaces have a bold, radiating mint luster that really

blooms in the fields. There is a touch of peripheral gold on both sides, adding to the exceptional eye appeal. Sharply struck devices are fully frosted and stand out. High quality surfaces show just a few minor ancient lines under intense scrutiny with a glass. Among the TOP TEN graded examples, this coin will delight any high ranking Registry Set collector.

PCGS 10, NGC 6. The most recent example sold for \$9,600 in April 2019 and prior examples have sold for as much as \$18,000 in June 2018. The current Collectors Universe value is \$14,000. With NONE finer, this coin will see fierce bidding. Good luck!

Bank roll fresh! Clearly this is one of the few MS68s that have come out recently and we have offered our fair share of the SUPERB beauties over the last couple of years.

A vivid luster graces both sides and a delicate golden-sky blue iridescence blends on the obverse with hints of olive and champagne. Well struck and very eye appealing!

PCGS 18, NGC 7, CAC 10. The most recent examples to sell brought \$5,053 in our January 2019 Regency Auction (that coin was NOT CAC). The current Collectors Universe value is \$6,000. Even though these seem to be offered with some frequency, there are NONE FINER, making it an excellent type coin for a very high end type set!

**OUR ESTIMATES**

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin.

The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

the blues, golds, reds, oranges, and greens boom in the light. The eye appeal is beyond imagination!

PCGS 3, NGC 3, CAC 3 The last one to sell brought \$17,038 in the 2013 FLN auction. Prior to that, one sold in April 2010 for \$17,256. Today the PCGS Price Guide value is listed at \$17,500. This coin is worthy of the FINEST set of Washington quarters and will bring a very strong bid! DO NOT let this opportunity pass you by!

There must have been something magical in the paper used in some 1958 Mint Sets, as this coin is a beast! Awe inspiring toning drapes the entire obverse surface with bold blues, greens, pinks, golds, and every shade in between that just GLOW vividly all over. The surfaces are flawless and the devices are sharply struck. Offering a very similar color pallet to the record shattering Franklin half dollar we sold for \$129,250, this monster will fit into any amazing toned coin collection.

PCGS 217, NGC 300, CAC 108. There are 30 graded MS67+ at PCGS and just three MS68s finer. This amazing SUPERB GEM will shatter any auction record for the grade and will bring a beyond moon price. #### LOT 272

##### 50C 1794 PCGS VF35 CAC

O-101. This is one of the highlights of the present sale, a perfect collector grade example of this first year of issue of the half dollar denomination. Rich dove gray shows soft accents of pewter and russet-tan on the reliefs. Smooth problem free circulation on both sides. Even under strong magnification, the surfaces are free of any serious marks, signs of cleaning, environmental damage or any other post minting flaws, though we do note some very faint traces of the lightest planchet adjustment marks made at the mint, but these are limited to the extreme lower right periphery. The eye appeal is very high end for the grade, and we have seen XF40s that do not have the outstanding visual allure that this totally original "gem" VF has.

PCGS 24, NGC 18, CAC 10. The last PCGS/CAC example sold back in November 2012 for \$28,175. More recently an NGC/CAC coin sold for \$24,675 in the 2017 ANA auction. Clearly the current Collectors Universe value of \$22,500 does not take into account the high end quality of this one.

##### 50C 1795 PCGS XF45 CAC

So many superlatives could be used to hype the amazing quality and eye appeal of this "GEM" XF! However, its numismatic credentials more than speak for themselves! A condition census O-119. Exceptional quality for the date and grade with hints of luster that glow through pearly dove and gold iridescent toning on both sides. Sharply struck with nothing but light problem free wear. There are a few inconspicuous adjustment marks that blend into the hair details. The Overton-Parsley condition census is 55,40,30,25,25 for this R-4 die marriage.

PCGS 50, NGC 36, CAC 14. The most recent PCGS/CAC example to sell in auction brought \$12,338 in a March 2019 auction, and before that, one brought \$12,000 in the 2018 FUN auction. This example is finer quality than those examples and should command a premium bid. What a great coin for any type or early half dollar set. The eye appeal is truly spectacular!

##### 50C 1809 PCGS AU58 CAC

Richly and deeply toned, this is a wonderful GEM example of this conditionally rare date. Only 784,000 were struck and very few were saved from circulation; this date is VERY RARE in GEM and finer grades; each one is a marvel of survival. This one has a wonderful layer of deep multicolored patina that shows off subtle shades as it's rotated in a light. Well struck and very pleasing, this one is a real delight to behold with totally original eye appeal.

PCGS 14, NGC 13, CAC 7. This is the ONLY MS65+ graded, and there are only 11 finer, with a single MS68 being the finest. The current PCGS price is \$4,250 and we suspect that bidding on this GEM will exceed that level! A real prize for those demanding eye appeal and originality.

#### LOT 275

##### 50C 1809 XXX EDGE, PCGS AU55 CAC

O-102. This is a very easily identifiable die marriage thanks to the "row of segments" in the field between the eagle's head and ribbon. The experimental XXX edge is often seen on this R-1 die marriage, making it a perfect one for a Red Book variety set. An interesting coin that is an intermediate die state with the cracks described in Overton for O-102a, but with none of the reverse cracks.

Satiny luster clings to the pewter-like toned surfaces. Traces of rose and gold can be seen when the surfaces are rotated in a light. Well struck on both sides, there is just a touch of wear on the highest points which is long toned over and the eye appeal is excellent for the grade.

PCGS 13, NGC 2, CAC 7. We were the last auction company to sell a PCGS/CAC AU55 in auction, a different example that realized \$5,523 in our September 2018 Regency Auction and the current PCGS Price Guide lists a value of \$5,650, and the value doubles to \$11,000 in 58. A great coin worthy of a strong bid from any Capped Bust half dollar specialist! Good luck!

O-101a. A very PQ AU58 14/3! Interesting die cracks and clashes add lots of character to this popular early overdate. Displaying an even light gray tone with soft blue and lilac hues come out with vivid hints of original luster that shines through. Only the slightest hint of rub on the highest points of the design keep this out of the Mint State category. During the striking of half dollars using this die pair the dies clashed and cracked multiple times, and each of these cracks and clashes appear on this specimen.

PCGS 19, NGC 5, CAC 4. The last PCGS/CAC coin to sell in auction realized \$3,600 in February 2018. The current PCGS Price Guide value is listed at \$4,250. EXTREMELY RARE in Mint State, only 17 coins have graded so in 33 years of grading at PCGS!

The reverse is nearly fully proof like and the eye appeal is amazing. We especially love the rich blues that dominate the patination. Truly a unique near-GEM.

PCGS 29, NGC 22. The current PCGS Price Guide value is listed at \$5,500 and recent APRs are in the \$3,850-\$4,113 range, a coin like this, with its awesome toning, will defy previous auction results.

High end, beautiful, lustrous, and original: these are just a few words that come to mind when we view this awesome Seated half dollar.

Rich sunset toning shows shades of crimson, gold, amber, and tangerine that blend marvelously together over the satiny lustrous surfaces. There are a few deeper toning dots on the reverse. The devices are sharply struck and are fully frosted, they stand out against the ultra smooth problem free surfaces. The eye appeal is very bold.

PCGS 15, NGC 6. The most recent example to sell in auction realized \$12,600 in November 2017 and the current PCGS value is listed at \$21,000. There are just four coins graded finer, 2 in 66+ and 2 in 67. This is an excellent GEM example of this short lived type. Worthy of a very cool type set or advanced set of Seated Liberty halves. #### 50C 1876-CC PCGS MS66+ CAC

The SOLE FINEST KNOWN to PCGS, this is a stunning and totally ORIGINAL, Premium Quality GEM. Everything about this coin is high end!

Possessing a classic, old time collection look, this beauty has a warm, pearly pewter-silver glow in the central obverse, ringed by honey gold, coppery amber and aqua teal at the rims. The reverse is a satiny teal-tinted pearly pewter with light lilac accents. Every detail is struck up with razor-like sharpness; fully and crisply rendered by a precision blow from the dies. This is the Small CC variety. The reverse shows a network of spidery die cracks that essentially encircle that side.

This coin has a classic look, reminiscent of many old time, classic collections. We can tell you that it is not the Eliasberg, Newman, Gardner, nor Battleborn Collection. The curious specialist could spend hours searching old auction catalogs trying to find this GEM, but we have not been able to locate previous auction appearances.

PCGS 7, NGC 2, CAC 5. This is the ONLY MS66+ and it has never sold in auction before. The Gardner coin, which was the most recent PCGS/CAC MS66 (non-+), sold for \$17,625 in October 2014. The Battleborn coin sold in the 2012 ANA auction for \$18,800 (also a non-+ PCGS CAC MS66). The uncertified Eliasberg coin, which Bowers & Merena called MS66 and was not graded sold for \$25,300 in April 1997. Unpriced in the PCGS Price Guide, this stunning GEM should bring a serious bid from anyone building a top set of Seated half dollars or Carson City coinages. We can see this one bringing a world record price and is bound for a world class set!

What a mind boggling stunning borderline PR68 coin! Legend Numismatics sold this to a very picky collector who has extremely high standards for his coins: they MUST be vividly toned and VERY high end for the grade. This coin has been off the market since 2011. Now this coin is pure Legend quality!

Intense super deep mirrors really beam boldly from all over. They have amazing clarity, are perfectly clean, and are nearly blinding in reflection. The mirrors look like freshly made glass. A neon like mix of

total y original royal blue/amber/purple/pale tangerine colors dominates both sides. Mother Nature sure did some great work here. Miss Liberty and the details are super frosted and have bold full strikes. The eye appeal is incredible!

ONLY 710 were minted PCGS 6, NGC 4, CAC 6. There are four PR67+ graded and this is tied for the FINEST 1887 Proof graded at PCGS. This coin last sold back in 2011 for \$16,100; that is an ice age ago! The current PCGS Price Guide lists a value of \$18,500, and we hardly ever see any GEM Proof Halves as vividly toned as this anymore. This is a great coin to put away-especially at the current levels. We expect strong bidding for this gorgeous near PR68 GEM!

**50C 1892 PCGS MS67 CAC**

Truly one of the most eye appealing 1892 Barber half dollars we have had the honor of offering! We really love it! Not only is this coin among the finest graded at PCGS, the quality is VERY high end.

While the mintage of this first year issue was sizable at 934,000, few survived in SUPERB GEM grades and there is constant demand for it for type set purposes. This wonderful MS67 is vivid in its bold, satiny luster which brings out the outstanding multicolored shades of blue-gold, rose, and iridescent patina. The details are sharply impressed on both sides and the satiny surfaces are smooth, free of any distractions anywhere. The melange of color, bold luster, and sharp definition really sets this one apart!

PCGS 9, NGC 6, CAC 10. The most recent example sold for \$12,338 in our January 2019 Regency Auction, but that coin, while pretty, was not as attractive as the presently offered coin. This coin has been off the market since August 2011, where it sold for \$14,375. Keep in mind that only five coins have graded finer, and a 67+ will be worth in the \$20,000-25,000 range and a 68 will cost \$65,000+! Bound for a world class collection and will attract intense bidding from type and specialist collectors alike!

**50C 1912 PCGS MS66 CAC**

This GORGEOUS GEM 1912 half dollar ranks among the FINEST graded at either service. Not only is its stunning visual allure all there and then some, so is the outstanding technical quality!

Sharply struck devices have a thick frost that stands in contrast to the satiny lustrous surfaces. Both obverse and reverse are awash in a rich burnt orange and amber with iridescent olive, rose, and lilac-pewter accents. Just a touch of striking weakness is noted for accuracy, which is typical of the date. The surfaces are devoid of any but the most obscure trace of contact. The eye appeal is exceptional!

PCGS 4, NGC 0, CAC 4. The other only other PCGS/CAC example to sell in auction was the one we sold in our Regency Auction 30 from the Formula 1 Collection, which brought \$8,519 and the current PCGS Price Guide value is listed at \$9,500. Only the Akers/Duckor MS66+, which sold for \$23,000 in August 2010 is finer. This amazing GEM is worthy of any high ranking Registry Set of Barber halves. We anticipate strong bidding for this beauty!

**LOT 283**

**50C 1912-D PCGS MS66+**

An impressive GEM, tied for SECOND FINEST graded at PCGS, with only one MS67 finer.

A pearly, satin like mint frost lights up the pleasing iridescent golden-brown toning on both obverse and reverse. Nicely struck and displaying only a few teeny, stray ticks, but the eye appeal is quite nice.

PCGS 4, NGC 1. The last one to sell realized \$4,348 but was CAC-approved. The current PCGS value is listed at \$6,750. Since only one coin is finer at PCGS, if you are building a Registry Set, be sure to take a look at this high grade 12-D. It is our strong opinion these are just too cheap today!

**PCGS# 6525 | ESTIMATE: \$3,600+**

**LOT 284**

**50C 1900 PCGS PR66+ CAM CAC**

An amazing and eye appealing SUPERB GEM 1900 Proof half! This snazzy, borderline PR67 screams with awesome colors! PCGS showed no mercy here. Boldly contrasted fields and reliefs are covered by a blanket of rich iridescent toning from years of storage in the original mint holder. Deep, glittering mirrors are incredibly clean, clear and boldly reflective. A small planchet flake on the neck is what we believe is holding this piece back from a loftier grade. The surfaces are evenly covered by an original olive/forest green/gold/reddish gold/blue/purple/magenta mix. Miss Liberty and the details are thickly frosted and sharply struck. About as pleasing and original a piece you can hope to see--the eye appeal is outstanding!

Only 912 Proofs were minted. PCGS 20, NGC 25, CAC 20. There are 7 coins graded PR66+ CAM, and only 8 are graded higher in the CAMEO designation at PCGS. The current PCGS value is listed at \$5,250, and this coin at one time sold for \$7,050. It is extremely high end and should sell for a very strong premium bid when it crosses the block. Keep in mind a PR67 CAM CAC will likely cost five figures! Add this SUPERB coin to your collection.

##### 50C 1909 PCCS PR68 CAC

Stellar in both technical and visual qualities, this is one of the FINEST 1909 Proof Barber half dollars ever graded, and is a SUPERB example of the type.

Totally original, deep, multi-colored patina is thick, but does not drown out the highly reflective underlying mirrors, which offer a bold, icy flash in the fields. Swirls of blue, gold, peach, orange, rose, and violet bloom all over. The visual allure is something truly special to behold!

Only 650 Proofs were struck. PCCS 8, NGC 6, CAC 7. The last one to sell realized \$13,800 in January 2019 and prior to that, we sold one for \$13,513 in our July 2018 Regency Auction. The current PCCS Price Guide value is \$17,500. Just a single coin is graded finer in the non-CAM designation, a PR68+ that has never sold in auction. This is one of the very finest you will ever see, and deserving of placement in a world class collection!

#### LOT 286

##### 50C 1916-D PCCS MS66 CAC

The first of the Denver Walkers, and with a mintage of barely over 1 million, these are quite scarce in GEM, and VERY RARE finer than MS66. Bold satiny luster sets the smooth, problem-free devices aglow with a warm brilliance. Pearlescent and light toning at the right obverse periphery accents the smooth surfaces and sharply struck devices. Totally original, the eye appeal is amazing.

PCCS 74, NGC 36, CAC 27. The most recent PCCS/CAC coin sold for \$4,080 in the 2018 ANA auction and the current PCCS Price Guide value is listed at \$5,000. Just a half a dozen coins have been graded finer, 2 in 66+ and 4 in 67 (no 67 has sold in 15 years!) A great coin for any high-quality set! Bid accordingly.

##### 50C 1917-S REVERSE. PCCS MS64 CAC

This is a very unique 17-S Reverse half dollar. Normally seen with a pewter or pearly silver patination, this coin is toned with a peach-gold, apricot-orange color with accents of the original silver shining through. Well-struck and lustrous, the surfaces are very clean and free of distracting lines or marks. The eye appeal is great.

PCCS 282, NGC 226, CAC 43. The most recent example sold for \$2,160 in March 2019 and prior to that, one sold for \$2,640. Very scarce in GEM, this very pleasing, toned near GEM is worthy of a strong bid.

PCCS# 6573 | ESTIMATE: \$1,800+

**LOT 288**  
**50C 1918 PCGS MS66**

This impressive GEM is tied for FINEST graded at PCGS and NGC! Conditionally VERY RARE, despite a mintage of over 6.5 million pieces.

A frosty, satin luster blooms from all over on this exceptionally eye-catching GEM. A pearly, iridescent overtone offers a soft pale golden color that is brought out by the glowing luster. Crisply

struck throughout, the intricate details of the design are fully brought out on both sides. The fields and devices are clean, without any marks of consequence worthy of mention. The eye appeal is quite nice.

PCGS 11, NGC 7. The four most recent examples to sell were CAC approved-- you have to go back a decade to find a non-CAC example selling in auction. The most recent of the four CAC-approved coins sold for \$21,738 in our January 2019 Regency Auction 30, and the current PCGS Price Guide value is listed at \$20,000. There are NONE GRADED FINER at either service, making this a prime Registry Set contender!

**PCGS# 6574 | ESTIMATE: \$18,000+**

**LOT 289**  
**50C 1918-S PCGS MS64+ CAC**

All the early branch mint Walkers are scarce to RARE in high grades, the 18-S is no different. This very CHOICE MS64+ has a bold look. Exceptionally smooth surfaces offer a pearly, satin sheen. The devices are generally well struck for the date with just some weakness at the central portions of the obverse, which is typical. Totally ORIGINAL, the eye appeal of this near GEM is enhanced by a dusting of iridescent, pearly gold on both sides and the eye appeal is wonderful for the grade!

PCGS 569, NGC 249, CAC 64. PCGS has graded 73 in MS64+, and is RARE any finer. The current Collectors Universe value is listed at \$4,350 and we sold the last two PCGS MS64+ CAC examples in auction, realizing \$3,525 and \$3,643. Keep in mind a PCGS/CAC MS65 will cost well in excess of \$20,000! This near-GEM is a great piece to add to your collection.

**LOT 290**

**50C 1920-D PCCS MS65+ CAC**

WHOA! This is just a stunning 20-D half! Truly a high end, Premium Quality GEM that is among the FINEST KNOWN. This is the ONLY MS65+ and there are seven coins reported on the PCCS Population Report in MS66 as the FINEST.

Exceptionally smooth, frosty fields have a thick, satiny mint luster that gleams all over on both sides. The fields and devices are free of any distracting marks of any kind. In fact, even with the aid of a powerful loupe, we are unable to detect anything other than the barest trace of contact anywhere. The surfaces have a stunning pearlescent texture all over that shimmers around the sharply struck up devices. Every intricate detail is essentially fully formed; even the thumb has a bold outline, and all the drapery lines are fully formed.

The eye appeal is spectacular in every way.

PCCS 47, NGC 15, CAC 8. This is the ONLY MS65+ at either service. The last regular PCCS MS65 CAC sold for \$27,025 in our September 2018 Regency Auction and a PCCS MS66 CAC sold in the 2018 FUN auction for \$87,000. This is a PREMIER example of this conditionally VERY RARE early Denver Walker and will be hotly contested when it crosses the block and we expect it will surpass our estimates easily.

**PCCS# 6581 | ESTIMATE: \$22,000+**

Lilac iridescent pastel hues blend for to create great look. One look at this GEM and you will not forget it!

PCGS 77, NGC 37, CAC 27. This coin was sold for \$8,519 in our September 2018 sale of the Sommelier Collection. Prior to that, we sold one that was not as beautifully toned in our May 2018 Regency Auction for \$9,694. The current PCGS Price Guide value is listed at \$9,500 and there are only 15 graded finer. The Duckor coin had a similar color and brought \$9,600. This is a great coin for anyone looking to add a terrific example to their set.

High end everything! Frosty and satiny smooth, this lovely GEM has a great look. The patina is a soft pearly iridescent silver and a warm frosty luster accents the sharply struck up devices. The eye appeal is unimpaired by any serious marks or any type of contact.

PCGS 219, NGC 83, CAC 50. The last PCGS/CAC coin sold in January 2019 for \$2,585 and the current PCGS value is listed at \$2,500. Very scarce any finer and this GEM is worthy of a great Walker set.

**PCGS# 6589 | ESTIMATE: \$2,500+**

economic activity dropped, and demand for coins fell dramatically. There was another gap of three years where no half dollars were struck. When coinage resumed in 1933, only 1,786,000 were struck, and only at the San Francisco mint.

PCGS 114, NGC 60, CAC 44. In the last year, four have sold in auction, ranging from \$4,200 to \$7,931 (that coin was from our September 2018 sale of the Sommelier Collection). The current PCGS Price Guide value is listed at \$8,500 and keep in mind there are just 30 finer at PCGS, and this one is very high end, so it will bring a strong price for sure. Be prepared if you are looking to add a truly PQ example to your set, bid strong for this one.

**50C 1936-D PCGS MS67 CAC**

This piece is a splendid example of a date and grade that is seldom seen. Not only that, the quality is HIGH END.

The surfaces are clearly above average in terms of cleanliness and exceptionally satiny texture. You don't need a strong glass to see how delightfully and totally clean the dreaded right field is. Both sides have an original satiny-creamy white silver hue with a faint blush of gold. Miss Liberty and the details are frosty and have sharp strikes. The eye appeal is exceptional!

PCGS 50, NGC 26 CAC 22. The last one to sell in auction brought \$6,463 in our March 2019 Regency Auction; prior to that one sold for \$7,800 in the 2018 FUN auction. Of course lesser coins can be bought for cheaper prices. If you are into real HIGH end quality, this is the coin for your set!

Sharply struck up and boldly lustrous, this 39-D half dollar has a mint fresh look. The satiny surfaces are clean and brilliant with no visible imperfections and the eye appeal is excellent.

PCGS 116, NGC 75, CAC 71. We sold one in our August 2018 Premier Session auction for \$1,430 and the current PCGS Price Guide value is listed at \$1,650. Clearly rare any finer, with just 13 graded higher.

**PCGS# 6607 | ESTIMATE: \$1,100+**

**LOT 298**

**50C 1940 PCGS MS68 CAC**

This coin is love at first and every sight! Tied for FINEST graded at PCGS. A silky, brilliant virtually perfect SUPERB GEM! All of the design elements are fully and crisply rendered by an exacting, precise blow from the dies. Lovingly cared for since the coin came off the dies, the surfaces are pristine and immaculate. The luster is absolutely brilliant throughout. A delicate dusting of iridescent toning of gold/lilac/pale blue attests to the amazing originality and adds to the already SUPERB eye appeal.

PCGS 29, NGC 19, CAC 23. The most recent example to sell was in our November 2018 Regency Auction, which realized \$9,106, but there is a wide range of APRs. The current Collectors Universe value is \$6,500. None are graded finer, making this a prime example for an advanced Registry Set.

**PCGS# 6609 | ESTIMATE: \$6,250+**

**LOT 299**

**50C 1940-S PCGS MS67 CAC**

What an amazing SUPERB GEM Walker. One look and you know it sat carefully protected since it left the bank 78 years ago!

There is no such thing as a cleaner Walker. The satiny smooth surfaces are free of even the most microscopic lines or ticks. The dreaded right obverse field never looked so good! A good and moderate luster beams from all over. Both sides are evenly covered by a light to medium m x of totally original pale blue/lavender/gold/champagne/creamy white colors. For a 40-S, Miss Liberty and

the details are well struck. The eye appeal, like the quality, is outstanding!

PCGS 12, NGC 11, CAC 10. The last PCGS CAC piece brought \$24,675 in our May 2017 Regency Auction. The consignor paid \$25,000 for this piece back in 2014. Really high end. SUPERB GEM grade Walkers like this do NOT appear at all any more. If you are building a high grade set, you need to check out this AMAZING 1940-S!

**PCGS# 6610 | ESTIMATE: \$18,000+**

**LOT 300**

**50C 1941 PCGS MS68**

With just a single MS68+ graded finer, this marvelous beauty is tied for second FINEST graded at PCGS and is virtual perfection.

The eye appeal is quite seductive with a vibrant mint bloom that brings out an exceptional golden hue on both sides, which is particularly rich on the reverse.

The devices are sharply struck and the intricate details are mostly crisp and nicely rendered. As expected for such a lofty grade, the surfaces are clean, showing only the slightest tick or two that takes patience and a strong glass to locate. The eye appeal is inspired.

PCGS 26, NGC 25. The current PCGS Price Guide values listed at \$6,500 and APRs are all over the place. The most recent sold in 2018 for \$5,280. Just a single 68+ is graded higher, a coin that PCGS estimates at \$17,000. Bound for an excellent short set of Walkers.

**PCGS# 6611 | ESTIMATE: \$5,000+**

**LOT 301**

**50C 1941 PCGS MS68 CAC**

Virtual perfection! This stunning SUPERB GEM is just a touch of iridescent, pastel tone from looking as exceptional today in 2019 as it did when it came off the dies in 1941.

Intensely lustrous surfaces are bold, brilliant, and beautiful. Delicate pastel blue, gold, and apricot toning is gently dusted on the satiny smooth surfaces. The fields are icy. The devices are sharply struck up with fully defined details on both sides that stand out wonderfully against the fields. The eye appeal is outstanding!

PCGS 26, NGC 25, CAC 10. The most recent example to sell realized \$5,280 in April 2018 and prior to that, a PCGS/CAC coin has not sold in auction since our December 2015 Regency Auction. The current PCGS Price Guide value is listed at \$6,500. Only 1 MS68+ is graded finer, a coin that has not sold in auction before. This magnificent piece of perfection will fit in nicely to any high end set of Walkers. Bound for a world class Registry Set.

**LOT 302**

**50C 1941-S NGC MS67**

This is a highly lustrous example that is TIED FOR FINEST graded at both services.

The 1941-S is the most difficult San Francisco mint issue from the decade. The presently offered GEM offers a bold strike that is accented by a brilliant mint luster and both sides are framed by a tinge of peripheral rainbow color from old album storage. We can detect a tiny tick or two with the aid of a strong glass, but the surfaces are generally clean and the eye appeal is pleasing.

PCGS 9, NGC 25. The most recent NGC MS67 sold in the 2019 FUN auction for \$9,000, and that was the first in nearly 3 years! There are NONE finer, so if you are looking for one of the finest graded examples for your set, take a look at this impressive GEM!

##### 50C 1942 PCGS MS67+ CAC

This is the epitome of what a totally original SUPERB GEM looks like! The obverse is framed by a reddish-orange gold along the left side, while the fields display a thick frosty white, silver iridescence. A bold luster beams throughout accenting a strong strike and nearly flawless surfaces. The eye appeal is stunning.

PCGS 394, NGC 379, CAC 212. PCGS has graded just 44 in MS67+ and 5x finer. The most recent one to sell in auction realized \$2,880 in April 2019, and other recent APRs are all over the place, but Collectors Universe lists a value of \$2,750. If you are looking to upgrade take a look at this wonderful, original SUPERB GEM.

##### 50C 1942-D PCGS MS67+

Really neat for a 42-D. Walkers rarely come toned, and most often when they do they are blah, with gold or russet, or tan tones. This is NOT your typical toned Walker. Splashes of cobalt, teal, magenta and copper-gold intermingle over the satiny smooth obverse. Superb luster radiates from below the unique toning pattern, enlivening the attractive, even if slightly dappled appearance. The strike is good for the date, and the eye appeal is quite nice. We have looked this coin over and over again looking for a reason CAC did not award this SUPERB coin a bean, and cannot see anything.

PCGS 16, NGC 2. The only non-CAC example to sell in auction realized \$1,645 and the current PCGS Price Guide value is listed at \$2,750. Obviously with only 6 finer, this coin does not often appear in a higher grade, nor do they appear with toning like this one. Worthy of a collection of toned Walkers, and will see strong bidding for sure.

UNBELIEVABLE COLORS! When we first saw it, we said "Mau WOWEE!"

This coin has few if any peers. This is unquestionably the top "Northern Lights" example of Walkers.

First, this coin has superior technical qualities. We used a strong glass and looked really hard and found zero problems. The surfaces are as sleek as can be. A strong glowing luster only makes the colors more dramatic. The obverse has totally original electric like shades of magenta/pearl green/blue/gold that just form the most

awesome pattern. The reverse has totally original shades of violet/green by the rims and a pale gold/green all over. If this coin were in Northern Lights, we would rank it a 10! Yes, the eye appeal is that powerful. Miss Liberty and the details are also fully struck and stand out with unusual original toning. This is not your "every day toned" Walker by far. We cannot remember seeing another 1943 as wild.

PCGS 11, NGC 24, CAC 6. The last PCGS CAC MS68 to sell in auction brought \$35,250 in March 2019. That coin had moderate color, but it is now in an MS68+ holder. Its crazy this coin is not. This coin is really a monster colored piece. We expect strong bidding from both toner collectors and Walker buyers. Good luck!

This is a very high end and magnificently original SUPERB GEM, tied for second FINEST graded at PCGS. Brilliant lustrous surfaces have a bold satiny frost on both sides. Well struck, ultra smooth and clean, the eye appeal is very strong, further enhanced by icy blue and delicate yellow-gold toning that frames the obverse with a dramatic effect. This coin has a superb look that will delight any collector of very high end Walkers.

PCGS 318, NGC 231, CAC 162. PCGS has graded 22 in MS67+ the most recent of which sold for \$3,244 in April 2019. Prior to that we sold one in our Regency Auction 30 for \$5,405. The current PCGS Price Guide value is listed at \$3,750. NOTE: there is one MS68 graded at PCGS, which has never sold in auction, making this among the VERY FINEST you can hope to own. Beautiful, superb, gorgeous, OMG, are just a few words that can describe this incredibly toned SUPERB GEM.

Positively impeccable surfaces are all there and then some. Even the dreaded right field is super clean and smooth.

We did examine this coin using a strong glass. The real highlight of the coin is not just its technical grade, but its color. Magnificent shades of totally original thick gold/reddish gold/pale green colors are splashed all over.

The colors glow and are NOT dull or drab. Mrs. Liberty and every detail are

sharply struck. You can clearly see the split thumb. The eye appeal is heart pounding!

PCGS 82, NGC 45, CAC 44. PCGS has graded 16 in MS67+. We sold a wildly toned one in January 2019 for \$28,200 in Regency 31. We estimate this coin will be in that range. In the end, the Collectors Universe value for any 67+ is \$18,000. If you seek a marvelous toned example, here you go!

A simply beautiful SUPERB GEM 49-S Frank in half!

Bold cartwheel luster radiates on both the obverse and reverse enhancing the outstanding surface quality. Virtually pristine. A very crisp strike has fully rendered all the details on both sides. A soft, iridescent tone is seen on both sides, deepening slightly at the rims. An exceptionally rare coin in this lofty state of preservation, this coin was obviously lovingly cared for since the moment it came off the dies.

PCGS 10, NGC 6. The last non-CAC PCGS coin to sell in auction was in our February 2016 Regency Auction, realizing \$6,169. Just three in MS67+ FBL are graded finer, one of which sold in our September 2018 Regency auction for a record \$31,725. This is a rare opportunity for the Registry Set collector. Good luck!

This is a totally original and beautifully toned 53-S half dollar that is clearly an old double mint set. The obverse has a somewhat more dappled albeit highly attractive and totally original patina. Boldly lustrous on both sides, if the strike was a touch more complete and it had FBL definition, this coin would demand a mind-blowing price!

PCGS 37, NGC 11, CAC 22. The current Collectors Universe value is listed at \$1,500 and this monster toned original SUPERB GEM should bring well in excess of that amount! Ignore previous auction records and bid liberally for this beauty!

What a lovely, well preserved GEM. Clearly this coin was carefully stored and is among the FINEST graded. Boldly lustrous surfaces glitter and glow from below the pale pastel toning that is golden-emerald at the rims, fading into a pewter-lac iridescence in the centers. The surfaces are generally very clean, and free of any distracting marks or ticks of any kind, we failed to find any with a glass. The eye appeal is outstanding.

PCGS 189, NGC 14, CAC 38. There are 29 graded 66+ FBL and just six finer in MS67 FBL. We sold one in our May 2018 Regency Auction for \$1,763 and more recently one sold in September 2018 for \$1,680. The current PCGS Price Guide value is listed at \$2,750. The sole PCGS MS67 FBL to sell in auction realized \$13,853 in the 2017 ANA auction, so this high end, 66+ is clearly a great value for the collector. We can see this coin bringing a very strong bid.

A pristine, totally original SUPERB GEM. Offering a billowing, bold vibrant luster that bursts through the iridescent pastel toning. The toning on the obverse is a delicate golden-russet-tan with accents of olive. The reverse is a tad deeper with blue and orange-rose patina that comes to life above the Liberty Bell. The surfaces are undisturbed by any mark or line anywhere and the eye appeal is spectacular to be sure.

PCGS 49, NGC 7, CAC 44. The last one to sell in auction was in our March 2019 Regency Auction that realized \$1,998; indeed there are 21 records of PCGS/CAC coins selling, going back a decade, with an average price realized of \$2,701. The current PCGS Price Guide value is listed at \$2,200 and only three are graded MS67+ FBL finer. A great coin for an advanced set of Franklin halves--good luck!

Whoa! Look at all the swirling colors! This SUPERB GEM (like the one before) clearly came from an original mint set, the reverses in contact with the cardboard, imparting a MONSTER, no GODZILLA tone! Draped in reds, pinks, greens, oranges, and every other color in the spectrum, the reverse is alive with color that really pops with the strong luster. The reverse toning is an 11+ on our 10-point scale! The obverse is likewise pretty and toned, though more subtle and dappled. A couple of ancient contact marks are noted and account for the grade, otherwise, this coin would easily rank higher!

PCGS 970, NGC 377, CAC 202. PCGS has graded 74 in 66+ FBL, and is very scarce any finer. We are not even going to cite APRs or price guide values. Go with your gut on this one, it will shatter records when it crosses the block! If you are collecting real monster toned coins, especially Franklin halves, this is a must buy!

 Not only is this one of the FINEST certified 1960-D half dollars that exists, but it is arguably the most beautiful (at least it is the most beautiful that this cataloger has ever seen!).

This coin clearly sat obverse up, at the top of a bank roll, where it was able to acquire stunning, iridescent green, yellow-gold, crimson, violet, and teal hues. The outline of the old paper wrapper is clearly visible. A bold luster radiates on both sides; the reverse totally original silver, that side shielded from the roll. The quality and eye appeal are SUPERB.

PCGS 4, NGC 1. Nothing finer than MS66 FBL has sold in auction. PCGS has a \$6,500 valuation in MS66+ FBL and \$20,000 in 67 FBL. The value is going to be dictated on its AMAZING eye appeal and could break the record for the date. Good luck!

**\$1 1795 SILVER PLUG. PCCS AU50**

Silver-plug dollars are a very interesting art fact of the early U.S. Mint. In the earliest days, it was of the utmost importance to ensure the the weight and composition of precious metal coins met the letter of the law. Many early coins show file marks, known as adjustment marks, that appear on coins that were overweight; the planchets were filed lightly to take the weight down to proper levels before striking. For underweight planchets, a small hole was drilled (generally in the center) and a heavier plug of silver was inserted before striking. It was easier to do this than to melt and re-roll the blanks. Of all the varieties of 1795 Flowing Hair dollars, the B-7, BB-18, is seen more frequently with a Silver Plug than any other die marriage.

The presently offered coin clearly shows a large plug right in the center of the planchet. Pleasing olive, russet, and tan patina bathes both sides of this highly attractive AU coin. A couple of scattered light marks are accounted for but do not detract. The strike is very bold and pleasing. There is a small planchet flaw at the lower reverse, mint made.

PCCS 4, NGC 4. The most recent example had extensive adjustment marks that crossed the central obverse, which realized \$38,400. This coin sold in our July 2017 Regency Auction for \$43,475 and the current Collectors Universe valuation is \$55,000. Decidedly RARE any finer. A rare and desirable piece of early federal numismatics that should see considerable bidding activity from early dollar or type coin specialists.

Deep, watery reflective mirrored fields beam from all over. They are clean and clear, offering a bold clarity. The central obverse is mainly untuned, with just a touch of clear gold, which then blends to a deeper, amber gold that mingles with

brilliant cobalt-teal at the rims. The reverse is ensconced in a heavier blue and rose hue. The devices are sharply impressed by a forceful blow from the dies. The totally original eye appeal makes you think of the old days, when this is what a Proof Trade dollar looked like!

##### \$1 1883 PCGS MS67 CAC

A superb GEM that was purchased by the consignor from a LRCA auction three years ago, so we can attest to its outstanding quality and eye appeal.

A bold satiny sheen on both sides. The obverse is cloaked in a light golden-aqua-amber iridescent tone. Very clean surfaces, the devices show a hint of striking weakness in the centers.

PCGS 168, NGC 131, CAC 71. The current PCGS Price Guide value is \$2,250. This coin sold for \$2,200 in our 2016 October Premier Session nearly three years ago. The last PCGS/CAC coin to sell in auction brought \$3,995 in our January 2018 Regency Auction XXV. VERY RARE any finer.

#### LOT 349

##### \$1 1884-CC PCGS MS66+ CAC

This is a very high end 84-CC. It has a great look, imparted by a vivacious mint luster, fully struck and frosty devices add to the exceptionally clean surfaces. For the assigned grade, this coin is a sensation, and will be a delightful addition to any high end set.

PCGS 2484, NGC 981, CAC 697. PCGS has graded 382 in MS66+. Many of the GEM examples known today come from the Treasury hoard released by the GSA in the early 1970s. The most recent example to sell in auction realized \$925 in an April 2019 internet only auction. Prior to that, these have brought between \$1,320 and \$1,440. The current PCGS Price Guide lists a value of \$1,300. This coin has a great look and presents a great value point for any collector looking for a very high end GEM CC dollar.

##### \$1 1884-S NGC AU58 CAC

A very high end AU58! The 84-S is a famous condition rarity and KEY issue in any Mint State grade, making PQ 58s a high demand grade especially when CAC-approved. Fully lustrous surfaces gleam, accenting the strong strike and slightest friction on the fields. The eye appeal is excellent for the grade.

PCGS 1356, NGC 1847, CAC 177. Auction prices realized are all over the place, but this high end example will bring a strong bid for sure. Remember the lowest Mint State grades still command a price close to five figures. Good luck.

#### LOT 351

##### \$1 1884-S PCGS AU58+ CAC

A super-slicker example of this famed condition rarity. Barely any perceptible wear can be found on either side, and there are just the slightest hints of contact on both sides. Sharply struck up and boasting a full, vibrant mint luster, this coin is just shy of a full Mint State grade.

PCGS 1383, NGC 1866, CAC 177. PCGS has graded 42 in AU58+. This date is notably RARE in Mint State grades. The most recent example to sell in auction realized \$3,525 in our March 2019 Regency Auction, and prior to that we sold one for \$3,520 in our March 2018 Premier Session and the current PCGS value is listed at \$3,450. Any Mint State coin is worth five-figures. Good Luck!

PCGS# 7156 | ESTIMATE: \$3,200+

#### LOT 352

##### \$1 1884-S PCGS MS61 CAC

A wonderful Brilliant Uncirculated 84-S dollar that has a great face up appearance, a coin that has strong claims to a higher grade (we make no guarantees). The surfaces are lustrous and very pleasing. Free of any seriously distracting marks, the surfaces show just some minor scattered contact marks. The eye appeal is unmarred by any of these, and as stated, this coin has a look of a higher grade.

While the mintage was ample, with 3.2 million struck, most of these went right into circulation where they would remain for years. Circulated examples are common, it becomes scarce in AU55, and is truly RARE in Mint State grades.

PCGS 114, NGC 200, CAC 4. Out of 314 combined graded MS61s, only 4 are beamed—that speaks volumes to how choppy and hacked up this date comes in this grade. This coin is a great exception to that. The current Collectors Universe value is listed at \$14,500. Only one CAC-approved example has ever sold in auction, realizing \$14,100 in July 2017. More recently, a PCGS/CAC MS62 sold in the 2019 FUN auction for \$21,600. This is a great looking coin for any Mint State Morgan dollar set, upgrade that AU in your set today with this beautiful coin.

**\$1 1885 PCGS MS66+ DMPL CAC**

Our sister firm, Legend Numismatics loves true, deep high end DMPL Morgan dollars. GEM DMPL dollars approved by CAC are a rare commodity indeed. Anytime one pops up in our auctions, they disappear into the black hole of collections. Travel around any bourse floor and you know how dry the supply is!

Offering a classic look with brilliant, beaming mint luster showing a binding reflection in the fields with a deeply mirrored sheen. Deep 8+ mirrors beam vividly from all over. The mirrors have good clarity, have just a few trivial tiny scattered ticks (and we mean very few) and are highly reflective. You twirl the coin and the mirrors shine boldly right back at you. The contrast is strong. MSL berry and the details are thickly frosted and are fully struck. The eye appeal is superb!

PCGS 102, NGC 53, CAC 24. PCGS has graded only 5 in MS66+ DMPL. The last PCGS MS66+ DMPL to sell in auction brought \$5,640 in the 2019 CSNS auction, and prior to that, the only one brought \$6,463 in August 2013. Even the current Collectors Universe Value is \$7,300. Do NOT let the pops fool you, these are hard to find this nice.

**LOT 354**

**\$1 1885-CC PCGS MS67**

What a high end, thickly frosted SUPERB GEM. Based on the look, we suspect this coin was originally housed in a GSA holder before being submitted for grading. The luster is frosty with a warm, pearly glow. The devices are sharply struck with a thick frost that is a delight to behold. A tick or two here are noted under a strong glass, noted solely for the sake of full disclosure, this beautiful 85-CC is bound to delight even the pickiest of collectors.

PCGS 100, NGC 98. Just seven are graded finer, 6 in 67+, and a monster 68+. The

most recent example sold in April 2019 for \$7,800 and in March 2019 one sold for \$7,800 and one for \$9,000. The current PCGS Price Guide value is listed at \$11,000. Keep in mind no MS67+ has ever sold in auction, and the 68+ sold in our September 2015 Regency Sale of the Coronet Collection, which realized \$135,125! What a great coin for an advanced Morgan dollar set! We know bidding will be fierce for this SUPERB GEM!

**\$1 1885-CC NGC MS66+\* CAC G.S.A. HOARD**

This is a real-deal bag-toned 85-CC, direct from the bag to the old G.S.A. holder, in which it still resides. Blue, gold, amber, copper, violet, and teal hues intermingled over highly lustrous and reflective surfaces on the obverse, while the reverse is blast white with a blazing mint brilliance. Both sides have razor sharp and thickly frosted devices that stand out with a slight almost cameo contrast against the smooth fields.

PCGS 64, NGC 399, CAC 324 (for G.S.A. and regular holders). The last MS66+ GSA to sell brought \$5,728 in November 2015, and prior to that, there is a record of \$9,988 in February 2013. VERY RARE any finer.

##### **\$1 1885-CC NGC MS67 G.S.A. HOARD**

Tied for FINEST 1885-CC dollar graded from the famed GSA Hoard. Bright, brilliant silver luster radiates with a white-hot intensity. Awesome surfaces are clean, with just a tiny tick or two noted for accuracy. The devices are razor sharp on both sides with a thick frost. The eye appeal is excellent.

PCGS 1, NGC 18. Only one example has sold in auction, realizing \$10,575 in March 2016. Considering that regular NGC-graded MS67s have been selling in the \$4,800-\$5,500, we think our estimate is more than reasonable! Good luck!

##### **\$1 1885-O PCGS MS66**

Rich, multi-colored toning in all shades blends together on both sides of this GEM. Blue, green, gold, orange, teal, salmon, and rose tones swirl together over brilliantly lustrous surfaces. We rate the color an 8+ on our color scale and the eye appeal is excellent. Worthy of a great toned collection.

#### LOT 358

##### **\$1 1885-O PCGS MS66+ CAC**

An exceptionally and beautifully toned Morgan. The 85-O is not as commonly seen with such vibrancy of color as the one we are presenting here. The obverse is drenched in a mix of verdant shades from teal to emerald that then blend with gold, rose, cobalt, magenta, and orange hues. The colors are 8.5++ on our color scale, enlivened by a vibrant, frosty mint bloom.

Worthy of a strong bid, this high end and PQ GEM is extremely attractive and will delight any serious collector of toned dollars. We expect a fierce round of bidding when this 85-O is called to the dais.

**PCGS# 7162 | ESTIMATE: \$2,300+**

#### LOT 359

##### **\$1 1885-O PCGS MS67+ CAC**

An impeccable SUPERB GEM. Frosty, well-struck devices stand out against the highly lustrous fields. For an 85-O the strike is razor sharp, with full definition above Liberty's ear. Smooth surfaces, including on Liberty's cheek, are very pleasing to the eye. Essentially untoned on the obverse, but there is a small patch of toning on the reverse from 12:00 to 3:00. The eye appeal is outstanding!

PCGS 409, NGC 580, CAC 207. PCGS has graded 41 in 67+ and just 3 finer. The most recent brought \$3,600 in April 2019 and we sold one in July 2018 for \$5,875. The current PCGS Price Guide value is listed at \$4,750. The only PCGS MS68 to sell brought \$37,600 in the 2015 FUN auction. Worthy of a strong bid from the advanced Morgan collector working on a high end set.

**\$1 1885-S PCGS MS64+ CAC**

Vivid and brilliant luster swirls over essentially GEM quality surfaces. In the days before numeric grading, this coin would have been called GEM BU. Sharply struck devices are frosty and stand out against clean fields imparting an excellent look for the grade.

PCGS 2805, NGC 1425, CAC 233. PCGS has graded 109 in MS64+. The current PCGS Price Guide value is \$750 and the last one to sell brought \$720 in February 2018. A highly attractive example worthy of a strong bid.

**LOT 361**

**\$1 1886 PCGS MS66+ CAC**

We love the color on this double-sided bag toner! Both sides display majestic rainbow toning. The obverse is 100% blanketed by bold color lighter at the top that gets deeper and richer; from peach-imbued silver, blending with brilliant yellow-gold, royal purple, teal, emerald green, and deep blue. The reverse has an arch of rainbow toning that graces 30% of the left side. We rate the obverse color a 9 on our 10 point scale. Close examination with a glass reveals some old lines on Liberty's cheek. Sharply struck and fully lustrous, this PQ GEM borders on Northern Lights quality!

Worthy of a strong bid from the toned Morgan specialist, and it belongs in a collection of great toned coins! Good luck!

**LOT 362**

**\$1 1886-O PCGS MS64 CAC**

The Morgan dollar series is filled with conditionally rare dates, and the 1886 O is one. Despite a mintage of 10,710,000, very few were saved at the time of issue. Common in circulated grades, this date is RARE in MS64 and is excessively so in GEM.

Satiny with a pearly-golden iridescent glow on both sides. The surfaces are generally very clean and devoid of any serious contact marks. Swirling bands of cartwheel luster bloom as you rotate the coin in a light. The devices are sharply impressed by the dies, better than most examples of this O-mint issue than is usually encountered. Totally original and visually alluring, this coin has great technical and aesthetic qualities.

PCGS 241, NGC 81, CAC 46. The most recent example to sell in auction realized \$10,575 in our January 2019 Regency Auction 30, while prior to that, APRs were in the \$10,200-\$15,000 range. The current PCGS Price Guide value is listed at \$9,500 and that takes into account the lower prices that non-CAC examples have been bringing in auction. With just 25 graded MS64+, 2 graded MS65, and a single MS65+ finer, we know that after 33 years of operations, there is clearly some duplication in the pops, and this near-GEM will see fierce bidding when it crosses the block!

#### LOT 363

##### **\$1 1886-S PCGS MS64+ DMPL CAC**

In our world, this piece is almost a classic rarity! Finding a true full "8" not hazed up mirrored coin is nearly impossible. We are pleased to have been consigned this serious quality piece.

Full booming mirrors are deep and beam boldly from all over. There are just a few trivial scattered ticks (as expected). There is no haze on this piece - just some faint gold toning. When you twirl this coin you see the mirrors roll. The contrast is bold. Miss Liberty and the details are fully struck and have thick frosting. The eye appeal is jaw dropping for sure!

PCGS 19, NGC 11, CAC 6. The last PCGS CAC 64 (NO +) DMPL to sell in auction brought \$6,463 in February 2013. Need we say more? The current Collectors Universe value is \$11,500. How they got there with none trading is interesting. In valuing a DMPL, it's all about the mirrors and their look. When you find one like this that is the real deal, be prepared to pay a strong premium-these don't grow on trees!

##### **\$1 1887-S PCGS MS65 PL**

WHOA! Someone break out the sunglasses, this GEM is ultra reflective and highly lustrous! It is also the FINEST Proof like 1887-S dollar at PCGS, UNIQUE at this lofty state of preservation.

Deeply beaming mirrored fields show highly polished surfaces from the freshness of the dies. The chrome-like texture to the untuned fields is intensely reflective and just shy of being borderline DMPL in depth. The frosted devices are fully struck up with crisp bold definition. Aside from the slightest trace of contact,

(which as you know is always exaggerated by the fragile nature of the PL surfaces) all we see is a tiny frost break on Liberty's cheek, which is all we can see as the preclusion to CAC bearing this GEM. To say the eye appeal is impressive is a glaring understatement!

PCGS 1, NGC 2. NO PCGS MS65 PL has EVER sold in auction, and is unpriced in the Collectors Universe price guide. The Jack Lee DMPL sold in November 2005 for \$25,300. A real prize for the most advanced of Morgan dollar collectors, this special coin will entice very strong bidding from every specialist in PL and DMPL dollars.

**\$1 1889-CC PCGS AU58 CAC**

Is your set still missing a high grade 1889-CC dollar? Do you demand high end quality for the assigned grade? Are you looking for a coin with brilliant luster that at first glance looks Mint State, but does not come with a Mint State price? If your answer to those questions is "YES!" then this is your best choice for an 89-CC!

Only the slightest hint of friction appears on the fully lustrous surfaces. Brilliant on both sides, the untoned silver gleams with a strong vibrance on both sides. The details are well struck with just a few minor traces of friction seen. The eye appeal is exceptional for the grade.

PCGS 281, NGC 223, CAC 33. The last example sold in November 2016 for \$17,625 and prior to that, one sold in June 2015 for \$25,850. That it has been almost three years since a CAC-approved example of this KEY Morgan dollar date in PCGS AU58 has sold in auction, speaks volumes to the strong hands that possess them! The current PCGS Price Guide value is listed at \$18,500. A coin like this will see strong demand and strong bidding—there are lots of Morgan dollar collections missing a high grade example of this date.

#### **LOT 366**

##### **\$1 1889-CC PCGS MS62**

An important KEY Carson City Morgan dollar issue in all grades, the 89-CC is a major rarity in any Mint State grade. The original mintage was a small 350,000 and there were no bags that remained in the treasury vaults that were released in the early 1970s as part of the famed G.S.A. hoard, in fact, there was exactly ONE 89-CC in that holding! Thus, any Mint State survivor exists by pure chance and nothing else!

This handsome example has a wonderful, brilliant mint luster that has some very distinctive, semi-reflective tendencies in the fields that really give this borderline CHOICE 89-CC a very pleasing eye appeal. The devices are frosty and nicely struck up. PCGS got this one spot on, as there are just some minor traces of contact seen on both sides, but none of the marks are serious enough to mention individually or have an impact on the eye appeal.

PCGS 114, NGC 97. Going back to December 2017, there have been 10 non-CAC PCGS MS62 1889-CC dollars sold in auction, realizing an average of \$32,400 and the current PCGS Price Guide value is listed at \$40,000. This very pleasing example should bring spirited bidding from the advanced Morgan dollar collector. For many collectors, anything finer is unobtainable, placing lots of demand on MS62s. Good Luck!

#### LOT 369

##### \$1 1892-O PCGS MS66

Among the FINEST KNOWN 1892-O Morgan dollars, behind just two that are graded finer. A boldly lustrous GEM that borders on SL. PERB quality, the presently offered MS66 is a true delight to behold. One where the technical and aesthetic qualities are extremely HIGH END.

Sharply struck up with full definition on the hair curls above Liberty's ear. The cheek is rounded and smooth with a bold frost, with just a few microscopic ticks seen in the frosty textured surface. Bold brilliance swirls all over. The fields are extremely smooth, problem free, and mostly untoned. We note the lightest of pale gold that is delicately dusted on the surfaces. Looking at the reverse under a glass shows some light mint made roller lines, and they are very faint and do not detract from the outstanding eye appeal.

Despite a mintage of 2,744,000, very few were saved at the time of issue. A number of bags were dispersed in the 1950s and 1960s, and there were rumors of a bag that had many gems reported in 1977 by Wayne Miller. Today, the Population data from PCGS and NGC do not support these claims. While PCGS CoinFacts estimates 100,000 Mint State coins that survive, the survival estimate drops to 625 for MS65 and finer examples. The finest known example was saved at time of issue, bought at the mint by collector J. Colvin Randall, who sold it to John M. Clapp. That coin ended up in the Eliasberg collection, and most recently sold in our October 2014 Regency Auction of the Sunnywood/Simpson Collection. Clearly the presently offered beauty survives by pure happenstance and today's numismatists should be grateful to have the opportunity to own this wonderful survivor.

PCGS 6, NGC 4. Not only are these EXCESSIVELY RARE at the present grade level, but they are also very rarely encountered in the market; in 20 years, there have been just THREE auction sales! The last time any PCGS MS66 sold in auction was in the 2009 FUN auction--a full decade ago! And it was nearly a full seven years after the next most recent example sold. The current Collectors Universe value is listed at \$40,000 and with finest known and close to finest known Morgans selling very well right now, we anticipate that value will end up being too low and will have to be adjusted upward after the hammer falls on this lot. A world class example bound for a world class set! Good luck!

**\$1 1894-O PCGS MS64 CAC**

Fallout from the Panic of 1893 was a reduction of mintages of all coins. While 1,723,000 were coined in New Orleans, these went directly into wide spread circulation, and few were saved at the time of issue--Indeed, if you add up the current PCGS and NGC Populations in MS60 to MS65+ totals fewer than three bags (and that takes into account duplicate submissions of the same coin looking for upgrades)

The present near-GEM example is satiny lustrous and wonderfully free of any serious bagmarks or other contact. The devices are relatively sharp for the date, with just some minor weakness at the centers of either side. The eye appeal is exceptional for the grade and can be defined as PQ.

PCGS 368, NGC 234, CAC 68 The most recent example to sell in auction was the Star City coin in our January 2019 Regency Auction 30, which brought \$9,106. Prior to that one sold in in the 2018 ANA auction for \$9,000 and the Stone Collection coin brought \$11,875 in May 2018. Keep in mind that a 64+ is a five figure coin and is extremely rare any finer. A great coin for any high grade set of Morgan dollars.

This is a bold, blazing, and brilliant GEM example of this semi-key issue. Only 1,260,000 were struck for commerce, and relatively few GEMs, like the present coin, survive to satisfy collector demand.

Smooth, clean surfaces show off a bold, radiant mint bloom that glows a luster. The reverse is particularly bold and has some semi-reflective tendencies. The devices are frosty and crisply struck. There are a few, tiny ticks, which account for the assigned MS65 grade. The technical and visual quality is quite high end!

PCGS 168, NGC 38, CAC 37 The most recent example realized \$7,000 in December 2018, while other examples have sold in the \$5,400 to \$9,000 range and Collectors Universe lists a value at \$5,500. ##### **\$1 1895-S PCCS MS65+ PL CAC**

Legend Rare Coin Auctions is proud to offer this AMAZING Prooflike GEM example of this low mintage, semi-KEY date. This marvelous coin ranks as the second finest graded by PCCS in the designation and amongst the very FINEST KNOWN examples of the date.

A vibrant, bold, flashy GEM with brilliant, reflective cartwheel luster. The fields have a bold mirror-like flash contrast against the well struck and frosty devices. The surfaces are of exceptional quality with no serious marks to be found anywhere of any kind. The eye appeal is amazing.

Still recovering from the financial panic of 1893, the mintages were still low in 1895, with only 450,000 struck for the date. Many of these went right into circulation, any Mint State grade is scarce. Prooflike examples are RARE in all grades, especially in MS64 or finer. PCCS has graded only one in each grade in PL: 64+, MS65 MS65+ and 66+.

PCCS 2, NGC 10, CAC 3. This is the only 65+ PL and it sold for \$60,000 in November 2017. With AMAZING Morgan dollars bringing very strong prices, it would not be a shock to us if this monster GEM ended up closer to the current PCCS Price Guide value of \$78,000. This is a remarkable and beautiful example, worthy of any WORLD CLASS Morgan dollar collection, and will be a highlight of the next collection it graces. Good luck.

 Ex Sunnywood-Simpson Collections.

A truly spectacular SUPERB GEM that was added to the original Sunnywood Collection from the late dealer, Mike DeFalco, who was an early specialist in toned Morgan dollars.

The swirling colors are rich and the totally original patina is heavy on the surfaces.

However, as you rotate the lustrous surfaces in a light, the variegated shades of pale teal, amber gold, violet brown, and tangerine-peach mingle together

leaving just subtle traces of the original silver surfaces gleaming in areas. The originality of the patina is really captivating, and the only distraction mentioned for accuracy is an ancient fingerprint on Liberty's cheek, which is otherwise smooth and mark-free. The eye appeal is SUPERB!

PCGS 241, NGC 67, CAC 78. When this marvelous toner sold in our October 2014 sale of the Sunnywood-Simpson Collection, it brought \$7,931 on an estimate of \$4,500-\$5,000. This spectacular coin deserves to be placed in another world class set and should bring a strong bid! Good luck!

 Ex Vanderbilt Collection, as noted on the holder.

Visually, this coin is a stunning SUPERB GEM! Indeed, were it not for a natural mint-made planchet flake and a single contact mark, this coin would likely grade even higher, if you could even imagine that. Not only is the surface quality exceptional in every way, but that is only part of the story. This coin is also beautifully toned with a very pale green that blends into a deep, orange-gold, that then fades to a golden-green hue. We rate

the coin a 9+ on our color scale and this is a very rarely seen color palette. The devices are sharply struck up and there is just a single line on the jaw line that we note for accuracy, but the eye appeal is unimpeachable! We have truly fallen in love with this beauty and we know if you collect high-end Morgan dollars you will too!

PCGS 273, NGC 68, CAC 77. PCGS has graded 31 in MS67+. The last two PCGS MS67+ CAC coins to sell brought \$7,050 in our July and September 2018 Regency Auctions and the current PCGS Price Guide value is \$7,250. Just two MS68s are graded finer, and the price guide is \$25,000 (a very early estimate, as neither have ever sold). This is a huge opportunity to acquire a very high-end high-grade, beautifully toned example, don't let it pass you by!

**LOT 377**

**\$1 1897-S PCGS MS66+ PL**

Impressive. This is a high end GEM with fully reflective fields that beam with bold, mirror-like flash. The devices are frosty and well struck, providing decent near-cameo contrast. Both sides are untoned and ultra lustrous with nary a mark to distract the eye.

PCGS 6, NGC 0. The current Collectors Universe value is listed at \$4,000 and the most recent example sold for \$3,000 in the 2018 FJN auction. Just four are finer, the most recent MS67 PL sold for \$12,338 in our May 2018 sale of the PFM Collection. Good luck!

Satiny lustrous surfaces gleam with just the slightest touch of iridescent gold toning on either side. Well struck devices are frosty and sharp, adding to the excellent eye appeal.

PCGS 968, NGC 492, CAC 267. In MS66+, PCGS has graded 130. Mostly selling in the \$575 to \$660 range--we sold one for \$940 in January 2019. The current PCGS value is listed at \$675, but this one should bring more than that!

**LOT 379**

**\$1 1898-O PCGS MS67+ CAC**

Tied for FINEST graded, this SUPERB GEM is clearly worthy of its lofty grade! Everything about this coin is HIGH END!

The frosty and impeccably struck devices stand out and are the epitome of essentially flawless cleanliness. The cartwheel luster has a vibrant satiny glow that is totally untuned and SUPERB! A powerful glass will reveal a tiny tick, the only thing that keeps it from likely a higher grade. This amazing coin sits at the apex of the Population and will delight any demanding collector looking to build the BEST quality Morgan dollar set.

PCGS 338, NGC 189, CAC 111. PCGS graded 27 coins in 67+ with NONE finer. We have had the pleasure of selling a number of these recently, mostly in the \$10,500-\$12,500 range. The current PCGS Price Guide value is \$12,500, and this one will rank up there with the other two we had the pleasure of selling. Good luck!

##### \$1 1898-S PCGS MS66 CAC

A borderline Prooflike example that boasts a great look. Intensely lustrous surfaces have reflective mirrored fields, that are about 3" deep, not the 4" required for a PL designation. The design elements are sharply struck and are highly frosted. The cheek is especially smooth and creamy white. The outstanding eye appeal is enhanced by a narrow band of totally original toning at the periphery. What a great eye appealing example that is high end and very PQ.

PCGS 87, NGC 8, CAC 24. The most recent example to sell in auction realized \$5,405 in our sale of the Star City Collect on in January 2019. Prior to that, one sold for \$5,640 in November 2016. This date is very rare any finer, and this highly appealing GEM is worthy of a great collection of Morgan dollars.

This is a very pretty, double sided toner. Easter egg blue, rose, gold, lilac, teal, and golden-peach toning blanket both sides of this vibrant, satiny lustrous GEM. The cheek is smooth with just a trace of contact noted, accounting for the grade. The eye appeal is excellent.

PCGS 1616, NGC 1192, CAC 378. You can ignore the APRs and the Price Guide values, and prepare to bid liberally to add this pastel toner to your collection.

##### \$1 1899-O PCGS MS67+ CAC

Ex Vanderbilt Collection, as noted on the insert.

It boggles our minds how close to sheer perfection this coin is; not only are the surfaces smooth, they are essentially mark free. Even using a powerful glass, you won't think less of the coin - it really is that clean. A strong glowing luster beams from all over. The peripheries have a thin band of auburn/blue/golden brown colors. Of course, the centers are a totally original creamy white. Miss Liberty and every detail are fully struck and stand out with

strong frosting. Her cheek is the absolute epitome of perfection! The eye appeal is incredible!

PCGS 205, NGC 117, CAC 71. PCGS has graded only 20 in MS67+. The current Collectors Universe value is \$12,500 and the most recent example to sell realized \$15,000. We expect this SUPERB GEM to sell for a very strong price! It fully belongs in a world class collection.

 PCGS showed this marvelous SL PERB GEM no mercy. It is for sure the epitome of perfection!

To the naked eye the surfaces all over look perfect. Using a strong glass we were more than impressed to find nothing bigger than a microscopic tick. The surfaces are also satiny smooth. A full booming luster beams from all over. Both sides are a crisp white color. This coin does not look like it was ever messed with in any way. Miss Liberty and the details are fully struck and have delicate frost. The eye appeal is incredible!

PCGS 39, NGC 26, CAC 11. The last PCGS CAC MS67 to sell in auction brought \$16,450 in January 2017. First, this coin has few if any equals. Second we do not understand why it did not + as we think it should have (we make NO promises). Third, the last one to sell in auction really did sell in a weaker sale. This coin has all the bells and whistles to make it possibly a runaway! Good luck!

**LOT 384**  
**\$1 1903-O PCGS MS67 CAC**  
 The oft-told story about this coin's former rarity shows how things in the market can change instantaneously if a hoard is found. The 03-O was one of the rarest dates in Mint State in the Morgan series, that was until the Treasury found a hoard of original bags in a vault, and released them into circulation in the early 1960s. Luckily today for collectors, it is a generally available date in most Mint State grades that has a neat historical story.

The presently offered SUPERB GEM is virtually perfect! We really cannot imagine that too many other MS67s are as visually alluring as this beauty. A very strong cartwheel luster rolls along the exceptionally smooth and seductive surfaces. Ms. Liberty and the details offer fully struck and crisply defined devices. A pale silver-white iridescent tone attests to its unmolested originality.

PCGS 96, NGC 51, CAC 29. The most recent was the Ex Jackson Hole coin, which we sold in November 2018 for \$7,638 and prior to that, it sold in December 2017 for \$8,519. We also sold the Ranjack coin for \$8,225 in July 2018. Clearly CAC approved examples are worth a huge premium! Just 2 MS67+s have ever been graded finer, neither of which have ever sold in auction. This SUPERB GEM is worthy of any high end set of Morgan dollars and it will see steep bidding competition! Good luck!

 Ex Mike Casper Collection, as noted on the insert.

A vibrantly lustrous GEM example of this conditionally very rare date. Satiny smooth surfaces are brilliant silver white all over with just tinges of deep coppery-red in a few spots near the rims. The devices are sharply struck and the cheek is fully rounded and smooth with not even the most insignificant tick or line anywhere to be seen. Totally original, this GEM is a true delight for any advanced Morgan dollar collector.

PCGS 154, NGC 38, CAC 31. The most recent example sold in April 2019 for \$11,100, and this one sold in April 2016 for \$12,925. The current PCGS Price Guide value is listed at \$15,000. RARE any finer! This is an important opportunity for the advanced collector.

**LOT 386**  
**\$1 1921 MORGAN. PCGS MS67**  
 Not only is this marvelously toned 1921 tied for FINEST graded, it is also the most beautifully toned example of this date we have ever seen! Indeed it really looks more like a common date toner than anything else you will ever see for a 1921. Bands of green, magenta, gold, blue and brilliant original silver line up in wonderful arching parallels on the obverse. The color would rate a 9 on our 10-point scale if it was an 81-5, 85-O, or 86; but for a 21, it is off the charts!

In addition to the stupendous eye appeal imparted by the amazing toning, the luster is bold and radiating with brilliant rolling cartwheels. The surfaces are smooth, free of all but one tiny mark on the cheek. The reverse has a soft olive/gold patina that accents the sharply struck devices. This amazing, high end SUPERB GEM is the PCGS CoinFacts plate coin and will be a real highlight to any set of toned Morgan dollars.

PCGS 17, NGC 11. There has not been a PCGS-graded example sold in auction since the 2017 ANA auction, a coin that brought \$9,988 but it was not wildly toned like this. The Coronet Collection, sold in October 2015 in our Regency Auction was blast white, CAC approved and sold for nearly \$20,000. For a 1921 this coin is a monster and will see very strong bidding, likely making our estimate look way too low in hindsight! Good Luck!

**\$1 1880 PCGS PR67+ CAM CAC**

This is a gorgeous Proof Morgan dollar. Seriously, if you seek just a single example for a Proof type set, you really should strongly consider this SUPERB GEM. Everything about it is high end!

Both sides display a lovely, totally original patina. The obverse is framed by rainbow hues that yield to a brilliant silver center. The reverse has a dusting of teal, gold and rose iridescent toning that suggests this coin sat undisturbed for many, many years on some sort of fabric such as velvet or felt. The mirrors show off an intense reflectivity and vivid flash that offers a bold depth of clarity. The devices are well struck and have a full, thick frost that, especially on the obverse, has a SUPERB contrast against the fields. This beauty is among the top dozen graded in the CAMEO designation and is deserving of its lofty placement in the known population.

PCGS 16, NGC 23, CAC 7. PCGS has graded 2 in PR67+ CAM and neither have ever sold in auction. We sold a non-CAMEO example for \$18,213 in November 2018. This SUPERB GEM CAMEO Proof 1880 dollar should bring closer to the current Collectors Universe value of \$26,500. There are eight coins in PR68 CAM and one in 69 CAM finer. In PR68 CAM, the Collectors Universe value is listed at \$41,500. This coin is more than worthy of a fantastic collection of Proof Morgan dollars or type coins. It will bring a strong price when the gavel falls.

WOW, is this coin totally unlike what you normally see for a Proof 1885. The eye appeal is very high end! This coin has a SUPERB look with exceptionally deep contrast. Deep, highly reflective mirrored fields beam from all over and have a headlight-like blazing look when viewed in a light. The highly frosted devices are razor sharp in strike and stand out vividly from the fields.

Totally untoned, both sides are a blistering brilliant silver. The eye appeal is very high end and wonderful!

Only 930 Proofs were struck. PCGS 25, NGC 13, CAC 12. There are only five PCGS PR66+ CAMs on the Population Report; the last one to sell in auction was CAC approved and brought \$14,688 in the November 2018 Regency Auction. The current PCGS Price Guide value is listed at \$18,500. Only four examples have graded finer, the finest being a single PR68 CAM. The finest to ever sell was a PR67 CAM, a coin that did not have CAC approval. A great coin for any collector of high end Proof Morgans.

Need a new headlight for your car, or a flash light? This coin will serve you well! It is a so of VERY HIGH END quality.

Deep mirrors are intensely flashy. The mirrors also have remarkable clarity and are super clean. This coin does not have hidden brush lines like so many do. When you twirl this coin, all you see is the nearly blinding mirrors rolling around. There are two well hidden toning dots, otherwise this coin is untuned. Miss Liberty and the details are fully struck and have thick creamy white frost. The eye appeal is quite impressive!

Only 650 were minted. PCGS 25, NGC 14, CAC 5. The last PCGS CAC piece to sell in auction brought \$3,760 in September 2016. Three years without any hitting the auction block says tough date and grade to find! We really like this coin, and we think you will too!

The King of the Morgan dollars! The lowest mintage KEY date in all grades, despite a recorded mintage of 12,000 for circulation, NONE have ever turned up, making the 880 Proofs that were struck the only Philadelphia mint Morgans for collectors' sets today.

The present PR64 is fully CHOICE and totally original. Deep azure and rose toning envelope both sides, the subtle differences in hue brought out by the rich watery reflective mirrored fields. There are a few of the most microscopic lines that are seen with the aid of a VERY strong glass, not visible to the naked eye, and are not unexpected at the PR64 grade level. The eye appeal is wonderful for the grade.

As mentioned earlier, only 880 Proofs were struck, and these are the only known examples for the date. PCCS 58, NGC 47. The last non-CAC NGC-graded coin sold in the 2008 FUN auction—that's over a decade ago! Since then, two CAC approved NGC coins have sold, the most recent in June 2016 for \$65,277 and the current Collectors Universe value is listed at \$68,500. Worthy of a strong bid and placement in a carefully selected set of Morgan dollars.

This is a VERY HIGH END true Cameo piece. Why PCGS did not + it, is anyone's guess.

Intense deep mirrors beam from all over. The mirrors have bold clearness and clarity (NO haze). The contrast is an amazing silvery black and white with faint hints of pale gold. When the coin is twirled, the mirrors flow like a river of liquid mercury that nearly blinds you. There are NO spots or any detractors. It looks like just a few microscopic de-polishing

lines are all that keep this coin from PR67 Cameo. Miss Liberty and every detail are fully struck and have thick silvery frosting. The eye appeal is tremendous!

Only 731 were minted. PCGS 5, NGC 7, CAC 4. The pop in PR66 is mind boggling to us after 30+ years of operations and how many CAC has been in PR66 to date. Ex Jack Lee. No question this piece ranks among the finest known for the date-- no question this is a VERY HIGH END coin. To know the date and how they come, you undoubtedly have to agree this coin really is one of the very best that exists!

This coin has extremely deep mirrors which beam (not just beam from) all over. The mirrors are ultimate in cleanliness, clarity, and have a bold reflection. You don't even have to twirl this coin to see rolling

liquid mercury. A melow but lively mix of original pale golden brown champagne colors swirl in patches all over. This coin has so much life you really need sunglasses to view it! Miss Liberty and the details are needle sharp and fully struck. They also have a delicate silvery frost (note 1902-1904 silver proofs are very rare in cameo). The eye appeal is like the qual-ty-amazing!

# THE HICKORY RIDGE COLLECTION

This collection of carefully selected Peace dollars currently ranks as the #14 set on the PCGS Set Registry. Assembled over the course of years by a dedicated collector, has an average grade of 65.29. Several of the coins are tied for finest or second finest graded at PCGS, and many carry CAC approval. The eye appeal of each coin was carefully considered, and the collector chose only visually appealing examples. You can see this process when you look at each coin's strike, luster, originality, and surface quality.

The 24-coin series, is a great one to consider for collectors of any budget. None of the dates are prohibitively rare, though there are dates that are quite the challenge in superb gem grades. The Hickory Ridge Collection offers a great opportunity for anyone looking to start a set, or upgrade their existing set. So, if you are building a set of Peace Dollars, or are thinking about a new area to collect, take a look at the coins being offered. Surely you will find at least a few coins to inspire you.

**\$1 1921 PEACE, HIGH RELIEF. PCGS MS65+ CAC**

What a great way to start off this set of Peace dollars, with an attractive GEM quality 1921. Light iridescent toning graces both sides of this satiny lustrous beauty. The strike is bold and essentially full for the issue with fully detailed central devices, which often come soft and undefined. The surfaces are totally original and very pleasing for the grade with just a couple of obverse bag marks. The eye appeal is wonderful for sure.

PCGS 1575, NGC 1231, CAC 251. PCGS has graded just 55 in MS65+ and this date is indeed quite scarce any finer! The more recent PCGS/CAC MS65+ coins that have roughly realized between \$2,200 and \$3,000, and the current PCGS Price Guide lists a value of \$3,250. This Peace dollar will be a great start to another GEM set of this very popular series! Good luck!

We love the look of this GEM! Bold and brilliant cartwheel luster radiates all over. The devices are sharply struck up and frosty with complete definition throughout. Both sides are framed by a band of rich coppery-gold and rainbow-infused toning. The eye appeal is excellent.

PCGS 944, NGC 1483, CAC 304. PCGS has graded 84 in MS66+ and just 32 finer, all MS67. The current PCGS Price Guide value is listed at \$1,250 and there is a wide range of APRs but the average is about \$1,500. **LOT 396**

**\$1 1922-D PCGS MS66 CAC**

A majestically REVERSE toned GEM 22-D. First off, to find ANY Peace dollar with this kind of color is excessively hard to do, and were the toning on the obverse, you would be looking at a very expensive coin in today's market. Alas, the obverse is untuned and boldly lustrous. Sharply struck from a die that obviously was on its last stages. Extensive die cracks and crumbling fields are noted. The reverse clearly sat at the end of the roll, which imparted a dazzling array of bold color, shades of magenta, azure, teal, gold, violet, slate, and emerald swirl together, leaving a subtle angular section near the center of lustrous pewter, which fits the folds of the paper roll. The color rates an 8.5+ on our color scale and remember, Peace dollars are much rarer as a type with great toning!

PCGS 233, NGC 232, CAC 92. Disregard all prior auction prices as we (and our consignor) think this coin should bring a premium for its amazing color, and remember, it would be worth multiple times more if the toning was on the obverse, thus making this a wonderful value in our opinion!

# THE HICKORY RIDGE COLLECTION

**LOT 397**

**\$1 1922-S PCGS MS65**

Boasting the second highest mintage of all Peace dollar dates, the 22-S is also one of the most poorly struck dates. The present MS65 has a bold, satiny luster with a thick mint frost. There is some central weakness, which is typical for the date. A few minor ticks account for the assigned grade. A ring of rich golden-orange color frames both sides. The eye appeal is very pleasing.

PCGS 448, NGC 248. The three most recent examples sold in the \$870 to \$1,080 and the current PCGS Price Guide value is \$1,350. A condition rarity any finer, a 66 will cost roughly \$40,000!

**PCGS# 7359 | ESTIMATE: \$800+**

**LOT 398**

**\$1 1923 PCGS MS67**

Among the FINEST graded at PCGS, this high grade 1923 Peace dollar has an exceptional look. Copious and impressive cartwheel luster rolls along both sides, accenting the sharply struck up devices and subtle toning that frames both sides. The devices are delightfully frosted and stand out boldly. Inspection with a strong glass fails to reveal anything but the most minute marks or ticks anywhere. The eye appeal is quite high end, despite not bearing a CAC bean.

PCGS 78, NGC 116. NONE are graded finer. The last two non-CAC PCGS coins sold in the 2019 ANA Auction: one for \$3,000 and the other for \$4,560; the average APR for the last 10 non-CAC examples is \$4,031 and the current PCGS Price Guide value is listed at \$4,850. This is an important opportunity for anyone looking for a SUPERB GEM for a type set or one of the finest graded for a high ranking set.

**PCGS# 7360 | ESTIMATE: \$3,500+**

**LOT 399**

**\$1 1923-D PCGS MS66**

This is a very interesting GEM 23-D. Brilliantly lustrous surfaces shimmer in the light and accent a dappled peripheral tone on the obverse. A few scattered ticks are seen with the aid of a strong glass. The obverse die had shattered by the time this coin was struck with multiple major die cracks noted, adding charm and character to the eye appeal.

PCGS 105, NGC 25. The average APR of the last 10 PCGS MS66 examples comes to \$2,954 and have ranged from \$1,980 to \$3,600. The current PCGS Price Guide value is listed at \$3,250 and PCGS has graded just a dozen finer. A great piece for the collector.

## LOT 400

### \$1 1923-S PCGS MS65+

Among the very FINEST graded of the date, this GEM 23 S stands out as a lovely example. Despite a huge mintage of over 19 million, this date is downright RARE in GEM, and excessively so at MS66 or higher grade.

The present MS65+ is moderately toned, especially at the peripheral details on the obverse, a radiating luster beams from all over. Shades of amber and blue grace both sides, enhancing the depth of the lustrous surfaces. The devices are well struck, stand out and the eye appeal is unmarred by any unsightly marks and is outstanding.

PCGS 5, NGC 1. Only one PCGS MS65+ has ever sold in auction, the Ward T. Miller coin that sold in March 2019 for \$26,400. Based on that one auction record, the current Collectors Universe value is listed at \$28,500. Only three coins are graded higher, and only one, a PCGS MS66, sold in April 2011 for \$31,050—that was eight years ago! This is a very rare and important opportunity for the advanced collector—this is a real Set Registry contender!

Truly a lovely, original PQ GEM that borders on the Superb category. Sharply struck and thickly frosted, lustrous surfaces stand out on this Peace dollar. Speckled golden-tan patina graces the obverse periphery, attesting to the wonderful originality of this coin, imparting a great eye appeal.

PCGS 2218, NGC 1906, CAC 650. There are 203 graded MS66+ at PCGS and the current PCGS Price Guide value is \$800. A very pleasing coin worthy of a strong bid, the most recent sold for \$840. Scarce in MS67 and EXCESSIVELY RARE any finer than that!

### \$1 1924-S PCGS MS64+ CAC

A borderline GEM with a vivacious satiny luster. Crisply struck up devices stand out against the fields. We note some minor traces of contact, but nothing affects the eye appeal. A faint blush of pale gold attests to the originality, and we like the look of this one.

PCGS 1578, NGC 923, CAC 220. PCGS has graded 159 in MS64+ and this is another date that is RARE in GEM grade, accounting for duplication of submissions hoping for a higher grade. The last one to sell realized \$2,100 in February 2019 and before that, \$2,280 in December 2018. The current PCGS Price Guide value is listed at \$2,200 and keep in mind that the Collectors Universe value in 65 is \$6,250. This pleasing coin will bring a strong price. Good luck!

### \$1 1925-S PCGS MS64+ CAC

This is a remarkably RARE date in GEM, which explains the inflated number of submissions in MS64+. The presently offered example borders on the GEM category with a creamy swirling mint luster that enlivens both sides. The devices are essentially fully rendered and both sides are framed by halo of gold. The surfaces are generally clean and pleasing for the issue, we note the typical rusted dies.

PCGS 2421, NGC 1694, CAC 315. There are currently 250 in MS64+ at PCGS, and just 43 graded finer (all MS65, which includes duplication of the same coin being tried for a higher grade). The most recent PCGS MS64+ CAC sold for \$971 in February 2019; other examples have sold at the FUN auction for \$1,140 and \$1,320. The current PCGS Price Guide value is listed at \$1,300. ## LOT 405

### \$1 1926 PCGS MS66

What a handsome looking GEM! Bold y lustrous and cr sply rendered devices stand out. A couple of tiny lines can be seen but are not distracting, nor do they have any serious impact on the outstanding eye appeal. We note some delicate patina that enhances the visual allure.

PCGS 264, NGC 52 The current Collector's Universe value is listed at \$1,400 and these have generally sold in the \$1,000-\$1,200 range, RARE any finer, with just 27 MS66+s graded finer at PCGS.

PCGS# 7367 | ESTIMATE: \$1,000+

## LOT 406

### \$1 1926-D PCGS MS65 CAC

A blazing, swirling luster rolls w th vivid cartwheels along GEM quality surfaces. Nary a mark can be found even with the aid of a glass, and the eye appeal is enhanced by a bush of pale golden iridescent tone.

PCGS 836, NGC 462, CAC 139. The most recent PCGS/CAC MS65 sold for \$1,560 in the 2019 CSNS auction, and prior to that, one sold for \$960 in March 2019. The current PCGS value is \$925 and this one should bring in excess of that. Scarce finer, ths GEM will delight any budget minded collector.

PCGS# 7368 | ESTIMATE: \$900+

## LOT 407

### \$1 1926-S PCGS MS66

MS66 is the highest grade that most collectors strive to own for the 1926-S, as it is VERY RARE any finer. This remarkable coin is wonderfully toned at the periphery that frames the highly lustrous surfaces. Well struck devices stand out against the generally clean, problem free surfaces. The eye appeal is exceptional.

PCGS 105, NGC 35 The last one sold for \$2,243 in March 2019 and prior to that, one sold for \$3,360. The current Collector's Universe value is listed at \$3,250. While PCGS has graded four coins higher, the only one to ever sell in auction was a MS67 that sold in the 2011 FUN auction for \$32,200. Worthy of a very carefully selected Registry Set and will see competitive bidding.

PCGS#7369 | ESTIMATE: \$2,000+

## LOT 408

### \$1 1927 PCGS MS65

A bold, swirling, cartwheel luster rolls on both sides of this GEM. A delicate bush of clear gold and lilac can be seen on both sides, accenting the devices. We do note a few stray tiny contact marks, that are mentioned for accuracy. The eye appeal is decent.

PCGS 437, NGC 128 The current PCGS Price Guide value is listed at \$1,500 and three sold in March 2019 for \$1,140, \$1,140, and \$1,800. RARE finer, the finest seen at either PCGS or NGC is graded MS66.

# THE HICKORY RIDGE COLLECTION

LOT 409

**\$1 1927-D PCGS MS64+ CAC**

A truly lovely, near-GEM 27-D Peace dollar. Frosty, white lustrous surfaces glow with a vivid brilliance. Well struck devices and generally smooth fields show just a few trace frost breaks and only a few tiny ticks that keep this from a full GEM grade.

PCGS 1371, NGC 780, CAC 189. PCGS has graded 71 in 64+. We sold one for \$1,645 in March 2019 and another sold in the same month for \$1,680. The current Collector's Universe value is listed at \$1,750 and the population reports drop off dramatically in MS65 and finer. We had the honor of selling one of the FINEST, a PCGS MS66+ CAC for a record \$176,250 in March 2019. This is a very pleasing near-GEM that will delight anyone looking to add a highly appealing example for a more budget minded set.

**PCGS# 7371 | ESTIMATE: \$1,400+**

LOT 410

**\$1 1927-S PCGS MS64+**

The 27-S is one of the classic condition rarities in the series, with MS65s being quite rare, and the date is excessively so any finer. MS64+s make a great value play option for the collector looking for a high grade piece without the high grade price. Dappled, iridescent, pastel toning is dusted over the brilliantly lustrous surfaces. For a date that typically comes very poorly struck, this example has pleasing definition with essentially full details on Liberty's hair curls, and just some softness on the eagle's wing. Under a strong glass we note the few tiny ticks that limit this near-GEM to the assigned MS64+ level but they do not detract from the overall eye appeal.

PCGS 1633, NGC 1074, CAC 282. PCGS has graded 140 in MS64+ RARE any finer, PCGS has graded just 102 between MS65 to MS66, NONE FINER. The current PCGS Price Guide value is listed at \$1,650 and the last two non-CAC examples brought \$1,200 and \$1,800 (the latter was an NGC graded coin). Keep in mind that the PCGS value jumps to \$8,000 in MS65. A neat coin like this will delight any collector and is worth a close look for a nice collector set.

**PCGS#7372 | ESTIMATE: \$1,000+**

LOT 411

**\$1 1928 PCGS MS65**

A vivacious, lustrous GEM example of this key date issue. Pale accents of gold can be detected when rotating the coin in a light. The details are fully defined on both sides and the surfaces are free of all but the most insignificant frost breaks, none of which do much to deter from the outstanding brilliance or eye appeal of this GEM.

PCGS 369, NGC 104. Because of its rarity in higher grades, we think there is a certain duplication on the population reports. The current PCGS Price Guide lists the value at \$3,500, and there is a wide range of APRs from non-CAC coins, the average being about \$2,500. The most recent example that we sold was in our July 2018 Premier Session, a coin that realized \$2,640. VERY RARE finer, this is a pleasing example of this important date.

**PCGS# 7373 | ESTIMATE: \$2,000+**

# THE HICKORY RIDGE COLLECTION

**LOT 412**

**\$1 1928-S PCGS MS64+ CAC**

The 28-S is a major rarity in GEM grades, thus many collectors opt for really high end MS64+s for their sets. Bold, frosty surfaces have a rich brilliance that provides a warm mint sheen, that forms rolling cartwheels on both sides. The devices show decent striking definition with just some weakness on the eagle's wing. The barest traces of minute contact can be found using a glass and are taken into account for the assigned grade, but this one really is of excellent quality, both aesthetic and technical.

PCGS 2337, NGC 1325, CAC 315. There are 263 graded MS64+ at PCGS. Keep in mind that with only 109 graded finer than MS64+ at both PCGS and NGC combined, it goes without saying there is going to be a lot of duplication in the Population Reports in hopes of getting a GEM grade. The last 10 PCGS MS64+ CAC have sold in the \$1,440 to \$3,760 range, the average being \$2,210. The current PCGS Price Guide value of \$1,450 seems too cheap to us. Keep in mind that a PCGS MS65 CAC will cost over \$20,000—this coin provides a great value point for the collector!

**PCGS# 7374 | ESTIMATE: \$1,500+**

**LOT 414**

**\$1 1934-D VAM 4. DOUBLED DIE OBVERSE. PCGS MS64**

Among the FINEST graded examples of this Top 50 Peace dollar VAM varieties. The VAM 4 combines the doubled die obverse and the small D mint mark. The doubling is most noted at the bridge of Liberty's nose and at D WE in the motto and at a few of the rays in the crown. Note the position of the D mintmark in relation to the tail feathers. The palest of gold graces the brilliantly lustrous surfaces on both sides.

For the variety: PCGS 6, NGC 1. The only APR we can find is for an unattributed example sold in a weekly internet sale in January 2018 for \$1,680. The current PCGS Price Guide value is \$2,250. Only two are finer, both MS64+.

**PCGS# 7376 | ESTIMATE: \$1,250+**

**LOT 413**

**\$1 1934 PCGS MS66**

A visually very impressive GEM with a bold, cartwheel luster that blooms vividly on both sides. Sharply struck up devices have peach-gold blush across the central obverse. Sharply struck up, both sides present wonderful eye appeal and have an exceptional eye appeal.

PCGS 207, NGC 38. The most recent examples sold in the \$1,800 to \$2,280 and the current PCGS Price Guide value is listed at \$2,450. An eye appealing GEM of this caliber will see stiff bidding competition. Good luck!

**PCGS# 7374 | ESTIMATE: \$1,500+**

**LOT 415**

**\$1 1934-D PCGS MS66**

Totally original and very eye appealing, this coin clearly sat at the top of a paper bank wrapped roll; the paper imparting a coppery orange, gold, and violet frame on the obverse. The details are sharply struck up with completely full, crisp definition. A few microscopic traces of contact can be seen with a powerful glass, but they do not have any effect on the excellent eye appeal.

PCGS 107, NGC 25. The current PCGS Price Guide value is listed at \$3,600. The most recent example sold for \$3,643 in our March 2019 Regency Auction. Just 9 coins are graded finer, any they become exponentially more valuable with each step up you go. What a great looking coin, a date that you rarely see with any kind of toning. Let a one as attractive as this! Worthy of a strong bid!

# THE HICKORY RIDGE COLLECTION

**LOT 416**

**\$1 1934-S PCCS MS66 CAC**

The star of this collection and one of the **FINEST** graded examples of this conditionally **RARE** late date. A near twin to the example we sold from the Crow River Collection in 2018, this 34-S Peace dollar is exceptional **Y H G H E N D!**

A bold, vibrant luster glows throughout the highly frosted surfaces.

Well struck for the issue with essentially full complete definition throughout. A tinge of pale golden iridescent toning gently caresses the peripheral areas of the obverse. Nary a mark can be found anywhere except for a couple of bag marks on the eagle. The eye appeal is **SUPERB!**

**PCGS 32, NGC 13, CAC 11.** The aforementioned Crow River Collection coin that we sold in May 2018 realized \$32,900. Only two others have ever sold in auction, one for \$32,900 in the 2015 ANA Auction and prior to that, one sold in the 2011 CSNS auction for \$34,500. The current Collector's Universe value is listed at \$40,000. Just a single MS66+ is graded finer, a coin that has never sold in auction. This high end, high grade example is worthy of the **FINEST** of Peace dollar collections and we know that with the series being very fiercely sought right now, a coin like this will bring a very strong price. This coin is a prize for the Registry Set crowd for sure!

**PCGS# 7377 | ESTIMATE: \$30,000+**

# THE HICKORY RIDGE COLLECTION

**LOT 417**

**\$1 1935 PCGS MS66+ CAC**

Not only is this beautifully toned example tied for the **FINEST** graded example, but it is visually exceptional in every way. Both sides are framed with a multi-hued halo of color, likely from long term storage in an old collector album, which is enlivened by the frosty satin mint luster that blooms vividly on both sides. The strike is crisp throughout with full definition on both sides, even on the eagle's wing, which often comes flatly defined. The surfaces show just a couple of minute bag marks, which are all that keep this stunner from an even higher grade. Regardless, this coin is **VERY** high end and offers a stunning eye appeal for the date.

PCGS 330, NGC 74, CAC 116. There are 67 in MS66+ at PCGS, which is the highest grade at that service. The most recent to sell in auction realized \$8,225 in our March 2019 Regency Auction. The current PCGS Price Guide value is \$7,000 and we anticipate this borderline-SUPERB coin will realize a strong price. If you are working on a high end set, you owe it to yourself to view and bid on this exceptional coin!

**PCGS# 7378 | ESTIMATE: \$6,000+**

**LOT 418**

**\$1 1935-S PCGS MS66 CAC**

Highly lustrous and totally original. What a great way to conclude this fantastic collection! While the 35-S has the highest mintage of all 1930s dated Peace dollars, most were stored in vaults and released into circulation in 1949/1950. While common enough in lower Mint State grades, the 35 S is conditionally **RARE** in MS66 and finer grades.

Mostly a brilliant, highly lustrous silver with traces of pale gold and iridescent toning, mostly limited to the peripheries. Well struck devices stand out on both sides. Based on the scattered contact marks, we believe this one was received from one of the aforementioned bags distributed in 1949/1950.

PCGS 182, NGC 63, CAC 59. The current PCGS Price Guide value is listed at \$3,500 and the average of the last 10 PCGS/CAC coins comes to \$4,638. The two most recent selling in the 2018 ANA auction, both from the Anne Kate Collection. One brought \$5,760 and this one realized \$3,240. We have sold several examples as well, including the May 2018 sale of the Crow River coin, which brought \$5,758. Just 21 are graded finer, and the Collector's Universe value for a 66+ is \$12,000. This is a great looking coin, worthy of another major collection of Peace dollars and we know it will see fierce bidding!

**PCGS# 7379 | ESTIMATE: \$3,500+**

**LOT 419****\$1 1922-S PCGS MS66**

This Premium GEM 22-S is among the FINEST graded at PCGS and this is a real prize for the Registry Set collector. While the mint churned out nearly 17.5 million silver dollars, this date is truly RARE in high grade. In over 32 years of operations, PCGS has graded just 13 in MS66 with a single MS66+ finer.

Frosty, silvery-gray surfaces have a warm, satiny luster that radiates with a mint brilliance on both sides. The devices are nicely impressed, with essentially complete definition on both sides. A dusting of pearly, iridescent silver with subtle, clear gold accents highlight the generally smooth surfaces, that are devoid of all but the most microscopic lines and ticks that you need a strong loupe to find. The eye appeal is bold.

PCGS 13, NGC 15. The most recent one to sell in auction was the CAC-approved example that was part of the Crow River Collection that we sold in May 2018 for \$41,125. The current Collectors Universe value is listed at \$45,000. Just a single coin is graded finer, a coin that has NEVER sold in auction. This coin is bound for the FINEST of Peace dollar sets and should bring a serious bid!

**PCGS# 7359 | ESTIMATE: \$32,000+**

**LOT 420**

**\$1 1923 PCGS MS64**

A pastel toned border in GEM. Sharply struck devices stand out with a bold, brilliant luster that swirls all over. Golden-peach, aquamarine, cobalt, and orange hues are brought out in the light. The grade is limited to the 64 level because of a contact mark or two on the reverse, but the eye appeal is outstanding. Of course, Peace dollars tone differently than Morgans- they are much harder to find with attractive coloration, as seen on this beauty. Certainly worthy of a strong bid from the specialist collector, we rate the color an 8 on our 10-point scale. Good luck!

**PCGS# 7360 | ESTIMATE: \$1,000+**

**LOT 421**

**\$1 1924 NGC MS67+**

This GEM 1924 Peace dollar is tied for second FINEST at NGC, with just a single MS68 graded finer.

Bold, satiny luster in the fields accents the frosted lustrous devices. Even with a strong glass the surfaces are unmarred by any serious marks of any kind; indeed, all we see are die lines and the typical "pickled" 1924 texture. Sharply struck, and lightly toned, it's a very pleasing coin to look at.

PCGS 0. NGC 5. There have been 2 NGC MS67+s sold in auction the most recent

being CAC-approved, selling for \$8,225 in March 2017. Prior to that, a non-CAC coin sold for \$5,141. The current Collectors Universe value is \$13,500. Just 1 is finer, a coin that has not appeared in auction since 2009.

**PCGS# 7363 | ESTIMATE: \$6,000+**

**LOT 422**

**\$1 1924-S PCGS MS64+ CAC**

Wonderful and totally original near-GEM quality! Satiny mint luster has a warm, frosted glow. The devices show a bold, sharp strike with clear definition throughout. A few light, scattered contact marks are noted for the sake of full disclosure, but none detract from the outstanding eye appeal.

PCGS 15/75. NGC 922, CAC 219. PCGS has graded 157 in MS64+ and the population drops dramatically after that. The last PCGS/CAC MS64+ to sell in auction brought \$2,100 in February 2019, and prior to that, one sold in December 2018 for \$2,280. Keep in mind that in MS65, the last PCGS/CAC coin sold in our November 2018 Regency Auction 29 for \$17,038! This is a great value for the advanced collector that wants high grade without the high price!

**PCGS# 7364 | ESTIMATE: \$1,800+**

**LOT 423****\$1 1925-S PCGS MS64 CAC**

Bold and brilliant, this near-GEM radiates a white hot mint luster that blazes with strong cartwheels along both sides. Sharply struck, there are just a few too many touches of contact to be a full MS65 grade

PCGS 2177, NGC 1612, CAC 318 The last one to sell brought \$576 in April 2019 and the current PCGS Price Guide value is \$575. This is a conditionally very rare issue with only 43 graded MS65 as finest. This highly attractive example is about as close to GEM as you can get without the five-figure price tag. Good luck!

**PCGS# 7366 | ESTIMATE: \$500+**

**LOT 424****\$1 1927-D PCGS MS65 CAC**

Truly a wonderful GEM example that is fresh to the market. Totally original with creamy lustrous surfaces and the palest dusting of tangerine-gold. Well struck, all of Liberty's flowing hair lines are fully rendered. We note minor, inconspicuous ticks, none of which are harmful to the outstanding eye appeal. A great coin that is VERY RARE any finer

PCGS 224, NGC 77, CAC 54 The most recent example that we sold was from our May 2019 sale of the Issaquah Estate, which realized \$7,344 on a \$3,500-\$4,000 estimate. Prior to that, another sold for \$6,300 in February 2019. What a great opportunity to own a GEM of this conditionally difficult date

**PCGS# 7371 | ESTIMATE: \$4,500+**

**LOT 425****\$1 1927-S PCGS MS65**

A fully lustrous GEM example that is quite nice for this condition/rarity. A delicate dusting of iridescent golden-tan dances on the surfaces adding to the eye appeal and attesting to the originality. The devices are sharply struck and have a bold definition which is brought out by the brilliance of the underlying luster. Even using a strong glass, we can only see a few minor ticks worthy of mention, all well hidden by the overlay of patina. After 33 years of grading, PCGS has graded a mere 90 at this grade level and importantly just a dozen coins any finer! A prize for the astute numismatist!

PCGS 90, NGC 76. The current PCGS Price Guide lists a value of \$8,000 and most recent examples have sold in the \$5,000-\$7,200 range. Keep in mind that anything finer is going to cost in excess of \$20,000. A great addition to any advanced Peace dollar set

**PCGS# 7372 | ESTIMATE: \$5,500+**

**LOT 426**

**\$1 1977 PMS67**

WOW, who would have expected how few SUPERB GEM 1977 like dollars exist? A rich blue/green patina blankets pleasing copper-nickel clad surfaces which show satiny luster. Very clean considering the wide open spaces that are prone to contact marks.

PCGS 30, NGC 12. Only one has ever sold at auction, an untoned example in a January 2011 sale, which realized \$852. The current PCGS Price Guide value is \$1,100. An underappreciated series that is truly hard to find in superb condition. If you are building a set, be sure to bid on this piece! This opportunity rarely occurs.

**PCGS# 7423 | ESTIMATE: \$1,000+**

**LOT 427**

**\$1 1979-P WIDE RIM. PMS67**

This is the first of the modern, small sized dollar coins. Highly lustrous with a bold satiny sheen, this variety with the wide rims is rarer than the narrow rim. While the narrow rim was the "normal" variety for the date, all other Susan B. Anthony dollars were struck with this wonderful rim style.

PCGS 21, NGC 51. Just a single MS67+ is graded finer at PCGS. The most recent example sold for \$2,820 in the 2016 ANA auction, and the current

PCGS Price Guide value is listed at \$3,500. The single finer example realized \$6,463 in February 2016. This is one of the KEYS to the modern U.S. series, and bound for an advanced Registry Set. Good Luck!

**PCGS# 99571 | ESTIMATE: \$2,600+**

**LOT 428**

**G\$1 1854 TYPE 1. NGC MS65 CAC**

This is a very high end GEM example of this final Type 1 gold dollar date. Bold, intense golden luster gleams from all over with a satiny brilliance.

The devices are sharply impressed on both sides, both sides show considerable stress with multiple die cracks on both sides. The eye appeal is exceptional.

PCGS 42, NGC 68, CAC 14. NO NGC/CAC coin has ever sold in auction, but a PCGS/CAC coin sold in the 2018 ANA auction for \$2,640. This GEM is housed in an earlier generation NGC holder and is fresh to the market. It should bring a premium bid to anyone building a gold type or date set of gold dollars.

**PCGS# 7525 | ESTIMATE: \$2,200+**

**LOT 429**

**G\$1 1854 TYPE 2. PCGS MS65+ CAC**

Totally original and high end quality! This is a true GEM with both strong technical and aesthetic properties that defy what you normally see out there for the type!

A thick, frosty mint luster glows brilliantly on both sides of this GEM. Deep orange golden coloration blends with delicate rose-gold patina. Sharply struck from dies that clashed multiple times, the outlines of details from the opposite side. Other than those mint made die clashes, the surfaces are ultra clean and very smooth with zero serious marks or lines of any kind. The eye appeal is simply OUTSTANDING! Having seen many Type 2 gold dollars in the course of our careers, we know how RARE a coin like this is!

PCGS 54, NGC 25, CAC 22. There are six graded MS65+ at PCGS and as can be expected, is extremely RARE any finer. The last PCGS/CAC MS65+ sold for \$35,250 back in the 2016 FUN auction. While that may seem like just yesterday, it was 3.5 years ago! The current PCGS value is listed at \$35,000. Keep in mind that the PCGS Price Guide lists a value of \$60,000 in MS66 and it has been nearly four years since one of those sold. This is a great coin for type or date purposes, bound for a world class set of GEM gold dollars. We anticipate very strong bidding for this beauty!

#### LOT 430

##### GS1 1881 PCGS MS67+ CAC

This is a beautiful, fully Prooflike SUPERB GEM Type III gold dollar, a perfect coin for a type set. The fields and devices, at first look, have the appearance of a CAMEO Proof. Lustrous, fully reflective fields are deep and beaming, from a full heavy polishing (you can see a curly lint mark left over from the polishing cloth). The sharply struck up devices are fully frosted and have a fully cameo-like contrast against the fields. The surfaces are smooth and free of any post minting contact or lines. The eye appeal is amazing.

PCGS 102, NGC 70, CAC 34. PCGS has graded 7 in MS67+. The only PCGS-graded examples were sold in December 2010, where one sold for \$6,325 and the other sold for \$4,313 and the current PCGS value is listed at \$5,000. Keep in mind that a marginally finer PCGS MS68 is a five figure coin. This one has a great look and is bound for a great gold dollar set or gold type collection.

##### GS1 1889 PCGS MS67+ CAC

The last year of the denomination, a good number of these tiny gold dollars were saved for posterity, allowing for even SUPERB GEM pieces like this one to be affordable for most serious collectors.

Virtually perfect surfaces are a delight to behold. Even using a strong glass you will find NO flaws. The luster is moderate and frosty accenting totally original shades of wheat gold color. There is a single tiny spot on the reverse. Miss Liberty and every detail are sharply struck. The eye appeal is excellent!

PCGS 280, NGC 192, CAC 92. There are 22 in MS67+ and the last PCGS CAC coin to sell at auction brought \$3,600 in December 2018 and the current PCGS Price Guide value is listed at \$3,750. VERY RARE any finer, PCGS has graded just 10 in MS68. Bound to be placed in a great gold dollar or gold type set. These seem very reasonable at today's levels.

PCGS# 7590 | ESTIMATE: \$3,200+

#### LOT 432

##### \$2.50 1852-O PCGS MS62

An AMAZING example of this conditionally very rare quarter eagle. While 140,000 were struck, they rarely appear in auction, especially in Mint State grades. In fact it is surprising to learn that while the Charlotte mint and Dahlonega mint issues had much lower mintages, the average grade per Jeff Garrett and Ron Guth is lower for the 52-O. There is just a single MS63 graded finer at PCGS.

The presently offered coin has a great look with flashy, partially reflective surfaces that really beam on both sides. Sharply struck devices stand out. The surfaces show a few stray lines and ticks, which we note on for accuracy. We were very surprised that it did not receive a CAC-bean.

PCGS 7, NGC 7. The current Collector's Universe value is listed at \$8,000. It is surprising to note that only three PCGS-graded examples have ever sold, ranging in the \$6,500-\$8,813 area, and all in the last four years. Prior to that just NGC coins had sold. We anticipate a fierce bidding war to ensue when this one crosses the block; with just a single coin finer (a coin that has not sold in auction since April 2009), we know the New Orleans specialists will be out in force. Good luck!

PCGS# 7766 | ESTIMATE: \$5,000+

**LOT 433**

**\$2.50 1902 PCGS MS68**

This coin probably looks exactly like it did the day it left the mint. We do not see this coin as a "pushed" MS67 at all.

Remarkable surfaces are exceedingly clean and have a satiny smooth texture. Using a strong glass we found only one microscopic scuff on the obverse. Everything else was pristine.

If that was not on the coin, we'd seriously be talking MS69! A glowing luster beams nicely from all over. Both sides are a GEM original mix of soft gold/pale yellow gold colors. You can clearly see this coin has never been messed with. Miss Liberty and all of the details are frosty and are sharply struck. The eye appears superb in every respect!

PCGS 2, NGC 6, CAC D. The last PCGS 1902 MS68 to sell brought \$21,150 in August 2016. The current Collectors Universe Value is \$27,500. We can see this coin easily topping that. This is NOT a low end or dumpy coin. It belongs in a top Type or Liberty Quarter Eagle Collection.

**PCGS# 7854 | ESTIMATE: \$20,000+**

**\$2.50 1905 PCGS MS67 CAC**

PCGS 97, NGC 107, CAC 27 The most recent PCGS/CAC example to sell in auction realized \$3,878 in our September 2018 Regency Auction. Prior to that one sold in our October 2017 Regency Auction for \$3,760. This coin will certainly attract fierce bidding from the gold type or late date quarter eagle specialist. Good luck!

[illegible]

**LOT 435**

**\$2.50 1885 PCGS PR65 DCAM CAC**

What an AMAZING looking GEM Proof! A marvelous survivor from a miniscule mintage of only 87 pieces. Not only is the Proof mintage low but the business strike mintage was paltry, only 800 examples were struck for commercial use. Collectors looking for an example have often looked to the Proofs. Today, these are considered to be

R-5+ in the John Dannreuther reference on Proof Gold and the current combined PCGS/NGC population data shows 46 examples graded in all grades and designations this is one of the very few in the DCAM category. The quality of this GEM is exceptional!

Deeply reflective mirrors beam from all over contrasted with the frosty golden reliefs. The fields show a lovely orange pee texture on both the obverse and reverse. Only a single hair line or two can be found anywhere using a strong glass. The eye appeal is outstanding in every way. A real prize, truly the cavariar of numismatics.

PCGS 4, NGC 0, CAC 2. The most recent PR65 in any designation was a non-CAM or DCAM PCGS/CAC coin that sold in October 2012 for \$35,250. With nearly seven years since the last one sold, we think this GEM should sell for closer to the current Collector's Universe value of \$52,500 VERY RARE in all grades, especially so in such well preserved GEM quality, this coin will see very strong bidder demand when it crosses the block! Add this beautiful coin to your collection and you will be gaining a real beauty!

#### \$2.50 1899 PCGS PR66+ DCAM CAC

WOW! This SUPERB GEM possesses everything that the collector could possibly desire in a proof gold coin. Expansive depth and vast contrast between the highly mirrored fields and frosted devices, far and away stronger than usually seen on these rare proof gold issues. Free of any copper specks, the mirrors are DEEP and black; the reliefs are bright frosty gold with a rich orange-gold patina catches the light and the coin grabs your attention from across the room. Close study of the fields under a light will discover the finely textured and highly desirable orange peel quality which adds a curious texture to the sultry appeal. All the devices are fully struck as would be expected for such an amazing looking coin. Even under the most intense scrutiny with a strong glass we cannot find a single flaw worthy of description; all Quarter Eagle proofs of this date show a shallow indentation in the horizontal shield stripes on the reverse as seen here.

The more you look at it, the more mesmerizing it is. The late 1890s saw a triumph of minting techniques that all came together to create these elegant Deep Cameo proof gold coins. First off, the dies had to be carefully prepared, with an acid applied to etch the entire die surface which creates the frosted appearance. Next the frost was completely removed from the fields (the highest point on the die) by carefully polishing the surface but not so much as to drift into the devices. This process gives the fields their mirror finish and the first few dozen coins struck under high pressure offer the greatest degree of contrast and depth of reflectivity. Long collected by specialists these proof gold coins are the absolute pinnacle of quality in American numismatics, they were struck for collectors and have been held in the highest regard ever since. Their rarity is legendary, and when found in gem or finer grades, with the Deep Cameo contrast, simply cannot be surpassed in dramatic visual effect.

Only 150 were minted. PCGS 7, NGC 5, CAC 8. This is the ONLY PR66+ and while 13 coins appear to be graded higher on the PCGS Population Report, we think that includes duplication. This coin last sold in our December 2016 Regency Auction for \$34,075. Keep in mind that in February 2015 a PCGS PR66 CAM CAC (no "+") sold for \$28,200 and in June 2016, a PCGS PR67 CAM CAC brought \$41,125. These unmolested and original GEM proofs are extremely rare, particularly in as fine a grade as offered here. Gold proof coins have long been called the caviar of numismatics, and we believe that any gem proof in a collection adds a mark of sophistication. If you are looking for a truly special coin to put away, here it is.

**THIS IS GODZILLA!** What a sensational Ultra Black and Gold Proof piece. We fully agree this coin is much closer to a PR68 than a PR67 DCam!

Ultra deep and virtually endless mirrors explode from all over. The mirrors display the ultimate in clarity and cleanliness. You cannot ask for any more flash. When you twirl the coin, the mirrors look like an intense river of molten yellow gold streaming around the surfaces. The contrast is mind boggling! Miss Liberty and every detail are needle sharp in strike and have GEMMY thick iridescent gold frost. Your eyes will pop out and roll all over when they lay on this monster!

ONLY 223 minted. PCGS 9, NGC 8, CAC 7. This is the lone PR67+

DCAM graded. Hard to believe PCGS may have graded 2 in PR69 DCameo-WOW (neither are beamed)! We can't say enough how desirable all PCGS GEM Proof gold is these days. The current Collectors Universe Value is \$48,500. NO PR67+ DC have ever been sold via auction. This coin will improve ANY SUPERB GEM set while creating a higher bar of quality and eye appeal! In our opinion, we do not see much downside on coins like this at today's prices. Sell your widgets or dupes and buy coins like this.

PCGS 685, NGC 533, CAC 51. We sold the most recent example in our August 2018 Premier Session for \$4,290. The current PCGS Price Guide value of \$4,250 takes into account the number of non-CAC coins that have sold in auction. Clearly CAC-coins should be worth more.

A wonderful, totally original, borderline-GEM example of this important KEY date issue.

Sensational satiny smooth surfaces have a light frost break and NO serious problems to be found anywhere.

There is one small scuff in front of the nose on the obverse.

The luster is strong and really glows from all over. Both sides are an even deeper ORIGINAL yellow gold color. All of the details are frosty and have bold strikes. The eye appeal is great!

Only 55,600 examples were struck, and examples of this date are highly sought in all grades; most known examples are in AU. Any CHOICE or GEM Mint State example commands strong attention from the collector.

PCGS 335, NGC 416, CAC 84. There are 24 graded by PCGS in MS64+ and the three most recent PCGS/CAC examples to sell in auction realized \$25,850 and the current PCGS Price Guide value is listed at \$28,500. Keep in mind that NO PCGS MS65 has sold in auction for nearly 3 years! Clearly these are not available with frequency and this near-GEM is worthy of a great set of Indian Head quarter eagles!

#### \$3 1857 PCGS MS64+ CAC

Any high grade 1857 \$3 gold piece is a real prize for the advanced collector, and this one ranks within the condition census of the date. Of the 20,891 that were struck, very few survive in high grade, most Mint State survivors grade MS63 or lower, and we believe that there must be some duplication in the population reports in MS61 to MS63.

This sharply struck borderline GEM is spectacular! The surfaces are vibrant and boldly lustrous with a thick satiny sheen that glows all over. The brilliance radiates across the generally smooth fields and frosty design elements. A strong glass reveals a few stray old ticks and lines, mostly hidden among the mint caused clashing and die lines. None of these are significant enough to preclude a lower grade, or CAC approval. The eye appeal is very bold, and at first glance, this coin looks like a GEM MS65.

PCGS 5, NGC 6, CAC 3. This is the ONLY MS64+ at PCGS. The only recent comparable is from nearly four years ago when a PCGS MS64 CAC (no "+"") sold for \$14,100 in the 2015 ANA auction. The MS64+ being offered today carries a PCGS Price Guide value of \$24,000. Just three coins are graded finer, one each, MS65, MS65+, and MS66, and the only one finer to sell in auction was the PCGS MS65+ from the D. Brent Pogue Collection, which realized \$35,250 in February 2016. We anticipate strong bidding for this impressive antebellum \$3, a date that you rarely see so fine.

#### \$3 1885 PCGS MS65 CAC

This is a beautiful and reflectively lustrous GEM! One of the classic low mintage rarities of the \$3 gold series, with an original mintage of only 801 examples struck for circulation. Well struck with rich orange gold coloration on both sides. Only a few minor contact ticks are noted under a glass, but do not detract from the exceptional eye appeal. This date is rarely seen in MS65 or finer grades, and we believe there is much duplication of the "grading events?" with the same coin being resubmitted again and again in hopes of a higher grade.

PCGS 11, NGC 4, CAC 3. The last time a PCGS/CAC sold for \$22,913 in our May 2016 Regency Auction. More recently a non-CAC PCGS MS65 sold in June 2018 for \$25,200. The current Collectors Universe value is listed at \$27,500. Rare any finer, with just nine coins graded between MS65+ and MS67, this is a real prize for the advanced collector of this obsolete gold denomination and we anticipate strong bidding for this impressive GEM!

**LOT 443**

**\$5 1795 SMALL EAGLE. PCCS AU55 CAC**

This is a wonderful, totally original and high end, CHOICE AU example of the first year of issue of U.S. gold coins. From a historic perspective, the 1795 half eagle is a very important coin—a “blue chip” issue that is in serious demand from collectors at all levels from problem coins all the way to GEM Mint State. Exceptional quality AU coins like this are few and far between! PCCS Co nfacts estimates that 500-600 examples survive in all states of preservation from an original mintage of 8,707.

Struck from the BD-8 die variety, one of 12 Small Eagle die marriages, and rates as a high Rarity 5. Light wear is noted on both sides, but the reverse retains ample semi-reflective surfaces, indicative of the early die state. Rich, orange-gold patina blends with traces of olive and peach overtones. Well struck devices show only some minor weakness at the extreme centers of the design. We note minor contact marks scattered about, evidence of its brief stay in early federal era circulation. None of these ticks are distracting to the exceptional eye appeal and overall quality.

Many examples over the years have been dipped, stripped, cleaned, or conserved in some other way, destroying the original surfaces. These “processed” and “commercially graded coins” appear with some frequency in auction, but high end, original coins are VERY RARE in all grades!

For the early mint at Philadelphia, dies were used until they could no longer strike coins. This obverse die was reused in 1797 or 1798 when it was paired with a Large Eagle reverse, creating the UNIQUE BD-13 die marriage.

There is something fun about contemplating who may have handled this coin. Did George Washington, Alexander Hamilton, John Adams, Thomas Jefferson, James Madison, or some other founding father use this coin while serving in the capital in Philadelphia. While the “Mint Act” bill of April 1792 established the mint in Philadelphia and authorized the weights and standards of circulating coinage, it would not be until 1795 that all officers of the mint were able to post the surety bonds that allowed for gold coinage to commence production.

PCCS 66, NGC 43, CAC 5. We feel that there is much duplication of submissions, the populations inflated in hopes of receiving a higher grade. This is the ONLY CAC approved example in this grade to ever sell in auction, bringing \$82,250 in the 2017 FUN auction. It really must be noted how extremely rare totally original examples are in all grades. While this coin is not “cheap” we challenge you to go find a similar coin in the marketplace! Good luck!

##### \$5 1802/1 PCGS MS64 CAC

Every half eagle dated 1802 is an overdate and there are 8 different die marriages cataloged in the Bass-Dannreuther reference on early gold, this one being BD-8. Clearly the presently offered coin is among the FINEST graded and is a wonderful example of this early type! A real trophy for any collector!

A glowing satiny mint frost shows off its original brilliance giving life to the rich orange-gold surfaces. Struck with a precision that is not often seen on this issue, all of Liberty's hair detail and all the eagle's breast feathers are fully separated. In the old days before 3rd party grading this coin would have been called a full GEM---the surfaces are that clean, and free of any serious evidence of contact with other coins. Carefully and lovingly cared for since the day it came off the press during Thomas Jefferson's first term as President. A great example of Robert Scot's classic design.

PCGS 20, NGC 12, CAC 4. There are only four coins graded finer: two coins graded 64+; one in MS65 and one in MS66. Aside from the PCGS/CAC coin we sold in our January 2018 sale for \$76,375, keep in mind that the only MS65 last sold in the 2012 FUN auction for \$138,000. For the advanced gold type collector, this is a coin that is suited for a GEM set. EXTREMELY RARE in this lofty grade, and virtually unobtainable any finer.

**LOT 445**

**\$5 1823 PCGS MS60**

A single pair of dies were used to strike all 14,485 half eagles in 1823, and today, there are about 80-100 known in all grades.

The presently offered coin is not an AU coin in a Mint State holder; no wear of any kind can be seen on either side. The well struck devices are frosty and stand out against the moderately reflective, lustrous surfaces, giving it a bold look. Only some ancient lines are noted, accounting for the assigned grade, but the eye appearance is excellent!

The reverse die was a workhorse (first utilized in 1820, listed as die F in the Bass-Dannreuther book). It was used to strike all 1821, 1822, 1823, and 1824 half eagles. Die state research by Bass and Dannreuther concludes that the 1823 and 1824 half eagles were struck BEFORE the famed 1822 rarity (only three known). Thanks to the rarity of the 1821, 1822, and 1824, the 1823 is often thought of as common, but as the population and auction appearance data reveal, this is NOT the case!

PCGS 2, NGC 0. The current Collectors Universe value is \$28,500. There has NOT been an MS60 sold at auction since March 2000! College freshmen were not yet born! The most recent two MS61s graded by PCGS sold for \$28,200 (the most recent was the Blue Moon Collection coin that was also very fresh to the market in March 2017. A PCGS AU58 (a comparable grade) has not seen a single example sold in auctions since June 1997! This is a remarkably RARE opportunity for the early gold specialist, one that SHOULD NOT be missed! Good luck!

**\$5 1839 PCGS AU53 CAC**

A really neat, high quality CHOICE AJ example of the first year of issue of the long lived Christian Gobrecht design. The present coin is so high quality you will mistake it at first glance for an even higher grade; while we do not guarantee that it will upgrade, the eye appeal is that of at least an AU55. Just the most subtle contact and friction are noted with the aid of a glass. Both sides have a wonderful original deep golden hue with some light rose and olive-gold accents. Well struck and nicely preserved, the eye appeal is fantastic for an AU!

PCGS 17, NGC 28, CAC 2. No PCGS/CAC coin has ever sold in auction. This date is remarkably scarce and we think the Collectors Universe value of \$1,900 does not reflect the rarity of CAC approved examples. Worthy of a strong bid from the date or type collector.

**LOT 447**

**\$5 1870-S PCGS AU58**

One of the absolute FINEST 1870-S half eagles in existence! Tied for the FINEST graded at either service, this wonderful high end AU58 presents a very rare and important opportunity for the advanced collector. Only 17,000 were struck. PCGS CoinFacts estimates that fewer than 100 are known in all grades, and the world class research conducted by David Akers found that most known examples grade lower than XF. Very few AU coins survive, and we think that many of those that are listed in the

Population data are duplicate entries. Today there are perhaps two others that are tied with this coin at PCGS for FINEST.

The present coin is highly lustrous with a warm orange-golden glow that graces both sides. Offering a much better strike than normally seen, the details are fully delineated and the mintmark, which is often soft, is quite bold. A few stray contact marks and lines are seen scattered about, but they have zero impact on the eye appeal or grade.

PCGS 3, NGC 2. The only PCGS-graded example sold in the 2014 ANA auction (nearly five years ago), realizing \$12,925. You have to go back nearly a decade to find a result for an NGC-graded example, making those results even more obsolete! The current Collectors Universe value is listed at \$16,500 and keep in mind this is a VERY IMPORTANT coin for the specialist. Anyone building a set of Liberty Head half eagles knows how hard finding a high grade example of this date can be! We know bidding will be intense for this one! Add this coin to your world class set!

##### \$5 1912-S PCGS MS63

This is a MAJOR condition rarity in a series that is full of them! While the mintage was 392,000 and should be enough for there to have been some saved in high grades, the vast majority went into circulation. The highest grade usually encountered are AU or low end Mint State grades. CHOICE examples are VERY RARE, anything finer is excessively so!

The present example is very pleasing to the eye with a warm glowing satin luster that radiates from the incuse devices into the fields. The devices are nicely impressed into the planchet. Since the fields are the highest points of the design, there are some minor traces of contact, but none of the marks are problematic or have any effect on the wonderful naked eye appeal.

PCGS 18, NGC 9. Prior to a PCGS/CAC selling in June 2016 for \$16,450. NO PCGS MS63 has sold in auction since March 2007. Further proving the rarity of this date in higher grades, while PCGS does list 20 examples in MS64, none have sold in a DECADE! The current PCGS Price Guide value is listed at \$16,500 and the value nearly doubles in 64. This is a VERY IMPORTANT opportunity for any collector of 20th century gold. Do not take it for granted!

BD-10. Fully struck devices on both sides are brought out by a bold, glowing satiny sheen. The totally "original skin" makes a huge impression when viewing the coin. The surfaces are remarkably clean and smooth: only with a powerful glass are you able to locate any minor marks, including a small cut in the date. The bold, satiny luster blooms all over and is better than what you normally see for the type. The surfaces boast a totally original and gorgeous mélange of colors: deep gold/pale greenish gold/faint rose colors. The eye appeal is beyond awesome!

PCGS 35, NGC 64 (for the date), CAC 8. There are two major takeaways from the Population Data: 1) there has to be lots of duplication of the same coin being resubmitted multiple times in hopes of gaining a higher grade; and 2) those that have graded 63 are NOT CAC caliber! PCGS has graded 3 in MS63+. The only one to ever sell in auction was the Elmer Welden Collection coin sold in November 2012 for \$82,250. The current Collector's Universe value is listed at \$90,000. This AMAZING 1799 \$10 is a PERFECT coin for a high end gold type set, and should see very strong bidding for sure! Who knows when the next time an exceptional coin like this will appear again! There is something about New Orleans mint eagles that this cataloger (GC) finds extremely charming. The challenge for many collectors is finding wholesome, original coins, that have good eye appeal. The present XF45 is totally original with a pleasing olive overtone to the wonderful golden surfaces. While we note some contact from circulation, the surface abrasions are considerably less serious than usually seen. The devices are well formed and despite the wear, they are quite bold throughout. The eye appeal is exceptional of the issue and grade.

PCGS 48, NGC 44, CAC 8. The last PCGS/CAC coin sold for \$2,760 in October 2018 and the current PCGS Price Guide value is listed at \$2,350. There is just something about No Motto eagles from the 1850s that are very charming. They are truly conditionally scarce coins, the vast majority disappearing into circulation during the Antebellum, with very few quality pieces for collectors to pursue. This 1854 is a great example and is a **MAJOR CONDITION RARITY!** The original mintage was modest, only 54,250 were struck. David Akers wrote that the "1854 is a rare date in any condition, and in AU or uncirculated condition it is very rare."

Between PCGS and NGC there are about two dozen Mint State coins graded, including some likely duplication. The presently offered coin has a choice look! A thick mint frost blooms with a warm glow on original surfaces. The fields and devices show some very minor ticks that account for the assigned grade. The design elements on both sides are generally crisp in definition. The eye appeal is excellent for the modest grade, and a true prize for the specialist!

PCGS 6, NGC 1, CAC 3. Three examples have sold in auction realizing between \$15,275 and \$18,001. The current Collector's Universe value is listed at \$19,000 and there are only two coins finer at PCGS, all MS64 and none have ever sold in auction. This is about as fine as you will ever see. Overall, the light surface marks are hard to detect other than using a very strong glass. Nothing stands out or hurts the coin. A decent luster blooms from all over. There is some very light "dirty" original toning. The color is a deeper gold. No question this coin has never been messed with. Miss Liberty and the details are frosty and are fully struck. The eye appeal is superb!

This is a VERY HIGH END and SUPERB GEM AU piece. We know it was resubmitted for an AU55-- we are not sure what the difference is.

Absolutely remarkable surfaces are exceedingly clean and smooth. Even using a strong glass all you can find are a few tiny old ticks scattered around. There actually is a slight glowing luster. We find it remarkable for a date that usually comes poor in quality that this piece even exists. Both sides are a GEM original orange gold color. There are NO spots or discolorations, nor is this coin "dirty". There is NO question this coin was never messed with. Miss Liberty and the details have light even wear. The eye appeal really is fabulous!

PCGS 14, NGC 16, CAC 2. CAC has only beamed 2 other 72-S's--both AU58 (which we have never seen). Do not be fooled by the pops, this date in AU50 and above is RARE! We also strongly feel the price guides are inaccurate too because of so few ever trading. If you collect better gold or \$10 Lib's, this is a coin that represents one heck of an opportunity. Good luck finding another PCGS CAC AU.

Rich orange gold with frosty mint luster. Tiny areas of flatness can be detected with a glass on the high points of Miss Liberty's nose, eyebrow and hair curl above the ear, only the strictest of graders would consider this coin about uncirculated. In our view, this coin would be better described as MS60 with light contact.

PCGS 447, NGC 560, CAC 25. The pops should tell you right away how these come! The PCGS Price Guide lists the value at \$2,000, but the last two examples sold for \$2,530 in October 2018 and \$2,880 in the 2018 ANA auction. This frosty "gem" AU is nicer than many lower grade Mint State coins out on the market, so take its excellent eye appeal into consideration when formulating your bid.

This lovely, original, VERY CHOICE 93-S \$10 ranks among the VERY FINEST graded. PCGS has graded just seven in MS64 or finer, placing this coin in the condition census for the date. The sharply struck devices stand out against the near-GEM quality surfaces. Gleaming mint luster glows with a strong brilliance on both sides, accenting the warm orange-gold toned surfaces. The eye appeal is exceptional.

PCGS 4, NGC 1, CAC 1. There has only been a single PCGS MS64 sold in auction—a different example that brought \$4,080 in December 2018. Prior to that, only the NGC coin had sold, realizing \$4,830 a decade ago. The current PCGS value is listed at \$6,500. The only one finer that has ever sold in auction is a PCGS MS66 that sold in the 2007 FUN auction for \$43,125. This impressive 93-S ten is bound to be included in a world class Registry Set.

**PCGS# 8728 | ESTIMATE: \$4,500+**

**LOT 459**

**\$10 1895 NGC MS63**

A choice survivor with a soft glowing golden mint luster and frosty devices. Generally well struck. The quality is decent, with just some minor contact consistent with the assigned grade.

PCGS 740, NGC 1973. It is interesting to note that even though this coin is NOT CAC, only 19 have been awarded beans at this level. Collector's Universe is \$825 and the last one sold for \$780. The date becomes scarce in 64 and extremely rare finer.

**PCGS# 8732 | ESTIMATE: \$650+**

**LOT 460**

**\$10 1901-S PCGS MS65+ CAC**

No question this coin is totally original and very pleasing, well deserving of its grade. Overall, the surfaces are clean, although there are a few very tiny ticks scattered around and a spot that attests to the originality. The surfaces have that thick satiny type of mint luster around the bust on the obverse. Totally original shades of gold/pale greenish gold swirl all over. Miss Liberty and the details are frosty and are fully struck. The eye appeal is super!

PCGS 1277, NGC 1305, CAC 156. PCGS has graded just 78 in MS65+ and the date becomes quite scarce any finer. The current PCGS Price Guide value is \$3,000 and the most recent to sell realized \$3,480 in April 2019. Keep in mind we sold a PCGS/CAC MS66 in our August 2018 Premier Session for \$7,150. A delightful coin for the gold bug.

**PCGS# 8749 | ESTIMATE: \$3,000+**

**LOT 461**  
**\$10 1907 INDIAN, NO MOTTO. PCCGS MS65+ CAC**

A truly special GEM worthy of its MS65+ grade. Fully lustrous and high end, a bold and radiant satiny frost sets the smooth surfaces aglow in a rich golden vibrance. All the details are well struck with crisply defined features throughout. We note a tiny patch of rich coppery orange toning near the reverse rim at 9:00 as an identifier to this outstanding and original beauty.

PCGS 267, NGC 328, CAC 68. PCGS has graded just 17 in MS65+ and the most recent CAC approved example realized

\$9,000 in the 2018 FUN auction. Prior to that, the only other PCGS/CAC coin to sell realized \$11,163 back in July 2013. The current PCGS value is listed at \$8,850. Keep in mind a slightly finer MS66 CAC is worth about double! This is a bold example for type or date purposes! We can see this coin hammering at a very strong bid when this one crosses the block!

**PCGS# 8852 | ESTIMATE: \$7,750+**

**LOT 462**  
**\$10 1909 PCCGS MS63**

Totally original, a lovely coin that was likely in an old gold holding until it was graded, either from Europe or South America. Sharply struck, satiny, and prettily toned, this coin has a great look that is only slightly marred by some minor traces of contact.

PCGS 339, NGC 141. The current PCGS Price Guide value is listed at \$1,650 and this one sold in the 2017 FUN auction for \$1,763. More recently these have sold in the \$1,050-\$1,400 range. Scarce any finer, this is a pleasing coin that is a wonder why CAC did not bean it.

**PCGS# 8862 | ESTIMATE: \$1,200+**

**LOT 463**  
**\$10 1909-D PCCGS MS62**

Frosty surfaces show a soft, glowing, underlying luster that frames the sharply struck devices. A few old bag marks are noted, which are acceptable for the assigned grade and do not detract much from the originality of this Mint State \$10 Indian.

PCGS 378, NGC 242. The last three sold for \$1,260/1,264. An the current PCGS Price Guide value is listed at \$1,850 and this coin realized \$1,939 in April 2016. Very scarce any finer!

**PCGS# 8863 | ESTIMATE: \$1,200+**

**LOT 464**

**\$10 1909-D PCGS MS63**

A choice example of this scarce date. Frosty lustrous surfaces glow with a pleasing original luster. Well struck devices have a nice olive-gold accent. There are some traces of contact, but these are grade appropriate, and the surfaces are not hacked up.

PCGS 173, NGC 47. RARE any finer, PCGS has graded just 50 higher in all grades up to MS67. This coin sold for \$3,173 in February 2016 and more recently one brought \$3,840 in June 2018. The current PCGS value is listed at \$3,600 and know that the value more than doubles when you get to MS64. A good coin for anyone working on a set of \$10 Indians.

**PCGS# 8863 | ESTIMATE: \$3,000+**

**LOT 465**

**\$10 1911 PCGS MS65 CAC**

This coin exudes HIGH end quality. The surfaces are ultra clean and are super satiny. Even using a strong glass you will NOT be disappointed.

The only marks are a few lines on the lower left obverse. A strong glowing luster really brings out the wonderful even deeper original yellow gold colors. There are NO spots or discolorations. Miss Liberty and the details are frosty and have crisp full strikes. The eye appeal is fabulous!

This cataloger has seen so many nasty pieces for this date that a really nice like this just stands out from across the room! Yes, folks, there is a difference between a CAC MS65 and a NON CAC MS65.

PCGS 139, NGC 150, CAC 53. The most recent PCGS MS65 CAC to sell in auction realized \$9,000 in March 2019. The current PCGS Price Guide value is listed at \$7,500. The value doubles in MS66. This is a great coin for the gold type or date collector looking for a wonderful GEM quality example. Good luck!

**PCGS# 8868 | ESTIMATE: \$7,500+**

**LOT 466**

**\$10 1916-S PCGS AU58+ CAC**

First off we have seen Mint State coins without the outstanding surfaces and eye appeal that this super slider has. Indeed for a GEM AU, this coin is truly superb, with excellent luster, a good strike, and just a few tiny ticks and giggles noted for full disclosure.

PCGS 291, NGC 313, CAC 26. This is the ONLY AU58+ graded at either PCGS or NGC. The most recent regular AU58 graded by PCGS was NOT CAC and sold for \$1,560 in June 2018. The current Collector's Universe value is listed at \$1,550 and it would not shock us if this superb slider realized that or more.

**PCGS# 8880 | ESTIMATE: \$1,300+**

#### LOT 467

#### \$10 1920-S PCGS AU53 CAC

This is a fantastic 1920-S! This is NOT your average example! Typically, this date comes banged up and horrible; we have seen Mint State coins with cuts and problems.

This coin is truly Premium Quality. Without a strong glass, you will only see a few LIGHT and widely scattered ticks and a minor line; there are NO big cuts. Overall, the surfaces are clean, smooth, and have NOT been messed with. The color is an even ORIGINAL faded gold with hints of orange. There are NO spots or discolorations anywhere. Even the luster is surprisingly good. Miss Liberty and the details have surprisingly strong strikes. The wear is VERY light and is NOT discolored. The eye appeal is VERY nice!

PCGS 3, NGC 1, CAC 1. This coin last sold in auction back in 2013, and it realized \$35,250. Even though there are several coins higher, CAC has only beamed 10 coins in all grades (with possible duplication). Regardless, this is a date that rarely appears in ANY grade. Even if you are building a choice set, this is a great coin to add. Opportunity knocks loud for the serious \$10 Indian collector or collector of rarities. We have a tremendous respect for this date and any grade one can be found in-so long as it is nice.

PCGS# 8881 | ESTIMATE: \$35,000+

**LOT 468**

**\$20 1854 LARGE DATE. PCGS MS64+ CAC**

This is the **FINEST KNOWN** 1854 Large Date \$20 at either service, and one look at it makes that fact clear. What an amazing coin! It borders on full MS65 quality.

The Large Date logotype is a somewhat recent discovery, mentioned in Walter Breen's Encyclopedia, published in 1988. It has taken a while, but it is now clear that this variety is much harder to find in a 1 grade than the Small date type. PCGS Conrads and Doug Winter both estimate the survival in all grades at approximately 150 pieces. The variety was created when the diesinker used a date logotype punch for the 1854 silver dollar, the numerals take up a significantly larger portion of the field below Liberty's neck.

Outside of the shipwreck coins, finding any Type 1 double eagle in this quality is unheard of! We love this coin! Outstanding surfaces are super clean and are super smooth. There is one small scuff visible on the obverse and one hidden on the reverse-which are what we think keeps it from a full MS65 designation. There actually is a full cartwheel luster that beams from all over. Both sides are a totally original and beautiful even yellow gold color. For accuracy there is a tiny Mint grease stain on the reverse at 8.00. No question this coin has never been messed with. Miss Liberty and the details are extremely well struck and have generous frost. The eye appeal is terrific!

PCGS# 2, NGC 1, CAC 3 (We know this coin is at least 2). This is the only MS64+ and we have a feeling that this one coin represents the ENTIRE population listed. There are NONE higher. Save for the Central America shipwreck coins, finding ANY GEM Type 1 \$20 is impossible (especially with CAC approval). The current PCGS Price Guide value is \$135,000. It is far rarer than any Ship Wreck coin. We loosely compare it to the MONSTER 1850 PCGS MS64 CAC Legend bought June 2016 for \$170,000 (that date has a PCGS pop of 4). The quality and eye appeal are a little there and then some. The opportunity is real here for this once in a decade coin!

**PCGS# 98911 | ESTIMATE: \$105,000+**

#### LOT 469

**\$20 1865-S PCGS MS62 CAC**

Ex Brother Jonathan, #840.

A wonderful CHOICE Mint State 1865-S double eagle, its existence of which is only thanks to the tragic shipwreck of the Brother Jonathan on July 30, 1865 off the coast of Crescent City, California. Prior to the discovery and sale of the shipwreck coins in the late 1990s, this date was virtually UNKNOWN in Mint State. Today, thanks to this, and the wreck of the S.S. Republic, there are several hundred Mint State coins for collectors to choose from.

For the picky collector, the presently offered coin has a vibrant mint bloom throughout that enhances the warm orange-gold coloration. Sharply struck devices stand out. A scattering of contact, which after a century under water can easily be overlooked, account for the assigned grade. High end and very pleasing, this coin has a great historical provenance, housed in the original holder with the Brother Jonathan label.

PCGS 108, NGC 14, CAC 9. The current PCGS Price Guide value is \$11,000. We cannot find a CAC-approved example from the Brother Jonathan in the original holder having sold in auction. These are all well distributed as they do not appear in auction with much frequency. Bid accordingly.

**PCGS# 8944 | ESTIMATE: \$10,000+**

#### LOT 470

#### **\$20 1866-S NO MOTTO. PCGS AU55 CAC**

A very RARE and highly desirable double eagle issue, the last of the Type Ones. While the reported mintage was 120,000, many experts believe that a large number were melted and never released and while we may never know for sure how many were released into circulation, what we know is there are very few to go around in all grades (PCGS CoinFacts estimates about 300, while Doug Winter estimates 175-225). Regardless, this GEM AU55 ranks among the top 20 graded by PCGS. These were all struck in February 1866, before the new With Motto dies arrived.

The surfaces show a light friction in the fields and the highest portions of the devices, artifacts of a brief stay in commerce. A few ancient stray ticks can be noted, but they do not detract the eye. A bold satiny mint frost blooms on the obverse, while the luster on the reverse is distinctly reflective with a very attractive, semi-prooflike flash.

PCGS 11, NGC 24, CAC 3. The other PCGS/CAC sold in auction in November 2013 for \$88,125 and that is the only other recorded auction price for a PCGS AU55. The current PCGS Price Guide value is listed at \$72,500. There are only nine coins graded finer at PCGS; a PCGS AU58 is a six-figure coin, the last one sold back in 2009 and the finest is the ex Saddle Ridge Hoard example that graded MS62. This is a real prize for any advanced double eagle specialist, among the finest PCGS coins available in the open market. We wish every interested bidder luck as there will be intense bidding competition for this beauty--and we offer, in advance, a hearty congratulations to the successful bidder!

**PCGS# 8945 | ESTIMATE: \$65,000+**

#### LOT 471

##### \$20 1866-S MOTTO. PCGS AU58 CAC

Truly a very pleasing, high end, near-Mint State example. It is really a wonderful "super sider." Early in 1866, the design was modified slightly to include IN GOD WE TRUST in the circle of stars on the reverse, however, the new reverse dies did not arrive in San Francisco until after some older No Motto dies were employed and coins put out into circulation.

Rich orange-gold color dominates with areas of lighter gold that contrast. The luster is essentially unbroken and glows over the satiny surfaces. Really the evidence of any time in circulation is so microscopic; the friction is barely noticeable on either side. There are a few tiny marks that we can see only with the help of a strong glass, none of which are inappropriate for the grade, nor do they affect the superb eye appeal.

PCGS 45, NGC 114, CAC 16. Only 6 PCGS/CAC examples have sold in auction, averaging an APR of \$12,920 and the current PCGS Price Guide value is listed at \$12,000. This borderline Mint State coin is a great example for the date, which becomes quite elusive in Mint State. Good Luck.

PCGS# 8950 | ESTIMATE: \$12,000+

#### LOT 472

##### \$20 1868-S PCGS AU58+ CAC

High end and totally original, this Type Two double eagle has the look of a Mint State coin. Essentially full, satiny luster has a warm olive-gold toning on both sides. Minimally marked for the grade, we note just a few tiny ticks and the slightest touch of friction on the surfaces. This is a conditionally rare issue, with under 70 graded in Mint State at PCGS, the majority clustered in MS60 and MS61, and NONE FINER than MS62+.

PCGS 133, NGC 268, CAC 39. There are only 7 graded AU58+, only one of which has sold in auction, realizing \$3,720 in April 2019. The present coin is clearly more original and eye appealing and should bring more. The current PCGS Price Guide value is listed at \$4,500. A nice coin for an Everyman gold Registry Set.

PCGS# 8954 | ESTIMATE: \$3,800+

#### LOT 473

##### \$20 1869-S PCGS AU55 CAC

This is a very eye appealing and ORIGINAL Type I double eagle. It is totally original and offers a great look, offering rich orange-gold color with khaki and olive hues which come to life with a pleasing satiny sheen. Well executed in terms of strike, the details are nicely rendered. The surfaces show just a touch of friction and there are only a few tiny ticks noted under a strong glass, typical for the grade.

PCGS 181, NGC 372, CAC 37. Do not let the populations fool you, these do not come up for auction too often. The most recent PCGS/CAC coin to sell in auction brought \$2,703 in our January 2019 Regency sale. The current PCGS value is listed at \$2,500. A collection of Philadelphia and San Francisco mint Type I double eagles in CHOICE AU grades would make a very neat short set to work on.

PCGS# 8956 | ESTIMATE: \$1,800+

LOT 474

**\$20 1869-S PCGS MS61 CAC**

Like most Type 2 twenties, the 69-S is RARE in Mint State grades; the vast majority of them are graded MS61 and are extremely rare any finer. The presently offered coin is totally original with a gorgeous orange-gold skin and bold mint brilliance. There are some minor traces of contact, appropriate for the assigned grade. The eye appeal is amazing for the "modest" grade and will delight any gold coin collector.

PCGS 58, NGC 37, CAC 10. The current Collectors Universe value is listed at \$6,500. Only a single

CAC-approved example has sold in auction, and it sold really cheap. A couple of years ago, this would have been a \$7,000-\$8,000 coin! Only 16 coins are graded finer, making this a great example for a date set.

**PCGS# 8956 | ESTIMATE: \$5,000+**

#### OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collectors can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

#### LOT 475

##### **\$20 1882-CC PCCS MS62 CAC**

Legend Rare Coin Auctions is proud to offer the FINEST 1882-CC double eagle we have ever had the pleasure of offering in auction. Out of a smallish mintage of only 39,140, perhaps 70-100 survive in Mint State, most of which are at the lower grades, MS60 and MS61. At the MS62 level, as offered here, the date becomes quite rare indeed. To date, this date is UNKNOWN in MS63+ or finer grades, making this coin, a very CHOICE MS62, a significant rarity.

Brilliantly lustrous surfaces gleam through a rich orange gold coloration. The surfaces are totally original, but NOT dirty, nor are the surfaces all hacked up and baggy. Sharply struck devices are semi-frosted and stand out against the satiny surfaces. The eye appeal is outstanding!

PCGS 23, NGC 10, CAC 4. Do not let the population reports fool you, these are RARE! We cannot find the appearance of a CAC-approved MS62 EVER selling in auction. No PCCS MS62 has sold since October 2014 when one sold for \$29,375. The current Collectors Universe value is \$34,500. Only five coins are graded higher, including the PCCS/CAC MS63 from the Battle Born Collection, which realized \$80,500 in the 2012 ANA auction. Worthy of a superb collection of double eagles, and will see a very strong bid! Anticipate paying up for this HIGH END example!

**PCGS# 8997 | ESTIMATE: \$25,000+**

**LOT 476**

**\$20 1890-CC PCCS MS62 CAC**

Beautiful and FRESH! A vibrant satiny luster glows all over with strong rolling cartwheels that flow gracefully, uninterrupted on both sides. The devices are struck with precision, fully formed and bold in definition. A few ancient ticks and lines are seen with a glass, none of which have a serious impact on the excellent eye appeal, and all are appropriate for the assigned grade.

There is just something captivating about ALL Carson City gold coins. While the 1890-CC is common enough in circulated grades, it is VERY SCARCE in Mint State. RARE any finer than the currently offered grade.

PCCS 68 NGC 53, CAC 13. The last two PCCS/CAC examples sold back in the summer of 2014, one bringing \$23,294 in the ANA auction, and one bringing \$30,550 in June 2014. Just a dozen examples are graded finer, and NONE have sold since 2012. WOW, does this coin present a great opportunity. Bid accordingly!

**PCCS# 9014 | ESTIMATE: \$24,000+**

**LOT 477**

**\$20 1895 NGC MS63**

Well struck, fully lustrous, and very pleasing, original surface quality. Housed in an old NGC-fatty holder

PCGS 2896, NGC 4024. The last two sold for \$1,560 in March 2019. The current Collector's Universe value is listed at \$1,750. With premiums on "generic" gold so low, now is a great time to put away as many different choice grade double eagles as you can. Good luck!

**PCGS# 9027 | ESTIMATE: \$1,350+**

**LOT 478**

**\$20 1895 PCGS MS64+ CAC**

What a great looking GEM! Really, if this was a 1904, it would likely have graded MS65. We make no guarantees that it will ever upgrade, but it is VERY HIGH-END! This coin, while considered a generic date in MS64 and lower, it is EXCESSIVELY RARE in MS65, with just seven coins graded finer at PCGS. This is a highly frosted and satiny lustrous beauty. Just a few tiny, insignificant traces of contact are noted under a strong glass, but none of these are singularly distracting to the naked eye.

PCGS 508, NGC 599, CAC 71. PCGS has graded 41 in MS64+ and only seven coins finer. Clearly there's duplication of the same coin being submitted multiple times in hopes of getting an MS65 grade. This coin was the most recent to sell in auction, realizing \$3,290 in our March 2019 Regency Auction and the current Collector's Universe value is listed at \$4,000. Keeping in mind that the CU value in 65 is \$20,000, this coin presents a great look and value!

**PCGS# 9027 | ESTIMATE: \$3,200+**

**LOT 479**

**\$20 1896-S PCGS MS64 CAC**

A very attractive example of this conditionally very rare date. While the mintage of 1,403,925 suggests a generic date, in MS64 this date is scarce, and is extremely rare any finer. Radiating satinuster blooms on both sides. The surfaces are generally smooth and free from any sizable marks or lines, nor can we find any copper spots. The eye appeal is very high end.

PCGS 188, NGC 176, CAC 13. Only seven coins are graded higher, so we feel that a good number in 64 may be resubmissions. This coin does have a previous auction record of \$4,888 in July 2011. The current PCGS Price Guide value is listed at \$3,950. A very desirable Type 3 Twenty for the date collector, and a coin that will see spirited bidding from specialist collectors and generalist gold bug alike.

**PCGS# 9030 | ESTIMATE: \$3,000+**

**LOT 480**

**\$20 1897-S PCGS MS64+ CAC**

A coin well deserving of its + designation! Only light (and we mean light!) frost breaks/scuffs are all that keep this coin from an MS65 designation. Overall, the coin does look clean. Both sides enjoy a strong booming luster. The surfaces have a light satiny texture and are clearly the ORIGINAL "skin" you want to see. There are NO spots or stains. The color is an even ORIGINAL rich gold. Miss Liberty and the details are frosty and have full strikes. The eye appeal is fabulous!

PCGS 786, NGC 537, CAC 137. PCGS has graded 91 in MS64+, and only 16 finer. We sold the last two examples, both in September 2018, one for \$2,970 and the other for \$2,860. The current PCGS Price Guide value is listed at \$3,650 and this coin realized \$3,408 in April 2017. Anything finer, of which only two coins are CAC approved, will cost well into the five figures. A great example for any collector of double eagles!

**PCGS# 9032 | ESTIMATE: \$2,500+**

**LOT 481**

**\$20 1900 PCGS MS64+ CAC**

A lovely, original 1900 \$20 Lib. The surfaces boast a thick, satiny luster and are clean overall. The luster is above average for the date and gleams from all over. There are NO spots or other issues. Miss Liberty and the details are well struck and we grade the reverse a full GEM. The eye appeal is excellent!

Much scarcer than the 1904 and selling for nearly zero premium over that, this 1900 double eagle would make a nice addition to any holding of U.S. gold coins. The current Collectors Universe value is \$2,200 and these have sold in the \$1,800-\$2,000 range in auction.

#### LOT 482

#### \$20 1904 PCGS MS67

A SUPERB 1904 double eagle, despite being the most common date gold coin in the U.S. series, this is tied for FINEST GRADED at either service! After 33 years of grading coins, PCGS has graded just THREE in MS67, NONE are graded finer.

A thick, satiny mint frost shows off a vivid brilliance that gleams all over. Sharply struck devices stand out against the smooth, lustrous fields. The details are crisp and bold. A strong glass reveals nothing serious, just the slightest tick or two, and a stray line. The color shows off a rich yellow gold, with a pale green overtone in some areas. A couple of toning dots are noted, attesting to the original status of the surfaces. The eye appeal is as expected for the lofty grade designation, quite pleasing.

David Akers noted of this issue, "The 1904 is by far the most common date in the...series." This is evidenced by the PCGS CoinFacts estimate that over 1.2 million examples survive in all grades, of which, they estimate 5,500 are in MS65 or better. HOWEVER, since most Mint State survivors are repatriated holdings that were sent to Europe and Latin America in the early 1900s, many show lots of abrasions, precluding SUPERB grade assignments. PCGS and NGC have been grading coins since 1986 and 1987, respectively, and they have combined graded just five in MS67.

PCGS 3, NGC 2. NONE have ever sold in auction. Indeed, of all dates in the Type 3 Liberty double eagle series, PCGS has graded 11 examples, and per our database, NOT A SINGLE MS67 has ever sold in auction. The current Collector's Universe value is listed at \$95,000. Since there are no records, who knows where the hammer will actually fall. At the end, your collection will achieve a status that few will ever have the chance to own a SUPERB GEM Liberty Head double eagle. Good luck!

#### \$20 1906 PCGS MS63+ CAC

While many late date Lib \$20s are high mintage issues, the 1906 Philadelphia issue has a low mintage of 69,596, very few of which were saved at the time of issue. This CHOICE example is high end for the grade, close to full MS64 quality. Indeed, we have seen common date MS64s that do not have anywhere close to the eye appeal this one does.

Frosty surfaces have a bold satiny lustrous sheen that enlivens the smooth fields and sharply struck devices. Totally original and visually very appealing, this is a great example of this tougher date

PCGS 142, NGC 41, CAC 14. There are just 8 graded MS63+ at PCGS. Only one has ever sold in auction, bringing \$5,760 in November 2018.

This is not that coin. We sold a non-CAC PCGS MS63 coin in September 2018 for \$5,523 and the last two PCGS MS64s sold for \$14,400 and \$13,200 in 2018. The current Collectors Universe value is listed at \$8,200 and this coin will see spirited bidding for sure. Add this one to your set of Type 3 \$20s!

#### \$20 1907 HIGH RELIEF. WIRE EDGE. PCGS AU55 CAC

This is a very pretty, and very affordable example of the most beautiful design that the United States mint ever produced for general circulation. This is not your typical washed out, "product" coin. Rich coppery orange color grows in the deeply "dished" fields surrounding the sharply struck 3-D devices. Only seeing some brief time in circulation, before being saved for posterity, there are only a few minor lines that we note for accuracy, but none that take away from the outstanding eye appeal.

PCGS 226, NGC 35, CAC 25. The current PCGS Price Guide value is listed at \$14,500, and this one faces up better than the AU58 that we sold in October 2018 for \$12,650. This is a very attractive and affordable example for a type or date set. What a grand opportunity

##### **\$20 1907 HIGH RELIEF, WIRE RIM. PCGS MS63+**

One of our favorite types, one of the most beautiful pieces of numismatic art to ever come out of the U.S. mint for circulation. Regardless of grade, collectors are always attracted to this wonderful design.

Fully CHOICE and totally original, the coloration is a gorgeous, rich honey-gold shade, which is satiny and has a thick frost. There are just a few tiny marks that break the frost, accounted for in the assigned grade. Well struck, Liberty strides triumphantly forward in bold 3D relief. The eye appeal is quite nice.

PCGS 9, NGC 13. The last one to sell in auction realized \$20,627 in April 2017. The only other PCGS MS63+ to sell in auction was back in February 2014. The current PCGS Price Guide value is listed at \$25,000. A one-year type coin, that is a masterpiece of the coin's art, is always in demand and this coin will delight anyone looking for a nice representative for a type set.

**LOT 486**

**\$20 1907 HIGH RELIEF-WIRE RIM. NGC MS64+**

One of the most beautiful designs ever employed by any country in any era, the 1907 High Relief double eagle is an American numismatic classic. The story of the collaboration of President Roosevelt and Augustus St. Gaudens has been repeated over and over in thousands of auction descriptions, articles, and books. St. Gaudens' stunning design featuring Liberty striding triumphantly forward with a torch and olive branch--symbols of enlightenment and peace. The relief caused problems at the mint when striking, three blows from the dies on the hydraulic medal press were required to bring up all the details in the design. After 12,367 examples were struck (and after St. Gaudens passed away from stomach cancer), the design was altered to a lower relief for ease of striking.

The presently offered example is totally fresh to the market. The high wire fin on the rim can be seen on the obverse. A lovely orange-gold patina with rose accents give off a great look when viewed. There are a few stray lines seen with a strong glass, but the impressive nature of the fully struck up high relief devices make them easy to ignore. The eye appeal is exceptional on this near GEM.

PCGS 36, NGC 30 The last non-CAC NGC MS64+ sold in October 2015 for \$29,325. This very eye appealing example should be a delight for any collector building a gold type set or a box of 20 neat coins, or is looking to upgrade a lower grade example in a Registry Set. The current Collector's Universe value is listed at \$32,500. Good luck!

#### LOT 487

#### **\$20 1907 HIGH RELIEF-FLAT RIM. PCGS MS64 CAC**

Truly a borderline GEM--we have seen MS65 coins that are not as clean or frosty as this presently offered beauty. While we do not guarantee any upgrade, the technical and aesthetic attributes are so high end, it will easily fit in any GEM gold type set.

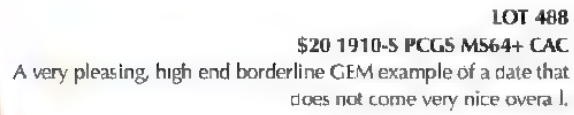

Thick, frosty luster gleams all over on both sides of this well struck High Relief. All the details stand out with a tall, full 3D effect. It takes a strong glass to find any traces of contact, and those stray ticks do not detract from the great eye appeal. The rich, golden-orange color shows off subtle accents of olive undertones that attest to the originality of this beauty.

One of the most beautiful designs executed for circulation in the history of coinage, from ancient times to the modern era, the High Relief is a classic piece of numismatic history, and a high end MS64 is perfect for the type or date collector.

PCGS 200, NGC 130, CAC 58 The last PCGS/CAC sold for \$30,000 in an online auction in February 2018; that same coin sold in the 2018 FUN auction for \$27,600. Prior to that, the last PCGS/CAC coin sold for \$30,550 in May 2015. The current PCGS value is listed at \$33,500. Keep in mind that a PCGS MS65 CAC is worth \$50,000! This beauty belongs in a great set!

**PCGS# 9136 | ESTIMATE: \$25,000+**

PCGS 1340, NGC 542, CAC 96. PCGS has graded 50 in MS64+.

The most recent example to sell in auction brought \$2,640 and the current Collector's Universe Value is \$3,000. These do NOT make frequent appearances like the pops may lead you to think!

#### LOT 489

**\$20 1911-D/D RPM, FS-501. PCGS MS66+ CAC**

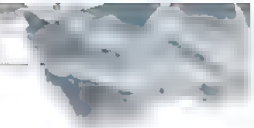

WOW! This is quite the impressive borderline SUPERB GEM 1911-D repunched mintmark double eagle. One of the few distinct die varieties in the Saint Gaudens series, collectors have long searched unattributed 1911-Ds for one.

The present coin has a great look for the date. Well struck devices stand out against frosty lustrous fields that have an almost sandblast-like texture. Rich orange-gold with lighter brilliant gold highlights. The first D was placed too far to the right, and then repunched properly. The D/D is quite bold and can be seen without the aid of a glass. As expected for the lofty, borderline SUPERB GEM grade, any traces of contact are extremely minor and almost not worth mentioning.

PCGS 53, NGC 40, CAC 23. PCGS has graded just 5 in MS66+ with just a single MS67 finer (which is impounded in the Simpson Collection). The current Collectors Universe value is listed at \$30,000 and Ron Guth notes on PCGS CoinFacts that "this variety is worth approximately 150-200% of a regular type coin." Thus the value makes sense as the last PCGS/CAC MS66+ 1911-D sold in the 2018 ANA auction for \$14,400. Worthy of the finest set of Saint Gaudens double eagles, this coin is a real prize for the specialist of 20th century gold. Do not let this opportunity pass you by!

**LOT 490**

**\$20 1914-D PCGS MS64 CAC**

This is a bold, lustrous example with a decent strike and great color. A few tiny ticks preclude a GEM designation, but the eye appeal is excellent.

PCGS 3084, NGC 2041, CAC 159. Today the 14-D's are lumped in with generic issues, but it is indeed scarcer than the 24, 25, 26, 27, and 28 issues. No longer carrying a premium, add this very CHOICE piece to your gold holdings. The last PCGS/CAC example realized \$1,763 in our March 2019 Regency Auction.

**PCGS# 9165 | ESTIMATE: \$1,450+**

**LOT 491**

**\$20 1915 PCGS MS64 CAC**

With a mintage of 152,000, the 1915 double eagle is one of the lower mintage issues of the entire series. While not rare in lower Mint State grades, it becomes quite difficult to locate in MS64 and finer grades.

High end for the grade, the luster is bold and frosty, accenting a satiny surface. Generally well struck and only the most minute marks are noted for accuracy, but they are totally appropriate for the assigned grade. The eye appeal is wonderful.

PCGS 347, NGC 313, CAC 42. With its rarity in GEM grades, we believe there has to be some duplication in the population reports. The most recent PCGS/CAC coin to sell in auction realized \$5,460 in March 2019. Prior to that, there was a wide range of APRs from \$4,700 to \$9,988, with most in the \$5,000 to \$5,500 range. Keep in mind how truly rare this date is and bid accordingly.

**PCGS# 9167 | ESTIMATE: \$4,500+**

**LOT 492**

**\$20 1916-S PCGS MS65**

Satiny and totally original, we think this coin was from an old European holding before being graded years ago. The surfaces are satiny with bold frosty luster. The details are sharp, and we note just a few minor ticks and traces of contact, but the eye appeal and quality are generally wholesome.

PCGS 1224, NGC 770. These have generally sold in the \$2,040 to \$2,640 range and the current PCGS Price is listed at \$2,800. Scarce finer, this is a great coin for anyone putting away \$20 Saints.

#### LOT 493

##### **\$20 1916-S PCGS MS66 CAC**

This is a truly SUPERB GEM 1916-S. Keep in mind, these do NOT come looking like a 1927. We rank this coin a 9 on our quality scale (out of 10). Great surfaces are a thick satiny texture. There are actually very few ticks and NO scuffs anywhere. A surprising glowing luster beams from all over (unusual for a 16-S). Both sides have a thick gold color with light toning. Miss Liberty and the details are well struck and have delicate frost. Unlike so many of this date, this coin has never been messed with. The eye appeal is fantastic!

PCGS 187, NGC 145, CAC 30. This is the last PCGS CAC piece to sell in auction; it brought \$13,200 September 2018. NOTE: Legend Numismatics just rejected an MS66+ that looked incredibly drab and lifeless at \$30,000. This is a great looking coin, with just five graded finer, and the only one to have sold in auction realized \$24,675 in our November 2018 Regency Auction.

Ex A&A COLLECTION, as noted on the insert

Attention all Saint Collectors! Legend Rare Coin Auctions is proud to have been consigned this true choice piece. We fully disagree with CAC not beaming it (that is our opinion).

After closely examining this great Saint rarity, we found nothing but minor to microscopic ticks that were few and far between. We used a strong glass to look around too. We did find one questionable area-the upper wings are flat. We do NOT believe its from wear; we think it was struck that way. An above average luster glows from all over. There seems to be a light thick pale greenish gold layer of toning. Looks original to us. There are NO spots or discolorations. Miss Liberty herself is well struck. The eye appeal looks great!

PCGS 3, NGC 1, CAC 1. The last sale for one of these was back in 2010-when one sold for \$322,000. These are certainly worth far more today. In fact in 2014, Legend Numismatics paid \$425,000.00 for the PCGS MS64 CAC (which is now in major a collection and will not be for sale in our lifetime). We were offered \$500,000 for that coin three years ago. Its for sure worth much more today! We can not stress enough how this is the real "Key" and stopper for the series. Do not think too hard on this coin. Once it is sold you are just out of luck finding another-and you won't like most of the 62's and MS63's! Good luck!

PCGS 1427, NGC 792, CAC 354. The average APR for a PCGS/CAC MS66 is \$830. Since this coin is well above average, it should bring a price well above average.

A SUPERB GEM worthy of its status as tied for second FINEST graded at PCGS. Its position near the top of the population is just part of this amazing coin's impressive stature. It is also gorgeously toned with rich peripheral coppery gold toning that frames both sides. A bold luster booms from below the toning, highlighting the bold struck devices. A glass reveals a single contact mark in the wide open reverse field, but it does not detract from the stupendous, outstanding eye appeal.

PCGS 117, NGC 85, CAC 69. There are just 16 in MS67+. A casual survey of prior auction records reveals none that have the stunning eye appeal of this SUPERB GEM. Clearly a coin that is truly special and worthy of the finest of toned classic commem sets!

Ex San Diego Collection

With just a single coin graded finer, this beautifully toned Lynchburg is more vividly toned than the beauty that we sold in our recent Regency Auction 28 sale.

Wonderful orange and gold tone is met with pearly-silver-sea green color and brought out by the SUPERB underlying luster. The sharply struck devices stand out against the smooth surfaces and there is just a single line worthy of merit on only visible with a glass.

PCGS 140, NGC 103. There are only 20 graded in MS67+. The most recent examples were CAC approved; you have to go back over three years to get a non-CAC coin. The current Collector's Universe value is listed at \$3,000. Only a single MS68 finer, a coin that never sold in auction, making this beauty one of the FINEST available to collectors. PCGS 70, NGC 19. A coin like this is special—the quality and the eye appeal cannot be translated into price guide values—you need to look at comparable colorful examples to figure your bid, and spectacular toned examples in our auctions have sold in the \$3,000-\$5,500 range. Good luck!

A GEM example of this low mintage classic commem, of which only 5,000 were produced. Boldly lustrous, the sharply struck devices stand out on the smooth, high end surfaces. A smattering of original toning graces the obverse imparting a great look.

PCGS 319, NGC 264, CAC 56. The current Collector's Universe value is listed at \$1,600, but the two most recent sold for above that level, one for \$3,120 in March 2019 and the other sold for \$2,160 in June 2018. SCARCE any finer, this handsome example will delight any commem collector.

**PCGS# 9331 | ESTIMATE: \$1,600+**

#### LOT 502

**50C 1926 SESQUICENTENNIAL. PCGS MS65 CAC**

Really high end and beautifully toned. Fully brilliant satin mint bloom shines on silky smooth surfaces. The devices are boldly struck which is so often not the case on this normally flat as a pancake type. The details are really sharp and are framed on both sides by a pleasing, light gold and pastel iridescent patina. The eye appeal is tremendous for a Sesqui, and remarkably free of any distracting marks.

PCGS 377, NGC 284, CAC 95. Nicer than the one we sold in April 2017 for \$2,310. Since this issue is remarkably rare in MS66, we believe that the population figure is inflated due to multiple submissions of the same coin in hopes of getting a 65+ or 66 grade. We would not flinch if this one was graded 65+. Not a coin you will find graded finer, nor with such fabulous eye appeal!

**50C 1935 SPANISH TRAIL. PCCGS**  
**MS68**

Legend Rare Coin Auctions is proud to offer this SUPERB GEM Spanish Trail half dollar. One of the KEY issues in the series, only 10,008 were struck, and the present MS68 is TIED FOR FINEST GRADED at either service--a real prize for ANY commem special st.

With its wide open fields, this type often comes with grade limiting marks and ticks. They also often come lack luster or unattractively toned. This SUPERB GEM is the total opposite of typical! Boldly

lustrous surfaces are satiny and have a thick mint bloom. The devices are sharply struck and glossy. The glowing luster brings out the soft pastel toning, again, a feature that is missing from the vast majority of Spanish Trail halves.

The obverse design, featuring the head of a Texas longhorn steer is a play on the name of Spanish explorer Alvar Nunez Cabeza de Vaca (which translates to cow's head). The reverse shows the path from St. Augustine Florida to El Paso Texas that Cabeza de Vaca took.

PCGS 6, NGC 7. The last time a non-CAC example sold in auction was in March 2017, that coin sold for \$17,250 way back then! A PCGS/CAC sold in the 2019 FUN auction for \$24,000 and the current PCGS Price Guide value is listed at \$28,500. What an important opportunity for the collector who demands the FINEST for their high ranking Registry Set.

A truly SUPERB Vancouver half dollar! Boldly lustrous surfaces have a warm satin glow throughout. The obverse is blanketed in a pewter-tea, silvery rose, and lilac gray color that is really brought to life vividly by the luster. Brilliant, untuned blazing silver surfaces adorn the reverse. The details are sharply struck up and the surfaces are devoid of any kind of serious mark or even the slightest of ticks.

PCGS 65, NGC 51, CAC 42. The most recent example to sell in auction realized \$2,640 in October 2018. We sold one in our September 2018 Regency Auction for \$3,408. The current Collector's Universe value is listed at \$2,800. Just 19 coins are graded finer, making this a great addition to ANY set of classic commemoratives.

PCGS 147, NGC 93, CAC 62. There are 14 coins graded MS67+ at PCGS, with NONE finer. We believe that a number of these represent the same coin being submitted a few times in hopes of a higher grade. NGC has graded 3 in MS67+ and 3 in MS68 finer. The current Collectors Universe value is listed at \$6,000 and the most recent CAC example in 67+ to sell realized \$3,600 in the 2019 FUN auction. Prior to that, one sold in June 2018 for \$5,280. Among the VERY FINEST graded, this SUPERB GEM will be a great addition for the FINEST of PCGS Registry Sets.

**MS67 CAC**  
 A real condition rarity in this lofty state of preservation. Not only are they RARE in MS67 and excessively so any finer, CAC is really tough on them! Finding a PCGS/CAC example is NOT easy!

As expected of a SUPERB GEM, the surfaces are smooth and essentially without flaw. Bright and brilliant yellow gold luster vividly rotates around the sharply struck devices, bringing them out to their fullest. The eye appeal is exquisite! Clearly one of the finest of the 10,025 struck that survive.

PCGS 25, NGC 22, CAC 9. Going back to 2009 (that's a 10 year span) on only five PCGS/CAC coins have sold in auction, the most recent at \$13,250, but the average APR is \$16,430. This is an important opportunity for the advanced collector of classic gold commemoratives—only four are graded higher, 2 in 67+ and 2 in 68. The current values for anything finer is more than double our estimate. Good luck!

**LOT 508****\$50 1915-S PANAMA-PACIFIC, OCTAGONAL, PCGS MS63**

One of the most impressive of all U.S. coin types, these were issued to commemorate the opening of the Panama Canal. The Pan-Pac commemoratives were struck in half dollar, gold dollar, quarter eagle, and fifty dollar denominations; the latter struck in both round and octagonal formats. All told, 645 octagonal "bugs" were sold at the Expo and afterward. A beautiful type coin, unique in its format.

The presently offered coin is in a wonderful state of preservation for the collector. A vibrant, satiny golden luster blankets both the obverse and reverse. Well struck and attractive for the assigned grade, these large gold pieces, although struck for collectors, often have large marks or were cleaned by non-numismatic owners. This coin has a few unobtrusive ticks and lines, all perfectly appropriate for the MS63 grade assigned.

PCGS 167, NGC 111. The combined populations from PCGS and NGC in all grades add to more than the 645 distributed, meaning that there is a lot of duplication in the Population and Census data. This is a classic type that is a centerpiece of the collections that they grace. The most recent brought \$72,000 in September 2018, and prior to that, two sold for \$76,375, both in January 2016. Currently, the PCGS Price Guide lists this grade at \$87,500. Truly a rare coin and always in demand.

**PCGS# 7452 | ESTIMATE: \$62,500+**

##### **\$2.50 1926 SESQUICENTENNIAL. PCGS MS66 CAC**

What an AMAZING, superb GEM quality Sesquicentennial quarter eagle!

A brilliant satin bloom from all over with very flashy, radiating cartwheel luster. Every design element is sharply struck showing full definition. A medium orange golden-glow shows some areas of light rose toning, giving this beauty a stunning look. Only under the magnification of a strong loupe can you see any tiny ticks. The eye appeal, as you might expect, is incredible!

**LOT 512**

**\$50 1851 HUMBERT. REEDED EDGE, 880. NGC AU53 CAC**

K-5, considered to be low R-5. This is a very handsome example of this rare and impressive type. Wonderful honey gold coloration coats the surfaces on both sides. Both sides are boldly defined, with just some minor weakness on the highest points of the design types. While slightly worn and showing some minor contact marks, these are very minimal. The edges are so id, free of any dings that usually plague the corners. This is quite the pleasing coin and when you consider how choppy a 2.5 ounce gold coin that circulated during the Gold Rush can be, this one is very high end. Without a doubt this is one of the more eye appealing AU examples you will encounter.

Perennially popular among collectors, these "ingots" or "slugs" were struck in the U.S. Assay office in San Francisco, under the direction of Augustus Humbert. His mint operated for several years before the Federal government took over operations and eventually in 1854 opened as the official branch mint in San Francisco. Because of his reputation for honesty, Humbert's operations put out of business many of the other assaying and minting firms that opened after the discovery of gold in California. Indeed, these "slugs" were so well received in gold west commerce, even after the official branch mint at San Francisco poured federal issue gold coins into commercial streams, they were still widely circulated.

PCGS 6, NGC 12, CAC 4 These large gold coins are always in demand, and even the lowest quality examples approach five figure prices. By comparison, this high quality AU53 seems like a bargain! The only CAC-approved example to sell in auction was a PCGS coin, which sold for \$69,000 in the 2012 FUN auction. Finer examples are very few and far between, very rarely offered. This is a very important opportunity for anyone looking to add a very attractive, high grade example to an advanced type set or for anyone who specializes in Territorial or Pioneer gold coins. We anticipate strong bidding when this one crosses the block!

This coin is of such high end quality and is FLAWLESS that it almost looks too good to be real! It really is a fantastic, SUPERB example of the smaller sized Goloid Metric dollar and is easily among the VERY FINEST of all Goloid dollars, regardless of Judd number!

Featuring William Barber's Liberty head design on the obverse and the Goloid composition on the reverse, this pattern is rated R-7+ (fewer than half a dozen known) and is struck in aluminum with a Reeded Edge.

The technical qualities are all there and then some on this SUPERB GEM. The aluminum surfaces have a semi-lustrous reflective character in the fields. The devices are very well struck with full definition on both sides. Unlike many patterns struck in aluminum, this one lacks any distracting hairlines, corrosion, or any other post minting issues that usually plague coins in this composition. The eye appeal is quite high end. It is also fresh to the market, coming to us from a client who put it away many years ago. It is ex. Lester Merkin's March 1968 Auction, lot 360. It is our great pleasure to offer this magnificent coin to the current generation of collectors.

PCGS 1, NGC 0, CAC 1. There are no recent auction records for a J-1629 in any grade. The most recent example to sell was the Tree Many Feathers coin in November 2001. The Garrett Coin, which is now graded PCGS PR69, is in the Simpson Collection and will not be available anytime soon! A grand opportunity not to be missed by any advanced collector of patterns. It may well be a VERY long time until another comes up for sale!

LOT 514

**\$3 1875 J-1436. PCCS PR65 RB CAC**

Legend Rare Coin Auctions is proud to offer this EXTREMELY RARE \$3 die trial, a piece that is actually RARER than the regular issue (a Proof only date, of which perhaps 20-25 survive). Struck from the regular Proof \$3 gold dies in copper with a reeded edge.

Listed in Judd as R-7+, this seems low, as Pollock only lists two examples.

Richly toned copper surfaces show off a dazzling array of blues and violets that intermingle with gold and large amounts of the original copper red, particularly on the reverse. Sharply struck throughout the design, with full definition on all the details, care was taken to strike this GEM. Aside from the most minute, microscopic flecks, the surfaces are smooth and free of distracting marks or lines. Indeed, all we see with a strong glass are mint made lines and some old die rust. The eye appeal is spectacular.

This coin is currently the only one graded by PCCS in any color designation, and the only example showing as having sold in auction in PCCS CoinFacts is an NGC PR64 CAC, struck in GILT copper in the 2017 ANA auction, and prior to that, a raw example, called PR60 sold in June 1990 (that coin was gilt, and we believe that it is the same one that sold in 2017!) Think about all the large pattern collections that have sold in auction since 1990, and just one contained a J-1436! We believe this is the coin that is listed in Pollock as having last been sold in Lester Merkin's September 1974 auction, lot 231, although matching this coin to the half tone, black and white photo is not 100% definitive. The only other example noted by Pollock was the King Farouk coin, which is listed as "EF."

The uspatterns.com website notes that this is more likely an off-metal striking, rather than a die trial, and sold in special sets to VIP collectors. The number struck was tiny, and likely no more than 6 were originally produced. Since the only other example we can identify was gilt, we are comfortable saying this coin is quite possibly more like an R-8 with no more than three examples surviving!

PCCS 1, NGC 0, CAC 1. There are no auction records appropriate for this major rarity. If you consider that the regular issue 1875 \$3 is a Proof-only striking, and any example that comes up for auction today would carry a six-figure price tag, the current Collectors Universe value for this semi-UNIQUE pattern at \$85,000 seems reasonable. This is an opportunity of the utmost importance to the advanced Pattern or \$3 gold collector and is missing from most major Pattern collections ever assembled.

Worthy of a world class collection, this is a truly unique opportunity not to be missed!
